HP

Designing and Implementing HP Storage StoreOnce Solutions

The HP0-J30 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The HP0-J30 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The HP0-J30 exam is very challenging, but with our HP0-J30 questions and answers practice exam, you can feel confident in obtaining your success on the HP0-J30 exam on your FIRST TRY!

HP HP0-J30 Exam Features

  - Detailed questions and answers for HP0-J30 exam
  - Try a demo before buying any HP exam
  - HP0-J30 questions and answers, updated regularly
  - Verified HP0-J30 answers by Experts and bear almost 100% accuracy
  - HP0-J30 tested and verified before publishing
  - HP0-J30 examcollection vce questions with exhibits
  - HP0-J30 same questions as real exam with multiple choice options

Acquiring HP certifications are becoming a huge task in the field of I.T. More over these exams like HP0-J30 exam are now continuously updating and accepting this challenge is itself a task. This HP0-J30 test is an important part of HP certifications. We have the resources to prepare you for this. The HP0-J30 exam is essential and core part of HP certifications and once you clear the exam you will be able to solve the real life problems yourself.Want to take advantage of the Real HP0-J30 Test and save time and money while developing your skills to pass your HP HP0-J30 Exam? Let us help you climb that ladder of success and pass your HP0-J30 now!

QUESTION: 1
Which resource can be used to monitor and perform remote reboot/shutdown of the D2D4312? (Select two.)

A. Guardian Service Processor (GSP)
B. HP Service Modem (SM)
C. D2D Console (D2DC)
D. Management Processor (MP)
E. Integrated Lights-Out (iLO)

Answer: C, E

QUESTION: 2
What is the recommended method of tape offload for virtual tape?

A. replicating the data to a remote tape device using the HP OST plug-in
B. creating a private NAS share and use replication services to move the data, then copying the NAS share to tape using the backup solution
C. configuring the D2D to use shadow copy services to back up to directly attached tape devices
D. using a backup application like HP DataProtector to control and manage the copy of virtual to physical media

Answer: D

QUESTION: 3
What is the maximum number of source D2D appliances that can replicate to a single D2D4312 target?

A. 8
B. 16
C. 24
D. 50

Answer: D

QUESTION: 4
Which technology makes it possible to replicate data over low bandwidth connections between HP D2D solutions?

A. S.M.A.R.T disk blocks
B. HP Accelerated deduplication
C. D2D data compression module
D. HP StoreOnce deduplication

Answer: D

QUESTION: 5
Large amounts of data are being backed up from multiple hosts. When sizing the number of deduplication stores, which best practice will improve performance by simplifying each store and reducing the amount of data each contains?

A. create many small deduplication stores
B. create one large deduplication store 200GB larger than the total amount of data
C. separate them across several libraries and consequently into multiple backup jobs
D. use several large cartridges greater than 800GB

Answer: C

QUESTION: 6
Which virtual library interface is provided on all HP D2D products?

A. Direct SCSI Attached
B. Firewire
C. Fibre Channel
D. iSCSI

Answer: D

QUESTION: 7
Which deduplication architecture is a portable engine that can be consistently embedded in multiple products?

A. Accelerated Deduplication Engine
B. HP StoreOnce Deduplication
C. Dynamic Deduplication Script
D. HP Advanced Deduplication Accelerator

Answer: B

QUESTION: 8
What NAS protocols are supported by all current HP StoreOnce products? (Select two.)

A. NFTP
B. NCP
C. NFS
D. CIFS
E. FTP

Answer: C, D

QUESTION: 9
Why should you make replication target libraries visible to the backup host? (Select two.)

A. to check the integrity of the replicated backup by doing a restore
B. to make replicate target libraries visible by default
C. to perform manual tape copy to any device on the network using the backup application
D. to make all barcode labels visible to the backup server

Answer: A, C

QUESTION: 10
When configuring a NAS share on a D2D backup device, which types of authentication can be set? (Select three.)

A. NIS authentication
B. Active Directory (AD) authentication
C. NFS authentication
D. No authentication
E. User authentication
F. NDS authentication

Answer: B, D, E

QUESTION: 11

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of Professional & Certified Experts available via support.
- Free 90 days updates to match real exam scenarios.
- Instant Download Access! No Setup required.
- Price as low as $19, which is 80% more cost effective than others.
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (Android, iPhone, iPod, iPad)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- *Guaranteed Success*.
- **Fast**, helpful support 24x7.
