HP0-Y16

HP

ProCurve Network Immunity Solutions

<http://www.ipass4sure.com/exams.asp?examcode=HP0-Y16>

The HP0-Y16 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The HP0-Y16 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The HP0-Y16 exam is very challenging, but with our HP0-Y16 questions and answers practice exam, you can feel confident in obtaining your success on the HP0-Y16 exam on your FIRST TRY!

HP HP0-Y16 Exam Features

- Detailed questions and answers for HP0-Y16 exam
- Try a demo before buying any HP exam
- HP0-Y16 questions and answers, updated regularly
- Verified HP0-Y16 answers by Experts and bear almost 100% accuracy
- HP0-Y16 tested and verified before publishing
- HP0-Y16 examcollection vce questions with exhibits
- HP0-Y16 same questions as real exam with multiple choice options

Acquiring HP certifications are becoming a huge task in the field of I.T. More over these exams like HP0-Y16 exam are now continuously updating and accepting this challenge is itself a task. This HP0-Y16 test is an important part of HP certifications. We have the resources to prepare you for this. The HP0-Y16 exam is essential and core part of HP certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real HP0-Y16 Test and save time and money while developing your skills to pass your HP HP0-Y16 Exam? Let us help you climb that ladder of success and pass your HP0-Y16 now!

Questions: 1

Which alert can be triggered by SNMP traps sent by ProCurve switches?

- A. Default External
- B. Default IP Fanout
- C. Default IP Spoofing
- D. Default Virus Throttle
- E. Default ProCurve SNMP

Answer: D

Questions: 2

How do you configure PCM+ to generate periodic reports?

- A. Select the Reports button in the global toolbar.
- B. Enable the periodic reports setting in PCM+ Preferences.
- C. Configure the schedule in the appropriate Reports Wizard.
- D. Create policies with schedule-driven alerts and report actions.

Answer: D

Questions: 3

What is a reason to create a custom group for a server zone and set that group as the source for a NIM policy?

- A. Servers handle more mission-critical traffic, so you set less drastic actions.
- B. Servers trigger more false positives, so you set the NBAD sensitivities lower.
- C. Threats are targeted to servers at all times, so you set the policy to any time.
- D. Threats that are targeted to servers are more serious, so you set harsher actions.

Answer: A

Questions: 4

Which misconfiguration on PCM+ causes ProCurve NIM to fail to detect any anomalies in traffic?

- A. The wrong sFlow version
- B. An incorrect operator password
- C. An incorrect manager password
- D. An incorrect SNMP community name

Answer: D

Questions: 5

What should you do to set up your network infrastructure for remote mirroring?

- A. Enable jumbo frames.
- B. Enable frame fragmentation.
- C. Raise the maximum transmit unit (MTU).
- D. Reserve uplink ports for the mirroring session.

Answer: A

Questions: 6

What is the intended purpose of the default traffic sampling action of ProCurve NIM?

- A. To prevent ProCurve NIM from triggering false positives
- B. To help PCM+/NIM periodically begin to monitor new ports
- C. To send traffic for increased analysis to an Intrusion Detection System (IDS)
- D. To allow ProCurve NIM to take immediate action against the most probable threats

Answer: B

Questions: 7

You want to display and print a list of all events related to the Policy Manager. What should you do?

- A. From the Reports menu, select the Policy Events report.
- B. In Interconnect Devices, click the Events tab; filter for Policy Manager; click the Print button.
- C. From the Reports menu, select the Events report; filter for Policy Manager in the Report Wizard.
- D. In Network Management Home, click the Events tab; filter for Policy Manager; click the Print button.

Answer: D

Questions: 8

Your company's regulatory compliance group has asked you for a record of changes to the Policy Manager policies. Which report should you generate?

- A. Security Audit
- B. Actions by Policy
- C. Executed Policies
- D. Automation (Policy) History

Answer: C

Questions: 9

Which features are provided in a ProCurve NIM standalone deployment? (Select two.)

- A. Threat mitigation without the aid of PCM+
- B. Resetting of TCP sessions when threats are detected
- C. Signature-based detection of worms and other attacks
- D. Applying mitigation actions near the source of the threat
- E. Application of different policies based on the threat's place of origin

Answer: D, E

Questions: 10

Which action can help you troubleshoot a policy in realtime from PCM?

- A. Port Mirror
- B. Notify (Email)
- C. Message Dialog
- D. Traffic Sampling

Answer: C

Questions: 11

A network already has an Intrusion Prevention System (IPS) that is installed between a group of servers and the rest of the network. Which benefits does ProCurve NIM add in a NIM + IPS deployment? (Select two.)

- A. Deep packet inspection
- B. Signature-based detection
- C. Remediation of infected endpoints
- D. Protection for other resources throughout the network
- E. Applies actions closer to the point of origin of the attack

Answer: D, E

Questions: 12

How does ProCurve NIM determine the severity level for a security alert?

- A. From the violation count for the associated event
- B. From the event, and the severity cannot be overridden
- C. From the event, unless overridden by the alert configuration
- D. From the event for trap events and from the alert configuration for other events

Answer: C

Questions: 13

Which events can be signs of an unauthorized port scan? (Select two.)

- A. Port Anomaly
- B. DNS Tunneling
- C. TCP/UDP Fanout
- D. UDP Protocol Anomaly
- E. TCP Protocol Anomaly

Answer: C, E

Questions: 14

ProCurve NIM was registering few TCP/UDP Fanout events. You have raised the sensitivity, and many false positive TCP/UDP Fanout events are now triggered throughout the network. What should you do next? (Select two.)

- A. Lower the sensitivity to the previous level.
- B. Remove the TCP/UDP alert from all policies.
- C. Plan and create a Policy Manager policy to deal with false positive events.
- D. Exclude the devices triggering the false positive events from the TCP/UDP fanout.

Answer: A, D

Questions: 15

By default, which NBAD event will trigger traffic sampling on a port?

- A. Duplicate IP
- B. Virus Throttle
- C. Protocol Anomaly
- D. Packet Size Deviation

Answer: D

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
