HP Data Protector Software Fundamental For Windows

<http://www.ipass4sure.com/exams.asp?examcode=HP0-M36>

The HP0-M36 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The HP0-M36 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The HP0-M36 exam is very challenging, but with our HP0-M36 questions and answers practice exam, you can feel confident in obtaining your success on the HP0-M36 exam on your FIRST TRY!

HP HP0-M36 Exam Features

- Detailed questions and answers for HP0-M36 exam
- Try a demo before buying any HP exam
- HP0-M36 questions and answers, updated regularly
- Verified HP0-M36 answers by Experts and bear almost 100% accuracy
- HP0-M36 tested and verified before publishing
- HP0-M36 examcollection vce questions with exhibits
- HP0-M36 same questions as real exam with multiple choice options

Acquiring HP certifications are becoming a huge task in the field of I.T. More over these exams like HP0-M36 exam are now continuously updating and accepting this challenge is itself a task. This HP0-M36 test is an important part of HP certifications. We have the resources to prepare you for this. The HP0-M36 exam is essential and core part of HP certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real HP0-M36 Test and save time and money while developing your skills to pass your HP HP0-M36 Exam? Let us help you climb that ladder of success and pass your HP0-M36 now!

QUESTION: 1

Backup Disk Agent (El VBDA). How do these two methods differ when performing incremental backups with millions of files and the file change rate is very low?

- A. CLP uses file tree walk to generate a list of objects to be backed up.
- B. El VBDA functionality resolves these issues by reading a local database on the client system.
- C. El VBDA helps incremental backups to complete in a much shorter amount of time.
- D. CLP significantly improves performance under these circumstances.

Answer: D

QUESTION: 2

When should you implement software encryption?

- A. when using online integration agents
- B. when you need to back up data from different sites through an unsecured LAN
- C. when the fastest backup performance is required
- D. when no hardware encryption license is available

Answer: B

QUESTION: 3

How many HP Data Protector Software cells can be managed by a single Manager-of-Managers?

- A. 1000
- B. 100
- C. 50
- D. 25

Answer: C

QUESTION: 4

What must be done in HP Data Protector Software 6.1 before a VTL device can be configured for auto migration?

- A. Run the devbra-allow VLS CLI command.
- B. Make the VLS available to HP Data Protector Software by importing it as a client.
- C. Create a VLS_allowed_hosts file on the Cell Manager.
- D. Create the VLS device with the automigration enabled.

Answer: B

QUESTION: 5

What is the result of a successful backup session using object mirroring?

- A. Mirrored objects are written to a special mirror pool and the backup is written to the specified media set.
- B. All backups and mirrored objects are in the same media pool.
- C. One media set contains the backup and additional media sets contain the mirrored objects.
- D. All backups and mirrored objects are appended to the same media.

Answer: C

QUESTION: 6

When upgrading to HP Data Protector Software 6.1, what should be considered about the global options file?

- A. The old file will be merged with the new global options file.
- B. The new global options file must be reconfigured.
- C. The new file must be replaced with the old global options file.
- D. The global options file is no longer used on Windows systems.

Answer: A

QUESTION: 7
