HP0-782

HP

NonStop Remote Database Facility (RDF)

<http://www.ipass4sure.com/exams.asp?examcode=HP0-782>

The HP0-782 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The HP0-782 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The HP0-782 exam is very challenging, but with our HP0-782 questions and answers practice exam, you can feel confident in obtaining your success on the HP0-782 exam on your FIRST TRY!

HP HP0-782 Exam Features

- Detailed questions and answers for HP0-782 exam
- Try a demo before buying any HP exam
- HP0-782 questions and answers, updated regularly
- Verified HP0-782 answers by Experts and bear almost 100% accuracy
- HP0-782 tested and verified before publishing
- HP0-782 examcollection vce questions with exhibits
- HP0-782 same questions as real exam with multiple choice options

Acquiring HP certifications are becoming a huge task in the field of I.T. More over these exams like HP0-782 exam are now continuously updating and accepting this challenge is itself a task. This HP0-782 test is an important part of HP certifications. We have the resources to prepare you for this. The HP0-782 exam is essential and core part of HP certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real HP0-782 Test and save time and money while developing your skills to pass your HP HP0-782 Exam? Let us help you climb that ladder of success and pass your HP0-782 now!

Question: 1

If an application uses hard-coded system names in code and data, which action should be taken? Select TWO.

- A. Nothing as RDF will change the data in-flight.
- B. The application should be rewritten using open source.
- C. The database records should have the system name removed.
- D. The code should be changed to use shared run-time libraries (SRLs).
- E. The source code should be modified to use ASSIGNS and or DEFINES.

Answer: C, E

Question: 2

After you had executed a planned switchover to an RDF backup site, and when your primary system has come back online, you would use the RDF INITIALIZE command to prepare a new RDF subsystem to replicate all audit generated on the backup system since the switchover back to the original primary system. Which command would you use?

- A. INITIALIZE RDF, INITTIME 09APR2004 10:05
- B. INITIALIZE RDF, TIMESTAMP 09APR2004 10:05
- C. INITIALIZE RDF, SYNCHDBTIME 09APR2004 10:05
- D. INITIALIZE RDF, BACKUPSYSTEM <backup-system-name>

Answer: A

Question: 3

Which commands guarantee that the backup system database is logically consistent? Select TWO.

- A. STOP TMF
- B. STOP RDF
- C. STOP UPDATE, <timestamp>
- D. STOP UPDATE

Answer: A, C

Question: 4

When designing an application to be protected by RDF, what should be considered?

- A. changes to the application source code
- B. changes to the application object code
- C. changes to the operational procedures
- D. changes to the user interfaces

Answer: C

Question: 5

Under which circumstance could a transaction that committed on the primary system be undone on the backup system during an RDF takeover operation?

- A. You have a MAT-only RDF environment; RDF got the commit on the backup system, but it did not receive all data audit associated with the transaction.
- B. You have a MAT and auxiliary audit RDF environment; RDF got the commit of an Enscribe create operation on the backup system, but it never received audit record for the create.

- C. You have a MAT and auxiliary audit RDF environment; RDF got the commit associated with an insert, but it never received the insert of the operation.
- D. You have a MAT and auxiliary audit RDF environment; RDF got the commit associated with a stop-updater audit record, but it never received the stop updater operation.

Answer: C

Question: 6

RDF was started with UPDATE OFF. What is the potential consequence if the updaters are not started?

- A. The purger process will purge image trail files that are necessary for a TAKEOVER if the RETAINCOUNT is met.
- B. TMF may disable the beginning of new transactions on the primary system.
- C. It may become necessary to configure overflow space for the RDF image trails.
- D. If the image trail disks become full, RDF will shut down.

Answer: B

Question: 7

In a triple contingency environment, the RDF COPYAUDIT command copies _____.

- A. the TMF audit trail files to the backup system
- B. image information from one backup system to the other backup system
- C. and updates the missing transactions to the second backup database
- D. the primary TMF audit settings to the backup TMF configuration

Answer: B

Question: 8

What is a result of issuing the STOP RDF command?

- A. Audit trail files on the primary system pinned by RDF stay pinned.
- B. The backup database is closed and left in a consistent state.
- C. The backup database is closed and left in an inconsistent state.
- D. Audit trail files on the primary system pinned by RDF are unpinned.

Answer: B

Question: 9

What are the ramifications of running RDF with UPDATE OFF?

- A. The receivers and purger run on the backup system.
- B. Only the purger runs on the backup system.
- C. TMF must be running on both primary and backup systems.
- D. No RDF components run on either primary or backup system.

Answer: A

Question: 10

What happens when the UPDATERRTDWARNING threshold is breached?

- A. An EMS event is generated on the RDF backup system.
- B. An EMS event will be generated only if an RDFCOM STATUS RTDWARNING command is executed.

- C. An EMS event will be generated only if an RDFCOM STATUS RTDWARNING or an RDFCOM STATUS RDF command is executed.
- D. An EMS event is generated on the RDF primary system.

Answer: B

Question: 11

Which operations management application maintains a database of RDF status information?

- A. NonStop NET/MASTER (NNM) Management Services
- B. NonStop Open System Management (OSM)
- C. OpenView NonStop Server Management (OVNM)
- D. NonStop Availability Stats and Performance (ASAP)

Answer: D

Question: 12

The primary function of each exception file is to capture the _____.

- A. error exception events of the specified process
- B. aborted transactions during normal processing
- C. individual audit records undone during TAKEOVER processing
- D. individual audit records undone during Stop-Update-to-Time and TAKEOVER processing

Answer: C

Question: 13

When is it best to issue the STOP TMF command in order to STOP RDF?

- A. prior to initializing RDF with the INITTIME option
- B. prior to executing a planned switchover
- C. in order to STOP RDF abruptly
- D. It is always best to execute a STOP TMF command in order to STOP RDF.

Answer: B

Question: 14

When the STOP UPDATE, TIMESTAMP command completes, how do you know that all the updaters have completed successfully?

- A. There are no entries in the RDF exceptions file.
- B. The updaters have all stopped.
- C. RDFCOM displays a message stating that "the operation has completed successfully."
- D. The EMS event log displays a shutdown complete message for each updater.

Answer: D

Question: 15

After a planned switch and before switching back to the original primary node, you must _____.

- A. resynchronize the entire databases
- B. perform an online dump on the current primary system
- C. check the RTD times are virtually zero
- D. check that RDF updaters are running

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
