I40-420

IFPUG

Certified Function Point Specialist

<http://www.ipass4sure.com/exams.asp?examcode=I40-420>

The I40-420 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The I40-420 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The I40-420 exam is very challenging, but with our I40-420 questions and answers practice exam, you can feel confident in obtaining your success on the I40-420 exam on your FIRST TRY!

IFPUG I40-420 Exam Features

- Detailed questions and answers for I40-420 exam
- Try a demo before buying any IFPUG exam
- I40-420 questions and answers, updated regularly
- Verified I40-420 answers by Experts and bear almost 100% accuracy
- I40-420 tested and verified before publishing
- I40-420 examcollection vce questions with exhibits
- I40-420 same questions as real exam with multiple choice options

Acquiring IFPUG certifications are becoming a huge task in the field of I.T. More over these exams like I40-420 exam are now continuously updating and accepting this challenge is itself a task. This I40-420 test is an important part of IFPUG certifications. We have the resources to prepare you for this. The I40-420 exam is essential and core part of IFPUG certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real I40-420 Test and save time and money while developing your skills to pass your IFPUG I40-420 Exam? Let us help you climb that ladder of success and pass your I40-420 now!

QUESTION: 1

When counting DETs which of the following rules apply?

- A. Count a DET for each recursive field on the ILF or EIF
- B. Count a DET for each piece of data in an ILF or EIF required by the user to establish a relationship with another ILF or EIF
- C. Count a DET for each repeating field that is identical in format
- D. Count a DET for each field that appears more than once in an ILF or EIF

Answer: B

QUESTION: 2

Which of the following is an attribute used to represent relationships of one entity to another?

- A. Primary key
- B. Secondary key
- C. Foreign key
- D. Domestic key

Answer: C

QUESTION: 3

Which category (ies) of data entities is (are) usually identified to satisfy the Functional User Requirements?

- A. Business data
- B. Reference data
- C. Code data
- D. Both A and B

Answer: D

QUESTION: 4

What is a (are) valid example(s) of code data?

- A. Substitution data
- B. Static data
- C. Valid values
- D. All of the above

Answer: D

QUESTION: 5

What is a user identifiable group of logically related data or control information referenced by the application, but maintained within the boundary of another application?

- A. An ILF
- B. An IIF
- C. An EIF
- D. An ELF

Answer: C

QUESTION: 6

Which of the following is NOT an example of the purpose of a function point count?

- A. To enable comparison of functionality delivered by two applications
- B. To determine maintenance support cost per function point
- C. To understand the percentage of lines of code that is being reused across three different applications
- D. To determine the effort and duration of a development project

Answer: C

QUESTION: 7

Which of the following statements regarding the counting scope is true?

- A. It defines the set of Functional User Requirements to be included in the FP count
- B. It always includes more than one application
- C. It determines the purpose of the applications being counted
- D. It defines a (sub) set of the modules being sized

Answer: A

QUESTION: 8

Which of the following is NOT true of a boundary?

- A. It encloses the logical data maintained by the application
- B. It is the physical interface between the software under study and its users
- C. It is dependent on the user's external business view of the application and is independent of technical and/or implementation considerations
- D. It defines what is external to the application

Answer: B

QUESTION: 9

An example of the purpose of an FP count is to provide:

- A. input to the estimation process needed to determine the level of effort to develop the first release of an application
- B. a comparison of functionality delivered by two different suppliers' packages
- C. determine the size of an application as part of the organization's effort to determine the size of its software portfolio
- D. All of the above

Answer: D

QUESTION: 10

Which of the following defines the purpose of a count?

- A. Provides an answer to a business question, and it is the business question that determines the purpose
- B. Influences the positioning of the application between the software under review and the surrounding software
- C. Influences the type of FP count to answer the business problem under investigation
- D. Provides an input to the estimation process needed to determine the level of effort required to develop the first release of an application

Answer: A

QUESTION: 11

Which of the following statements about an External Input is true?

- A. Has the primary intent to maintain one or more ILFs
- B. An elementary process to hold data or control information from outside the boundary
- C. Has the primary intent to alter the behavior of a transaction
- D. Has the primary intent to reference one or more EIFs
