HP2-T25

HP

Servicing HP Rack-Tower Server Solutions

The HP2-T25 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The HP2-T25 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The HP2-T25 exam is very challenging, but with our HP2-T25 questions and answers practice exam, you can feel confident in obtaining your success on the HP2-T25 exam on your FIRST TRY!

HP HP2-T25 Exam Features

- Detailed questions and answers for HP2-T25 exam
- Try a demo before buying any HP exam
- HP2-T25 questions and answers, updated regularly
- Verified HP2-T25 answers by Experts and bear almost 100% accuracy
- HP2-T25 tested and verified before publishing
- HP2-T25 examcollection vce questions with exhibits
- HP2-T25 same questions as real exam with multiple choice options

Acquiring HP certifications are becoming a huge task in the field of I.T. More over these exams like HP2-T25 exam are now continuously updating and accepting this challenge is itself a task. This HP2-T25 test is an important part of HP certifications. We have the resources to prepare you for this. The HP2-T25 exam is essential and core part of HP certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real HP2-T25 Test and save time and money while developing your skills to pass your HP HP2-T25 Exam? Let us help you climb that ladder of success and pass your HP2-T25 now!

QUESTION: 1

What does adding the battery or flash backed cache upgrade NOT enable?

- A. RAID 60 migration
- B. array expansion
- C. logical drive extension
- D. stripe size migration

Answer: A

QUESTION: 2

An engineer needs to add two Extended Runtime Modules (ERM) on an existing HP R7000 UPS. How does the engineer need to configure the R7000 UPS with the extra available battery runtime?

- A. In HP Power Manager, log on and click on the Setup tab to update the number of ERMs.
- B. In HP Power Protector, log on and click on the R7000. Configure the power source and update the number of ERMs.
- C. Use the OCP of the R7000 and configure the R7000 with two extra ERMs.
- D. Connect the sense and ERM cable from the first ERM to the UPS and from the second ERM to the first ERM. The R7000 will update the number of ERMs automatically.

Answer: D

QUESTION: 3

HOTSPOT

A customer does not want to wait long for a rebuild of a failed drive, but also does not want a high system performance penalty.

Low
Medium
High

A customer wants to minimize the time that the drive array is in degraded state.

Low
Medium
High

A rebuild of a failed drive may not impact the system performance.

Low
Medium
High

Match each Smart Array controller rebuild rate with its description.

- A. A customer does not want to wait long for a rebuild of a failed drive, but also does not want a high system performance penalty = Medium
- B. A customer want to minimize the time that the drive array is in degraded state = High
- C. A rebuild of a failed drive may not impact the system performance = Low

Answer: Pending. Please put your suggestions to support@ipass4sure.com

QUESTION: 4

HOTSPOT

Indicate whether each listed component requires downtime during the DL380p G8 upgrade process.

memory	Requires downtime Does not require downtime
power supply module	Requires downtime Does not require downtime
CPU	Requires downtime Does not require downtime
hard disk	Requires downtime Does not require downtime
FC HBA	Requires downtime Does not require downtime

- A. Memory : Requires Downtime
- B. Power Supply Module : Requires Downtime
- C. CPU : Requires Downtime
- D. Hard Disk : Does Not Require Downtime
- E. FC HBA : Requires Downtime

Answer: Pending. Please put your suggestions to support@ipass4sure.com

Explanation:

Double Check Power Supply Module

QUESTION: 5

What are the upgrade options on HP FlexLOM? (Select two.)

- A. 100Mb/s
- B. 1 Gb/s
- C. 10 Gb/s
- D. 100 Gb/s

Answer: B, C

QUESTION: 6

An engineer is replacing components in a ProLiant server. When should an ESD strap be used?

- A. An ESD only needs to be used when working in moist environments.
- B. An ESD strap needs to be used when working on uncarpeted floors.
- C. An ESD strap is only needed when static electricity is felt.
- D. An ESD strap is not needed since ESD protection is built into the components.
- E. An ESD must always be used when replacing components.

Answer: E

QUESTION: 7

HOTSPOT

Match each ProLiant RBSU setting with its description.

When a POST alarm occurs, the ProLiant may not boot until verified by a system operator.	<input type="checkbox"/> Enable <input type="checkbox"/> Delay <input type="checkbox"/> Disable
When a POST alarm occurs, the ProLiant must be up and running as fast as possible.	<input type="checkbox"/> Enable <input type="checkbox"/> Delay <input type="checkbox"/> Disable
When a POST alarm occurs, the ProLiant must boot by itself, but a system operator monitoring the startup must be able to read the console screen.	<input type="checkbox"/> Enable <input type="checkbox"/> Delay <input type="checkbox"/> Disable

- A. When a POST alarm occurs, the ProLiant may not boot until verified by a system operator = Enable
- B. When a POST alarm occurs, the ProLiant must be up and running as fast as possible = Disable

C. When a POST alarm occurs, the ProLiant must boot by itself, but a system operator monitoring the startup must be able to read the console screen = Delayed

Answer: Pending. Please put your suggestions to support@ipass4sure.com
