QUESTION: 3
A regional airline company supports three SANs in a heterogeneous environment. SAN hosts Human Resources (HR) and has three AlphaServers with Tru64 UNIX. The database for HR is in excess of 350 GB. Crew Scheduling is maintained by W2000 advanced server in a cluster and accesses over 2 TBs. The airline email system is on a clustered Windows 2000 advanced server on a SAN with 750 GB storage. Their Parts Inventory Management application is maintained on a Windows NT Server. The operation runs seven days a week and little time is available for backup. When considering the amount of time required to back up the HR, how would you configure the RAID sets for best performance when transferring the data to the EBS?
