<b>Exam Name:</b>	<b>Lotus Notes Domino 8.5 Application Development Intermediate Skills</b>		
<b>Exam Type:</b>	<b>IBM</b>	<b>Exam Code:</b>	<b>LOT-953</b>
<b>Certification:</b>	<b>IBM Lotus</b>	<b>Total Questions:</b>	<b>170</b>

**Question: 1**

Rudi wants to have a document sent to predefined users after the document is completed. The completion of a document can be done by several people. How would he best do this?

- A. Use the PostSave event to send the document.
- B. Select the "Present mail send dialog" in the Document properties.
- C. Check in the Query Save event if the document is completed, and then use document.send to send the document.
- D. Display a box to the user stating that they can use the "Mail forward" icon after they are finished with the document, to forward the information to the next user.

**Answer: C**

**Question: 2**

Yolanda has built the XPages for the sales application. The functionality is working properly, and it is now time to apply the corporate branding. Yolanda has read that XPages can use themes and CSS for affecting the appearance of the UI. What is a distinction between themes and CSS?

- A. Themes are set at the server level to control one, many, or all XML properties of all XPages running on the server. One must use CSS to customize the UI of specific applications.
- B. Themes and CSS each can control all of the same items. The difference is that themes can be used to apply to some or all applications on a server, while CSS is application-specific.
- C. Themes can be used to control any XML properties of any XPages running on the server, including CSS style properties. Themes are different from style sheets in that they are not restricted to CSS styles.
- D. CSS is used to control the presentation of data - such properties as color, font, and positioning. Themes cannot manage the same items as CSS, but themes can be used to control functional properties such as the number of displayed view rows.

**Answer: C**

**Question: 3**

Araceli is creating a profile document in the SalesOrder database to allow the sales managers to control various application settings. Araceli has created the DB Profile form with the needed fields. How can she create the profile document?

- A. Create a view action button with the formula: @Command([EditProfileDocument]; "DB Profile"). Use a hide formula to expose the button only to the sales managers.
- B. Create a view action button with the formula: @Command([CreateProfileDocument]; "DB Profile"). Use a hide formula to expose the button only to the sales managers.
- C. From the Security tab of the Form properties, select the SalesManagers group under "Who can create documents with this form". A sales manager will then use the Create menu to create the document.
- D. Create a view with a selection formula of: SELECT Form = "DB Profile". From the Security tab of the View properties, select the SalesManagers group under "Who may use this view". Create a view action button with the formula: @Command([CreateProfileDocument]; "DB Profile").

**Answer: A**

**Question: 4**

Andre is using mail encryption on documents that are being routed to other members of his team. Which one of the following keys is used to decrypt the documents?

- A. Andre's private key

<b>Exam Name:</b>	<b>Lotus Notes Domino 8.5 Application Development Intermediate Skills</b>		
<b>Exam Type:</b>	<b>IBM</b>	<b>Exam Code:</b>	<b>LOT-953</b>
<b>Certification:</b>	<b>IBM Lotus</b>	<b>Total Questions:</b>	<b>170</b>

- B. Server's private key
- C. Recipient's public key
- D. Recipient's private key

**Answer: D**

**Question: 5**

Heike has replaced the old navigator in her application. She has added new navigation using an outline, a page, frames, and a frameset. What does Heike need to do to get the frameset to display when the application is opened?

- A. Set the application launch property for "Open designated Page". Set the Name parameter to the name of the page that contains the frameset.
- B. Select the "Set as default" option for the outline, the page, and the frameset.
- C. Set the application launch property for "Open designated Frameset". Set the Name parameter to the name of the frameset.
- D. Select Other > Application Resources from within Domino Designer. Set the "Open first" parameter to the name of the frameset.

**Answer: C**

**Question: 6**

Sam supports the Sales application Sales.nsf. This application resides on a Domino server, on which DECS is installed. To ensure that Sam's form will connect to inventory data from an external data source, he must do which one of the following?

- A. Define a field on the form to map to the external data
- B. Specify the default metadata object in form properties
- C. Enable the "Allow external data access" database property
- D. Include the reserved DataOptions field on his form, with a value of 1

**Answer: A**

**Question: 7**

Keiko is designing EmpSurvey.nsf, an employee survey application. The application needs to be able to receive emailed documents. Which one of the following does Keiko need to do?

- A. Create a mail-in database document in the Domino directory.
- B. Open the application properties and select "Enable as mail-in application".
- C. Create MailInDb document in DOMCFG.NSF, being sure to set "Mailbox" to "EmpSurvey.nsf".
- D. Create a mapping in the Domino directory to associate EmpSurvey.nsf with a mail server.

**Answer: A**

**Question: 8**

The XYZ Company has offices in many different countries. There is a single Inventory database, replicated to a server in each country. Users connect to the server associated with the country in which they work. Each product document includes a multivalue field named Country, indicating the country or countries in which the product is available. How can Drew ensure that for products available for sale within that country?

- A. From the Security tab of the properties on each country's replica database, select Restricted replication. Select Restrict by formula. Enter a replication formula of: SELECT @IsMember("COUNTRY\_NAME"; Country).
