- A. Http://<SiteScope Server name>:8080/sitescope
- B. Http://<SiteScope Server name>:8888/sitescope
- C. Http://<SiteScope Server name>:8180/sitescope
- D. Http://<SiteScope Server name>:2696/sitescope

**Answer: A, B**

**Question: 3**

Which statement best describes a situation for choosing to use the Monitor Deployment Wizard?

- A. When you want to create a relationship between SiteScope monitors that are already in the CMDB and other CI's that are still not inserted to the CMDB
- B. When you want to deploy a set of SiteScope monitors to applications or servers that were already populated in the CMDB through discovery
- C. When you want to create the same set of monitors for different remote machines in SiteScope
- D. When you want to create a relationship between SiteScope monitors that are already in the CMDB and other CI's that are still not inserted to the CMDB

**Answer: B**

**Question: 4**

Which operating systems support SiteScope installation?

- A. Window, Linux and Solaris
- B. Windows and Solaris
- C. Windows only
- D. Windows and Linux

**Answer: A**

**Question: 5**

If your core server is replaced by another core server, what task should you perform on SiteScope to integrate the new core server?

- A. I will reset BAC integration from the SiteScope UI and then attach SiteScope to already existing profile.
- B. I will reset integration and will reconnect SiteScope.
- C. I don't need to do anything the recovery is automatic.

D. I need to detach SiteScope, redirect it to the new core server from SiteScope UI and then attach it back to MA.

**Answer: D**

**Question: 6**

In the profile creation wizard, what will happen when you select the profile database name (in a multiple profile database environment) from the combo box?

- A. A failure to create the profile since the default profile database is the only allowed option
- B. Data from the created profile to be sent to the selected database ONLY if it was marked as the default database
- C. Data from the created profile to be sent to the selected database
- D. You don't have an option to select the database - it is selected automatically for you by the Business Availability Center server

**Answer: C**

**Question: 7**

What is the quickest way to create a relationship between a CI and a Business Process Monitor?

- A. Create a profile and run it, make sure the adapters are synced and then edit a view and attach the monitor from within the view
- B. Create profile and use the attach CI option in the Monitoring Administration profile creation operation - this will automatically create the link between the CI and the Monitor entity
- C. To use the Monitor Deployment Wizard and automatically assign a monitor to a specific CI
