Which policy focuses on auditing the functionality of the Web Application only?

- A. Standard policy
- B. Application policy
- C. Web Service policy
- D. Web Application policy

Answer: B

Question: 5

What are some uses of regular expressions in WebInspect? Select two.

- A. They are used for response filtering and may be customized.
- B. They are used for filtering the vulnerabilities in the Dashboard.
- C. They are used for detecting the logout signature in a Login Macro.
- D. They are used for defect reporting when WebInspect is linked to Quality Center.
- E. They are used to group vulnerabilities in the Vulnerabilities tab in the Summary pane.

Answer: A, C

Question: 6

Which statement best describes the role of the "Web Form Values" file?

- A. The WebForm Values file is part of the standard policy.
- B. The WebForm Values file is generated during a scan to capture test parameters used during the scan.
- C. The WebForm Values file contains parameter names and provides static values to be submitted when testing webforms.
- D. The WebForm Values file is used to establish and maintain "state" with the application by monitoring webform authentication methods.

Answer: C

Question: 7

What is a logout signature?

- A. a snapshot of the session state found when the user has lost session state
- B. a regular expression used to identify those responses that indicate session state has been lost
- C. the toolbar feature in Web Macro Recorder which automatically determines the macros regular expression
- D. a user-supplied keyword that will be inserted into the WebInspect scan data to indicate each response where a logout occurred

Answer: B

Question: 8

Which statement best describes SmartUpdate?

- A. SmartUpdate is the process that delivers WebInspect Messages to the bottom of the Home tab.
- B. SmartUpdate is the feature that sends False Positives (FP) to the HP Support team as quality feedback.
- C. SmartUpdate is a process that retrieves updates to the local vulnerability database and any WebInspect binary updates.
- D. SmartUpdate automatically omits security checks whose specified server/application type does not match the current targets server/application fingerprint.

Answer: C

Question: 9
