JN0-201

Juniper

Juniper Networks Certified Internet Associate

<http://www.ipass4sure.com/exams.asp?examcode=JN0-201>

The JN0-201 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The JN0-201 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The JN0-201 exam is very challenging, but with our JN0-201 questions and answers practice exam, you can feel confident in obtaining your success on the JN0-201 exam on your FIRST TRY!

Juniper JN0-201 Exam Features

- Detailed questions and answers for JN0-201 exam
- Try a demo before buying any Juniper exam
- JN0-201 questions and answers, updated regularly
- Verified JN0-201 answers by Experts and bear almost 100% accuracy
- JN0-201 tested and verified before publishing
- JN0-201 examcollection vce questions with exhibits
- JN0-201 same questions as real exam with multiple choice options

Acquiring Juniper certifications are becoming a huge task in the field of I.T. More over these exams like JN0-201 exam are now continuously updating and accepting this challenge is itself a task. This JN0-201 test is an important part of Juniper certifications. We have the resources to prepare you for this. The JN0-201 exam is essential and core part of Juniper certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real JN0-201 Test and save time and money while developing your skills to pass your Juniper JN0-201 Exam? Let us help you climb that ladder of success and pass your JN0-201 now!

QUESTION 1:

Which two statements are true concerning the JUNOS software? (Choose two.)

- A. Processes are tightly integrated with each other.
- B. Processes are fully independent from each other.
- C. Processes run in a protected memory environment.
- D. Processes may fail and cause a failure of the entire system.

Answer: B, C

From Juniper.com, Benefits of the JUNOS operating system: Each user process runs in its own protected memory space. This ensures that the failure of one subsystem will not negatively impact the operation of other subsystems executing over the operating system.

QUESTION 2:

Which boot device contains the primary copy of the JUNOS software?

- A. hard drive
- B. floppy drive
- C. PCMCIA flash
- D. internal flash drive

Answer: D

The router stores bootable copies of the JUNOS software in three possible locations: the internal flash disk, the hard drive, or the removable media. The primary boot location is the internal flash disk. The hard drive is the secondary boot location, while the removable media is used for disaster-recovery purposes.

QUESTION 3:

Which path will a packet follow within a Juniper Networks router after it enters an interface and before a forwarding table lookup is performed?

- A. PIC I/O Manager, Buffer Manager, I/O Manager, Internet Processor
- B. PIC I/O Manager, Buffer Manager, Internet Processor, I/O Manager
- C. PIC I/O Manager, I/O Manager, Buffer Manager, Internet Processor
- D. PIC I/O Manager, I/O Manager, Internet Processor, Buffer Manager

Answer: C

When a data packet arrives on an interface, the PIC I/O Manager performs error-checking, then transmits the packet to the I/O Manager. The I/O Manager removes the layer 2 header and segments the packet into 64-byte J-cells. It then sends those J-cells to the Inbound Distributed Buffer Manager. The Buffer Manager then sends a notification cell to the Internet Processor, which performs a forwarding table lookup.

QUESTION 4:

Given the following configuration:

```
interfaces {
  so-0/0/0 {
    unit 0 {
      family inet {
        address 10.10.10.1/24;
      }
    }
  }
  so-0/0/1 {
    unit 0
    family inet {
      address 20.20.20.1/24;
    }
  }
  lo0 {
    unit 0 {
      family inet {
        address 192.168.1.1/32;
      }
    }
  }
}
```

Which is considered an exception packet?

- A. IP packet addressed to 10.100.100.10
- B. IP packet with the Router Alert option set
- C. ICMP traceroute packet with TTL set to 5
- D. ICMP echo request addressed to 172.16.1.1

Answer: B

The PFE can't process some data packets in its normal fashion. These packets are referred to as exception packets. Examples of exception packets are: Routing protocol updates, Packets addressed to the router, Packets requiring generation of ICMP error messages, or Packets containing an IP Options field.

Answer B is correct because an IP Option field is set in the packet. A,C, and D are all examples of packets that are be forwarded through the router as none of them are destined for the router or require special attention.

QUESTION 5:

From within the [edit] portion of the configuration, which command restores the

JN0-201

number 2 rollback file?

- A. rollback 2
- B. run rollback 2
- C. request system rollback 2
- D. run request system rollback 2

Answer: A

The JUNOS software saves up to nine previous configuration files. The most recent config file is called juniper.conf.1.gz and is number 1. The naming convention continues with each older file incrementing by 1. You restore a config file with the rollback command and the number of the config file to restore. Rollback is a configuration mode command not an operation mode command, so within [edit] it is not necessary to precede the command with the command "run".

QUESTION 6:

A network administrator would like to verify the active alarms on the interface so-0/0/0.0. Which command displays this information?

- A. show alarms
- B. show interfaces terse
- C. show alarms extensive
- D. show interfaces extensive

Answer: D

The "show interfaces extensive" command displays all possible information about every interface including active alarms and any error conditions.

QUESTION 7:

Which ASIC is responsible for segmenting a packet into 64-byte J-Cells?

- A. PIC I/O ASIC
- B. I/O Manager ASIC
- C. Buffer Manager ASIC
- D. Internet Processor ASIC

Answer: B

The I/O Manager ASIC removes the layer 2 header and segments the packet into 64-byte J-cells.

QUESTION 8:

During the boot sequence of the JUNOS software, which device is consulted first, by default?

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
