HP ProCurve Combined Security and Mobility

<http://www.ipass4sure.com/exams.asp?examcode=HP0-759>

The HP0-759 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The HP0-759 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The HP0-759 exam is very challenging, but with our HP0-759 questions and answers practice exam, you can feel confident in obtaining your success on the HP0-759 exam on your FIRST TRY!

HP HP0-759 Exam Features

- Detailed questions and answers for HP0-759 exam
- Try a demo before buying any HP exam
- HP0-759 questions and answers, updated regularly
- Verified HP0-759 answers by Experts and bear almost 100% accuracy
- HP0-759 tested and verified before publishing
- HP0-759 examcollection vce questions with exhibits
- HP0-759 same questions as real exam with multiple choice options

Acquiring HP certifications are becoming a huge task in the field of I.T. More over these exams like HP0-759 exam are now continuously updating and accepting this challenge is itself a task. This HP0-759 test is an important part of HP certifications. We have the resources to prepare you for this. The HP0-759 exam is essential and core part of HP certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real HP0-759 Test and save time and money while developing your skills to pass your HP HP0-759 Exam? Let us help you climb that ladder of success and pass your HP0-759 now!

Exam Name:	HP ProCurve Combined Security and Mobility Exam		
Exam Type:	HP		
Exam Code:	HP0-759	Total Questions:	85

Question: 1

Which actions should be taken to test access point coverage during a site survey? Select THREE.

- A. Temporarily install an access point to test and measure signal to noise ratio levels.
- B. Use a wireless enabled portable device running an SNR analyzer tool.
- C. Configure all access points to use the same channel and enable bridge mode operation on all access points. Test connectivity and roaming once the site AP's are setup in bridge mode.
- D. Enable and verify 802.1X security to insure proper signal encryption and strength.
- E. Configure overlapping cells using non-overlapping channels and test for coverage.
- F. Configure WEP keys on client and access points.
- G. Configure a WDS link between two access points.

Answer: A, B, E

Question: 2

Site surveys are best done at the pre-sales stage in order to provide a customer with a rough estimate of what their investment will be. What are some important results derived from a site survey? Select TWO.

- A. How far should the APs be spaced apart (what cell size is needed)?
- B. Are there available dedicated power circuits for AP usage to limit noise feedback?
- C. Base estimated cell radius of 33 meters supporting 60-90 users at 5.5 Mbps aggregate bandwidth.
- D. How many APs will be required in a given area (cell density)?
- E. Use an Ultrasonic Wave Analyzer to test signal to noise ratio for proper placement of access points.

Answer: A, D

Question: 3

Clients A and B attempt to communicate with access point C at the same time and a collision occurs because they cannot detect each other's transmissions. Which problem does this illustrate?

- A. fast transform
- B. retransmission
- C. key mis-match
- D. hidden client

Answer: D

Question: 4

Given the complicated nature of wireless bridging, what must be considered before implementation? Select THREE.

- A. auto channel select must be enabled
- B. circular links require spanning tree to be set
- C. WDS links need to be set to same frequency channel
- D. multiple hop links need to be reduced to less than three
- E. multiple hop links may lead to long end-to-end latency figures
- F. circular links can create IP loops leading to increased performance
- G. WDS links need to be set to alternating frequency channels using 1, 6 and 11

Answer: B, C, E

Exam Name:	HP ProCurve Combined Security and Mobility Exam		
Exam Type:	HP		
Exam Code:	HP0-759	Total Questions:	85

Question: 5

A customer is located on the top floor of a three-story building. The second floor already has an existing 802.11b network using channels 1, 6 and 11. The customer on the third floor wants to install an 802.11b network and requires three access points.

- You have just installed three new ProCurve 4100gl switches in a remote closet on your LAN.
- You have assigned IP addresses to them and included a basic security configuration that includes operator and manager passwords and a listing of IP Authorized Managers.
- When you return to the data center you connect to the switches from your management station to ensure that you can manage the switches remotely.
- Later you are called to another building to deal with some end user problems.
- When you are finished assisting the end-users, you attempt to telnet to the new switches but are unable to connect.
- You can ping the switches from your current location, but all attempts at management through telnet and the Web interface fail.
- What is most likely the problem?

Which channels should be used for the three access points? Select TWO.

- A. AP-A: channel 1, AP-B: channel 6 and AP-C: channel 11
- B. AP-A: channel 7, AP-B: channel 8 and AP-C: channel 9
- C. AP-A: channel 11, AP-B: channel 1 and AP-C: channel 6
- D. AP-A: channel 2, AP-B: channel 3 and AP-C: channel 4
- E. AP-A: channel 6, AP-B: channel 11 and AP-C: channel 1

Answer: C, E

Question: 6

What is the valid range for client VLAN IDs on a ProCurve 420?

- A. 1-64
- B. 1-128
- C. 1-2048
- D. 1-4095

Answer: D

Question: 7

Two wireless stations are located in close proximity to the same access point. Which mechanisms prevent them from transmitting at the same time? Select TWO.

- A. CSMA-CD

Exam Name:	HP ProCurve Combined Security and Mobility Exam		
Exam Type:	HP		
Exam Code:	HP0-759	Total Questions:	85

- B. SYN/ACK
- C. CSMA-CA
- D. MAC/LLC
- E. RTS/CTS

Answer: C, E

Question: 8

While probing a wireless network using the wireless client utility on your computer, you can see that several different SSIDs are shown to be available. Which procedure has your wireless card just performed?

- A. a passive scan
- B. a WPA PSK refresh
- C. an active scan
- D. a WEP key refresh

Answer: C

Question: 9

A user is authenticated through a ProCurve 420 with VLANs enabled. However, the RADIUS authentication server does not return a VLAN attribute. What will happen to the user? The user will be _____.

- A. placed in the Unauthorized VLAN
- B. denied access completely
- C. placed on the Management VLAN
- D. placed in the access point's Native VLAN

Answer: D

Question: 10

A customer has noticed that the throughput on his wireless network is not sufficient for his business requirements. As a first step in trying to alleviate this problem, you decide to increase the multicast rate on all of his access points to the maximum setting. This will help to improve real throughput because the multicast rate is the _____.

- A. rate at which WEP keys are refreshed
- B. rate at which access points send out beacon frames to clients
- C. rate at which control and management frames are transmitted to all associated clients
- D. raw data rate at which packets are transmitted between a single client and access point

Answer: C

Question: 11

You are installing an access point that is transmitting at 16 dBm. It is connected to a directional patch antenna with a rating of 6.5 dBi through a cable and connector set that is rated at 2.5 dBi. What is the effective gain of this configuration?

- A. 25 dB
- B. 20 dB
- C. 12 dB
- D. 30 dB

Answer: B

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
