- A. NSF file
- B. WSDL file
- C. Web service
- D. Action button

Answer: B

Question: 3

Judi is creating a Notes composite application. Her main view has a column called Nationality, and it is a property of her composite application. Where will she find the property attribute for that column?

- A. In the Shared Code area, under WSDL files
- B. In the Shared Resources area, under WSDL file
- C. In the Composite Applications area, under Applications
- D. In the View Column properties box, final tab under the Composite Settings area

Answer: D

Question: 4

Erin has been asked to add a new component, called "Tag Cloud", to his composite application. The component is being provided via components.nsf (based on the updatesite.ntf template). How should Erin proceed in adding this component to his application?

- A. Right-click the Component Palette in the Composite Application Editor. Select Add Components > Add NSF Component.
- B. Right-click the Component Palette in the Composite Application Editor. Select Add Components > Add Components from Update Site.
- C. Open the Plug-ins view in components.nsf in the Notes client. Select Tag Cloud Plug-in, and click the Import Database view action button.
- D. Open the Components view in components.nsf in the Notes client. Select the Tag Cloud component, and click the Import Database view action button.

Answer: B

Question: 5

If you export Wiring properties from a Notes database in Domino designer, what gets exported to a file?

Exam Name:	Lotus Notes Domino 8 Developing Composite Applications		
Exam Type:	IBM	Exam Code:	LOT-838
Certification	IBM Lotus Application Developer	Total Questions:	100

- A. A WSDL file describing the Wiring properties
- B. A file in proprietary Notes rich text format
- C. A DXL file representing the Wiring Properties
- D. A binary file that can only be used for import to another Notes database

Answer: A

Question: 6

Paul has added an NSF View component to his composite application, but when it displays it shows both the View and the list of folders and views in the database to the left of the View. How can he display just the view?

- A. Add "&HideNavigator" to the end of the Notes URL in the View's NSF Component Properties.
- B. Select the Hide Navigator box in the Advanced tab of the View Properties in Domino Designer.
- C. Add an Advanced Property to the View's NSF component called "com.ibm.notes.view.hideNavigator" and set its value to "true".
- D. Right-click the View Component in the Composite Application Editor and select the Hide Navigator option in the drop-down menu.

Answer: A

Question: 7

Francie has developed a Component Palette in one of her composite applications that will be a good match for a new composite application that she is developing. How can she reuse that palette?

- A. Use the DXLExporter and DXLImporter functions to move the component palette between applications.
- B. Copy and paste the palette elements from the original composite application to the new composite application.
- C. Select the original composite application palette from within the new Composite Application Editor's Copy From menu option.
- D. Export the existing Component Palette from the original application, and then import the Component Palette into the new application.

Answer: D

Question: 8

Jacques is creating a composite application to integrate multiple components. He has his newly created application open in the Composite Application Editor, and sees two of the components that he needs listed in the right pane. What does Jacques need to do to incorporate these components into his composite application?
