**Question: 1**

In the WebUI, which method will determine if a Cluster target host is available?

- A. Click Statistics > Cluster Groups
- B. Click Dashboard > Cluster group name
- C. Click Services > Cluster Groups
- D. Click Log > Audit

**Answer: B**

**Question: 2**

When running SSL on a non-web application, where are the secure connections made?

- A. between the client and the DX appliance and between the DX appliance and the target servers
- B. directly between the client and the target server(s)
- C. between the client and the DX appliance
- D. between the DX appliance and the target server(s)

**Answer: C**

**Question: 3**

Which statement is true about "sticky" load balancing for Clusters?

- A. The "clientip" setting does not apply to clusters, it only pertains to a Forwarder.
- B. When set to "clientip" it uses the client's IP address to bind the client to a particular target server.
- C. When set to "clientip" it ensures that all subsequent requests are directed to the same client that made the initial request.
- D. When set to "clientip" it allows a DX sticky cookie to be sent to and stored by the client based on the IP address.

**Answer: B**

**Question: 4**

Which two are initial configuration steps using the console? (Choose two.)

- A. Enable HTTPS for WebUI access.
- B. Agree to the license.
- C. Configure fully-qualified domain name.
- D. Configure console port parameters.

**Answer: B, C**

**Question: 5**

Which system elements are exported when using the system snapshot feature?

- A. ts dump, tcp dump, current debug and memory states
- B. current memory states
- C. system process data, system logs, system debug statistics and system passkeys
- D. system software, users, configuration, licenses, app rules, SSL certificates and keys

**Answer: D**

**Question: 6**

Which two benefits does the Juniper DX provide? (Choose two.)

- A. It offloads TCP connections from servers.
- B. It spools email messages.
- C. It offloads SSL from servers.
- D. It compresses images.

**Answer: A, C**

**Question: 7**

Which AppRule type is used to configure 3G caching?

- A. PTH
- B. RS
- C. RTH
- D. PTC

**Answer: A**

**Question: 8**

In which section of the WebUI does the administrator create and apply AppRules?

- A. SLB
- B. Cluster
- C. Forwarder
- D. Redirector

**Answer: B**

**Question: 9**

Which CLI command is used for analysis and troubleshooting of real time traffic capture?

- A. tcpdump
- B. show server stats
- C. tsdump
- D. vmstat

**Answer: A**

**Question: 10**

Which HTTP return code should be verified when configuring the cache?

- A. 302
- B. 200
- C. 304
- D. 501

**Answer: B**

**Question: 11**

Which steps are required to use the Juniper DXs ActiveN functionality?

- A. Enable DSR for your cluster, create ActiveN blades, create ActiveN groups and add blades, enable ActiveN, synchronize configuration.
- B. Disable DSR for your cluster, create ActiveN blades, create ActiveN groups and add blades, enable ActiveN, synchronize configuration.

- C. Enable DSR for your cluster, create ActiveN blades, create ActiveN groups and add blades, select ActiveN load balancing policy, enable sticky.
- D. Disable DSR for your cluster, create ActiveN blades, create ActiveN groups and add blades, select ActiveN load balancing policy, enable sticky.

**Answer: A**

**Question: 12**

An enterprise has an internal web application that needs stickiness managed by a Cluster. All employees access the application through a proxy. What is the correct sticky load balancing policy?

- A. url persistency
- B. cookie persistency
- C. urlhash
- D. default persistency

**Answer: B**

**Question: 13**

A health care organization has a Juniper DX placed in front of a web server. They currently have listen-side SSL enabled to encrypt traffic from the client to the DX appliance. Due to privacy concerns, they have decided to enable SSL from the client to the server for end-to-end SSL. Which two steps are required to enable end-to-end encryption? (Choose two).

- A. Disable client-side SSL on the DX and enable Unified SSL.
- B. Enable target-side SSL on the DX.
- C. Configure a Redirector on the DX to redirect browsers to the HTTPS port.
- D. Enable SSL on the web server.

**Answer: B, D**

**Question: 14**
