HP0-815

HP

Advanced SAN Architecture

<http://www.ipass4sure.com/exams.asp?examcode=HP0-815>

The HP0-815 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The HP0-815 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The HP0-815 exam is very challenging, but with our HP0-815 questions and answers practice exam, you can feel confident in obtaining your success on the HP0-815 exam on your FIRST TRY!

HP HP0-815 Exam Features

- Detailed questions and answers for HP0-815 exam
- Try a demo before buying any HP exam
- HP0-815 questions and answers, updated regularly
- Verified HP0-815 answers by Experts and bear almost 100% accuracy
- HP0-815 tested and verified before publishing
- HP0-815 examcollection vce questions with exhibits
- HP0-815 same questions as real exam with multiple choice options

Acquiring HP certifications are becoming a huge task in the field of I.T. More over these exams like HP0-815 exam are now continuously updating and accepting this challenge is itself a task. This HP0-815 test is an important part of HP certifications. We have the resources to prepare you for this. The HP0-815 exam is essential and core part of HP certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real HP0-815 Test and save time and money while developing your skills to pass your HP HP0-815 Exam? Let us help you climb that ladder of success and pass your HP0-815 now!

QUESTION: 1

You are replicating data over long distances using 1 Gbps B-series (Brocade) fabric switches. Extended fabrics (increased buffer-to-buffer credits) should be used when the minimum distance exceeds _____ km.

- A. 10
- B. 15
- C. 20
- D. 35

Answer: A

QUESTION: 2

Why do customers want to extend the SAN?

- A. to make SANs more manageable
- B. to scale SANs with more switches
- C. to increase the speed of data transport
- D. to connect geographically distributed data centers

Answer: D

QUESTION: 3

You are using 2 Gb switches connected in a dual ring topology with two ISLs. What is the maximum cross-sectional bandwidth?

- A. 200 Mbyte/sec
- B. 350 Mbyte/sec
- C. 400 Mbyte/sec
- D. 800 Mbyte/sec

Answer: D

QUESTION: 4

A customer has implemented a multi-switch core-edge fabric with B-series (Brocade) 2 Gbps fabric switches. How can the SAN administrator back up the SAN configuration data every time a change is made to the SAN? (Choose two.)

- A. download the switch and zoning configurations with the Fabric Manager
- B. use a Telnet session with FTP to download the switch and zoning information
- C. download the switch and zoning configurations with the High Availability Fabric Manager

D. Switch configuration and zoning configuration are automatically saved to a pre-defined location before a change is applied to either a switch or the fabric.

Answer: A, B

QUESTION: 5

What is a design property of the Core+Edge+Leaf SAN topology?

- A. It allows many devices to share a single ISL.
- B. It allows many hosts to share a single storage port.
- C. It can start at one switch and grow almost without limit.
- D. It involves simplex I/O, meaning only one path is utilized for I/O.

Answer: C

QUESTION: 6

What is dark fiber?

- A. fiber optic cable that has black color coding
- B. a special version of single-mode 9 fiber optic cable
- C. shared fiber optic cable running from a to b offered by a service provider
- D. unused fiber optic cable running from a to b offered by a service provider

Answer: D

QUESTION: 7

A SAN administrator has an existing test SAN, based on 1 Gbps B-series (Brocade) fabric switches. To evaluate the compatibility of 1 Gbps and 2 Gbps switches, the administrator powers on a 1 Gbps and a 2 Gbps fabric switch (factory default settings). An ISL is then installed between the two fabric switches. The administrator notices that the fabric segments. What are two possible causes of this segmentation? (Choose two.)

- A. The zoning information is incompatible.
- B. The Core PID parameters are conflicting.
- C. The new switch has a conflicting Domain ID.
- D. The speed on the port must first be set for 1 Gbps operation.

Answer: B, C

QUESTION: 8

How can you reduce Total Cost of Ownership (TCO) of a SAN?

- A. identify and address pain levels?at upper management
- B. identify and address pain levels?when reducing operating staff
- C. identify and address SAN islands in large corporations that will merge from smaller organizations
- D. identify and address pain levels?associated with data movement, data sharing, and data growth

Answer: D

QUESTION: 9

What is the recommended way to fail over a site in a replication solution?

- A. as a result of an application timeout
- B. by an operator with scripted procedures
- C. as a result of the loss of the inter-site links
- D. by the absence of heart beat of the source array

Answer: B

QUESTION: 10

What is a common cause of downtime in a customer's IT application, databases, and infrastructure?

- A. human error
- B. power outages
- C. computer viruses
- D. software malfunction

Answer: A

QUESTION: 11

What are three OVSAM primary device discovery components? (Choose three.)

- A. SNMP discovery
- B. host agent discovery
- C. LUN masking discovery
- D. system reboot discovery
- E. managed hosts discovery
- F. discovery by event modeling

Answer: A, B, E

QUESTION: 12

What are two benefits of migrating from one SAN topology to another SAN topology? (Choose two.)

- A. Zone conflicts and limitations are resolved.
- B. The management of the SAN is simplified.
- C. Many smaller switches are consolidated into fewer large fabric switches.
- D. The SAN can scale to support additional storage devices and applications servers.

Answer: C, D

QUESTION: 13

Who is responsible for the security in the SAN?

- A. SAN Change Manager
- B. LAN Security Manager
- C. SAN Security Manager
- D. SAN Configuration Manager

Answer: C

QUESTION: 14

What does a SAN high availability configuration provide?

- A. a non-disruptive merging of multiple SANs
- B. a non-disruptive upgrade process of the iSCSI protocol definitions
- C. the capability to test new switch firmware in a production environment
- D. non-disruptive SNMP messages to the system management framework

Answer: A

QUESTION: 15

What does SAN performance management monitor and analyze?

- A. SNMP traffic
- B. SAN traffic patterns
- C. RSCN traffic patterns
- D. SAN name server traffic

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
