HP0-Y25

HP

Building HP ProCurve Enterprise Mobility Solution

http://www.ipass4sure.com/exams.asp?examcode=HP0-Y25

The HP0-Y25 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The HP0-Y25 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently.
The HP0-Y25 exam is very challenging, but with our HP0-Y25 questions and answers practice exam, you can feel confident in obtaining your success on the HP0-Y25 exam on your FIRST TRY!

HP HP0-Y25 Exam Features

- Detailed questions and answers for HP0-Y25 exam
- Try a demo before buying any HP exam
- HP0-Y25 questions and answers, updated regularly
- Verified HP0-Y25 answers by Experts and bear almost 100% accuracy
- HP0-Y25 tested and verified before publishing
- HP0-Y25 examcollection vce questions with exhibits
- HP0-Y25 same questions as real exam with multiple choice options

Acquiring HP certifications are becoming a huge task in the field of I.T. More over these exams like HP0-Y25 exam are now continuously updating and accepting this challenge is itself a task. This HP0-Y25 test is an important part of HP certifications. We have the resources to prepare you for this. The HP0-Y25 exam is essential and core part of HP certifications and once you clear the exam you will be able to solve the real life problems yourself.Want to take advantage of the Real HP0-Y25 Test and save time and money while developing your skills to pass your HP HP0-Y25 Exam? Let us help you climb that ladder of success and pass your HP0-Y25 now!

Exam Name:	Building HP ProCurve Enterprise Mobility Solution		
Exam Type:	HP	Exam Code:	HP0-Y25
Certification	Accredited Systems Engineer (ASE)	Total Questions:	56

Question: 1
A company is using 802.1X authentication with dynamic VLANs on its wired network. The company has three user groups that are assigned to VLANs 10, 20, and 30. You are deploying an Enterprise Mobility Solution with an MSM760 Access Controller and 50 APs. On the MSM Controller, you have configured a VSC that enforces 802.1X authentication. How do you continue to create a consistent experience for users on wired and wireless connections?

A. Bind the VSC to the APs' group with VLANs 10, 20, and 30 as egress VLANs.
B. Enable the dynamic VLANs option in the VSC, and bind the VSC to the APs' group.
C. Configure VLANs 10, 20 and 30 on the MSM APs' bridge ports, and tag the MSM APs' switch ports for each VLAN.
D. Bind the VSC to the APs' group, and tag the MSM APs' switch ports for VLANs 10, 20, and 30.

Answer: D

Question: 2
You are implementing a public access solution on the MSM Controller because your company wants to grant visitors access to the internet. The company has only two VLANs: VLANs 1 for users and VLAN 2 for servers. VLAN 2 also includes the internet connection. You connect the MSM APs and the MSM Controller's LAN port to VLAN 1 and the controller's internet port to VLAN 2. You must protect the company's workstations on VLAN 1 from unauthorized access by unauthenticated guests. What must you do no the MSM Controller?

A. Create an unauthenticated user ACL that prohibits access to all of the VLANs except the controller.
B. On the VSC for guests, enable the option that terminates WPA at the controller.
C. On the VSC for guests, enable the wireless security filter that limits wireless traffic to the controller.
D. Add an entry to the default site ACL that prohibits access to all of the VLANs except the controller.

Answer: C

Question: 3
What is a potential risk of enabling the RSSI-based classification feature in an Authorized WLAN policy?

A. RF Manager might classify your own APs as Rogue APs because their transmit power is too high and take action against them.
B. RF Manager must rely exclusively on RSSI to detect harmful devices? Locations, instead of drawing on network detectors' findings. This might make the prediction less accurate.
C. RF Manager might classify legitimate APs owned by nearby companies as Rogue APs and take action against them.
D. Sensors might decide that they should not take action against a potentially harmful device because its RSSI is low and the device might still be a risk.

Answer: C

Question: 4
Which devices provide the data integrity and privacy that create a trusted network infrastructure in an Enterprise Mobility Solution?

A. RF Manager and sensors.
B. RF Planner and sensors
C. MSM Controllers and APs

D. MSM Controllers and identity Driven Manager (IDM)

Answer: C

Question: 5
You must implement access control for your wireless users on a solution-wide level. You have decided on the access control strategy recommended for guests and have already begun to customize public access settings. Which option must you select in the VSC for these users?

A. Use service controller for: access control (centralized access control)
B. Client data tunnel
C. 802.1x authentication
D. Wireless protection set to WPA

Answer: A

Question: 6
You are setting up an RF Manager solution for a university that is implementing a new wireless network. Hackers have tried to compromise the wired network, and you expect attacks to increase exponentially when the university implements its wireless network. When you configure the intrusion protection setting, you want to ensure that the sensors can protect against threats on three channels at a time. Which intrusion protection setting would you select?

