HP0-Y33

HP
Implementing HP Wireless Networks

The HP0-Y33 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The HP0-Y33 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The HP0-Y33 exam is very challenging, but with our HP0-Y33 questions and answers practice exam, you can feel confident in obtaining your success on the HP0-Y33 exam on your FIRST TRY!

HP HP0-Y33 Exam Features

  - Detailed questions and answers for HP0-Y33 exam
  - Try a demo before buying any HP exam
  - HP0-Y33 questions and answers, updated regularly
  - Verified HP0-Y33 answers by Experts and bear almost 100% accuracy
  - HP0-Y33 tested and verified before publishing
  - HP0-Y33 examcollection vce questions with exhibits
  - HP0-Y33 same questions as real exam with multiple choice options

Acquiring HP certifications are becoming a huge task in the field of I.T. More over these exams like HP0-Y33 exam are now continuously updating and accepting this challenge is itself a task. This HP0-Y33 test is an important part of HP certifications. We have the resources to prepare you for this. The HP0-Y33 exam is essential and core part of HP certifications and once you clear the exam you will be able to solve the real life problems yourself.Want to take advantage of the Real HP0-Y33 Test and save time and money while developing your skills to pass your HP HP0-Y33 Exam? Let us help you climb that ladder of success and pass your HP0-Y33 now!

QUESTION: 1
which feature should you enable to enhance Layer 2 (L2) roaming?

A. seamless roaming
B. rapid authentication
C. WPA2 Opportunistic Key Caching
D. single network AP hopping

Answer: C

QUESTION: 2
Click the Exhibit button.

```
vlan 10                                  interface GigabitEthernet1/0/1
#                                          port link-type trunk
wlan service-template 1 clear              port trunk permit vlan 10
 ssid guest                                port trunk pvid vlan 10
 bind WLAN-ESS 1                         #
 service-template enable                 interface WLAN-ESS1
#                                        #
interface Vlan-interface1                wlan ap ap1 model WA2620E-AGN
 ip address 192.168.0.100 255.255.255.0   serial-id 210235A42MB09A000141
#                                          radio 1
interface Vlan-interface10                 channel 149
 ip address 10.1.10.1 255.255.255.0        max-power 10
#                                          service-template 1
                                           radio enable
                                           radio 2
                                         #
```

You have deployed a guest wireless service in the reception area of a marketing firm. The clients associated with the guest service should be assigned to VLAN 10. When you test the configuration, clients are being assigned IP addresses in the 192.168.0.0 subnet. You view the access controller configuration shown in the exhibit. Which command resolves the issue by correctly associating VLAN 10 with the appropriate interface?

A. [sysname-wlan-st-1] port access vlan 10
B. [sysname-WLAN-ESS1] port access vlan 10
C. [sysname-GigabitEthernet1/0/1] port access vlan 10
D. [sysname-Vlan-interface10] port access vlan 10

Answer: B

QUESTION: 3

A financial institution needs to deploy 80 access points in their new building. Since the institution is not interested in purchasing additional wired switches for their LAN infrastructure, which solution should be recommended to manage the access points?

A. HP A3000-24G-PoE+ Wireless Switch
B. HP A-WX5002 Access Controller
C. HP A-WX5004 Access Controller
D. HP A7500/E7900 Access Controller Module

Answer: C

QUESTION: 4

What is the maximum number of E-MSM controllers that can be configured into a single team?

A. 1
B. 2
C. 3
D. 4
E. 5

Answer: E

QUESTION: 5

What are the major benefits of creating a team of controllers? (Select two.)

A. controller redundancy
B. Flow support
C. local DHCP support
D. PPTP client and server support
E. single IP management of all team controllers

Answer: A, E

QUESTION: 6

In your existing wireless network you have a variety of E-MSM controllers. Which products are capable of supporting teaming? (Select two.)

A. E-MSM710
B. E-MSM730
C. E-MSM750
D. E-MSM760
E. E-MSM765zl

Answer: D, E

QUESTION: 7
Your controller's Team Manager has suffered a catastrophic failure and an Interim Manager has been selected. Which action is required to allow the Interim Manager to distribute a new software release to its team members?

A. The Interim Manager is promoted to Team Manager status.
B. The Interim Manager is rebooted and reconfigured as the new Team Manager.
C. The Interim Manager promotes another team member to Team Manager and the new TeamManager uploads the new software to the team members.
D. Each Team Member is manually upgraded from the Interim Manager.

Answer: A

QUESTION: 8
After completing the configuration and synchronization of all team members, you discover through your initial testing that your APs cannot associate with your team controllers. To solve this problem what should you check?

A. that your VSC DHCP parameters are set correctly
B. that you have enabled your local DHCP server on your Team Manager (controller)
C. that an external DHCP server exists and is operational on your network
D. that DHCP Relay has been configured on all your team members (controllers)

Answer: C

QUESTION: 9
When would the IP address of the Internet port on an MSM controller be set to "No Address"?

A. when NAT is enabled

B. when only authenticated traffic is passing through the Internet port
C. when NAT is disabled
D. when only VLAN traffic is passing through the Internet port

Answer: D

QUESTION: 10
In order to create a new VLAN in an MSM controller configuration, which path should you take to access the correct screen?

A. VSCs>[select a VSC]>VSC Profile
B. VSCs>VSC bindings>VLANs
C. Controller>Management>VLANs
D. Controller>Network>Ports

Answer: D

QUESTION: 11
An HP E-MSM760 Controller receives untagged traffic on its LAN port from a wireless client associated with an access point from another manufacturer. In a WLAN configured with VSCs 1-4, which VSC will be selected to pass this traffic?

A. VSC 2
B. VSC 3
C. VSC 4
D. default VSC

Answer: D

QUESTION: 12
When Centralized Access Control is configured as Automatic, when is a user data tunnel created?

A. when more than one controller is on the network that has the same access control configuration
B. when tunnels are manually configured and available
C. when IPSec is set up between two controllers
D. when a synchronized AP and its controller are on different subnets

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of Professional & Certified Experts available via support.
- Free 90 days updates to match real exam scenarios.
- Instant Download Access! No Setup required.
- Price as low as $19, which is 80% more cost effective than others.
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (Android, iPhone, iPod, iPad)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- *Guaranteed Success*.
- **Fast**, helpful support 24x7.