A. Block
B. Disrupt
C. Interrupt
D. Disconnect

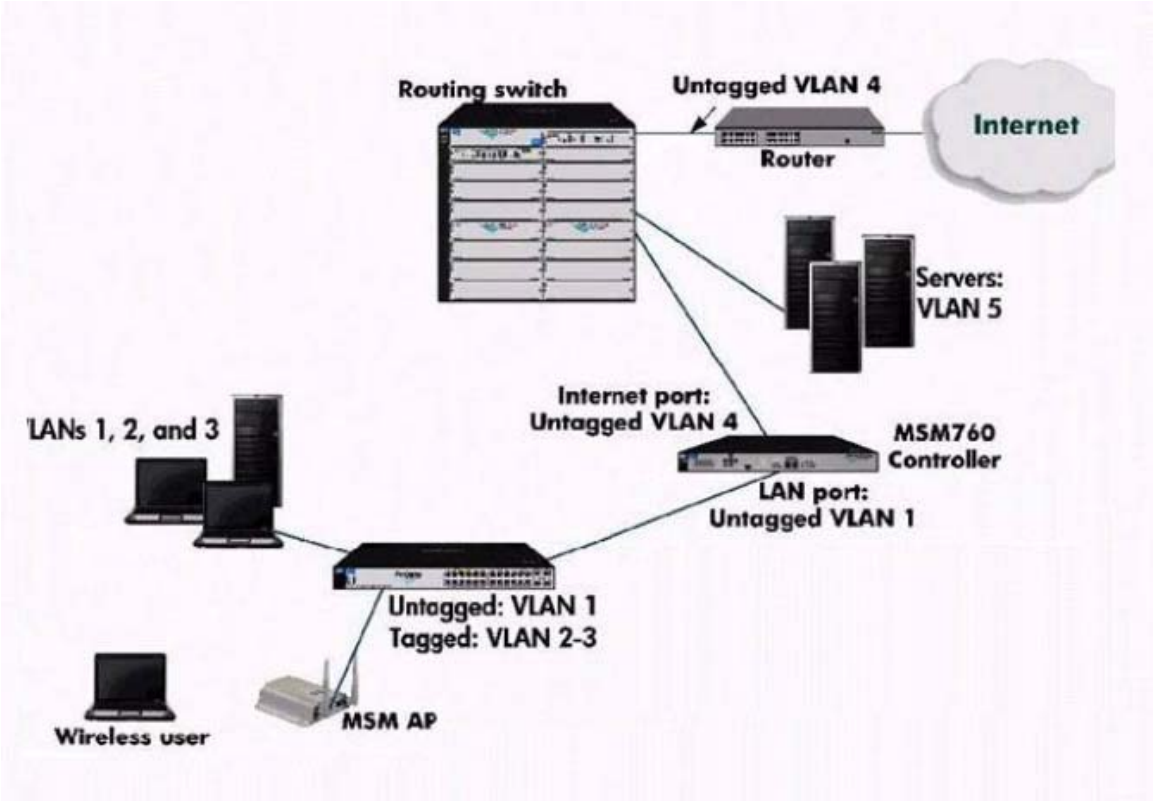
Answer: C

Question: 7
You are deploying an Enterprise Mobility Solution for a company that is concerned about employees picking up viruses on their laptops and the introducing those viruses into the network when they connect wirelessly. To deal with this issue, you are planning to deploy IDM and Windows Access Protection (NAP) as an endpoint integrity solution. Which method of implementing access control on the VSC provides the best option to meet this requirement?

A. Public access control.
B. Centralized access control.
C. 802.1X-based access control.
D. Health-based access control.

Answer: C

Question: 8
Click the Exhibit button.



A wireless user associates with a VSC. The following settings are configured on the VSC:
Use Ser ice Controller for Authentication = Enabled
Use Ser ice Controller for Access control = Enabled
VSC ingress mapping=SSID
Client data tunnel=Disabled
Wireless security filters=Disabled
HTML authentication= Enabled
VSC egress mapping=Default
In the VSC binding for the group to which the users' AP belong, there is no egress VLAN setting. The network topology is shown in the exhibit. Which resources are available to the guest before the guest logs in and becomes an authorized user?

A. Resources available on the public internet.
B. Resources available on the public internet and in vlan 1.
C. Resources in vlans 1, 2, and 3.
D. Resources in vlan 1 only.

Answer: D

Question: 9
Wireless stations in a VSC run voice applications (among other applications). You want voice traffic to be prioritized as it travels from the AP to the wireless stations. What is needed to meet this requirement? (select two.)

A. The VSC priority mechanism must be set to VSC very High.
B. WMM adevertising must be enabled on the VSC.
C. The VSC priority mechanism must be set to IP QoS.
D. An IP QoS profile must select the voice traffic and set it to Very High.

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of Professional & Certified Experts available via support.
- Free 90 days updates to match real exam scenarios.
- Instant Download Access! No Setup required.
- Price as low as $19, which is 80% more cost effective than others.
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (Android, iPhone, iPod, iPad)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- ***Guaranteed Success***.
- **Fast**, helpful support 24x7.
