LOT-985

IBM

Developing IBM Lotus Notes and Domino 8.5 Applications

<http://www.ipass4sure.com/exams.asp?examcode=LOT-985>

The LOT-985 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The LOT-985 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The LOT-985 exam is very challenging, but with our LOT-985 questions and answers practice exam, you can feel confident in obtaining your success on the LOT-985 exam on your FIRST TRY!

IBM LOT-985 Exam Features

- Detailed questions and answers for LOT-985 exam
- Try a demo before buying any IBM exam
- LOT-985 questions and answers, updated regularly
- Verified LOT-985 answers by Experts and bear almost 100% accuracy
- LOT-985 tested and verified before publishing
- LOT-985 examcollection vce questions with exhibits
- LOT-985 same questions as real exam with multiple choice options

Acquiring IBM certifications are becoming a huge task in the field of I.T. More over these exams like LOT-985 exam are now continuously updating and accepting this challenge is itself a task. This LOT-985 test is an important part of IBM certifications. We have the resources to prepare you for this. The LOT-985 exam is essential and core part of IBM certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real LOT-985 Test and save time and money while developing your skills to pass your IBM LOT-985 Exam? Let us help you climb that ladder of success and pass your LOT-985 now!

QUESTION: 1

Daniel is designing a Suggestions application and wants to minimize replication conflicts. Which one of the following will accomplish this?

- A. Assign users Editor access to the database. Create a form of type Document and name the form "Suggestion". Create a form of type Comment and name the form "Comments". Use Authors fields on both forms.
- B. Assign users Author access to the database. Create a form of type Document and name the form "Suggestion". Create a form of type Comment and name the form "Comments". Use Readers fields on both forms.
- C. Assign users Author access to the database. Create a form of type Document and name the form "Suggestion". Create a form of type Response and name the form "Comments". Use Authors fields on both forms.
- D. Assign users Editor access to the database. Create a form of type Document and name the form "Suggestion". Create a form of type Response and name the form "Comments". Use Readers fields on both forms.

Answer: C

QUESTION: 2

Mac is planning a Change Control application that will be used by thousands of staff located in 10 different countries. What is one thing Mac can do to help optimize the performance of the application for his users?

- A. On the Advanced tab of Database properties, enable "Support specialized response hierarchy" and enable "Allow simple search"
- B. On the Advanced tab of Database properties, enable "Don't support specialized response hierarchy" and disable "Allow simple search"
- C. Use File > Application > New Copy to create a copy of the application on a server in each country, and have users access the application from a local server.
- D. Use File > Replication > New Replica to create a replica of the application on a server in each country, and have users access the application from a local server.

Answer: D

QUESTION: 3

Joe wants to display a company logo in the background of a view in his sales application. How can he do this?

- A. Use an Image Resource as the background graphic for the view
- B. Use a URL as the background graphic for the view, where the URL points to the logo
- C. Display the view in a frameset, and set the background of the view's frame to an Image Resource or URL depicting the logo
- D. He can't do this. Views cannot have background graphics.

Answer: A

QUESTION: 4

Kelly supports the Inventory application. This application is accessed by staff in India, the UK, Brazil, and the USA. For reasons of performance and contingency planning, the office in each country has its own server. Kelly needs the Inventory application to reside on each of these servers, and she needs to ensure that the application data and design is kept in sync among all of these locations. How can Kelly meet this requirement?

- A. Select the Inventory application. For each server, create a synchronized copy of the application by selecting File > Synchronization > New Copy.
- B. Select the Inventory application. For each server, create a mirror of the application by selecting File > Application > New Mirror, and specify the target Server.
- C. Select the Inventory application. For each server, create a replica of the application by selecting File > Replication > New Replica, and specify the target Server.
- D. Select the Inventory application. For each server, create a copy of the application by selecting File > Application > New Copy. Specify the target Server, and select the Synchronize option.

Answer: C

QUESTION: 5

Hassan has been emailed a spreadsheet with information about new training opportunities at his company. He has been asked to update the company's Announcements application with a link that, when clicked, will open the spreadsheet. How can Hassan accomplish this?

- A. Import the presentation as a new File Resource, assigning an alias of "New Training". Add a new entry to the application outline, selecting Action as the Content Type, and setting the Content Value to @Command([OpenResource]; "New Training").

B. Embed the presentation on a new page, setting the page Auto Launch property to First OLE Object. Add a new entry to the application outline, selecting Named Element as the Content Type and selecting the new page as the Content Value.

C. Attach the presentation on the About application document. Set the database launch property to launch the first attachment in the About database. Add a new entry to the application outline, selecting Action as the Content Type and setting the Content Value to @Command([HelpAboutDatabase]).

D. Import the presentation as a new Image Resource, retaining the filename extension as part of the resource name. Add a new entry to the application outline, selecting Named Element as the Content Type and selecting the new image resource as the Content Value.

Answer: B

QUESTION: 6

Richard's form includes a field that causes a document to be mailed when the document is saved. Which of the following is the reserved field name that Richard assigned to the field?

- A. MailSend
- B. ForceMail
- C. SaveOptions
- D. MailOptions

Answer: D

QUESTION: 7

Donna created a full-text index for the PerformanceReview database, and she was careful to select the "Index encrypted fields" option. But the HR managers, who all have the secret key that they use to encrypt the data, have reported that their search results are not yielding the expected results. What is one possible reason for this?

- A. The full-text index was created with an id that did not include an encryption key capable of decrypting fields before indexing.
- B. The "Index encrypted fields" setting applies only to documents added after the full-text index is created or to documents edited and saved after the index is created.
- C. The "Index encrypted fields" setting enables the indexing. The next step before creating the index is to designate the specific encrypted fields that are to be indexed.

D. Encrypted fields can be indexed only from a database replica residing on the administration server as specified on the Advanced tab of the database ACL. Donna had indexed the database on the application server.

Answer: A

QUESTION: 8

Marcello wants to create a custom startup page for his customer database, using different buttons and values from profile and normal documents. How can he achieve this?

- A. Create an outline with calculated entries, and display this directly through a frameset.
- B. Create a view with custom actions that calculate what actions the user might want to take.
- C. Create a page with calculated text and actions, and display this using a frameset. Create a frameset, and display that page with dynamic text.
- D. Create a form and use action buttons, only calculated for display fields and computed text to display all available options to this specific user. Set the database properties to start with a doclink in the about database document to any document created with this form.

Answer: D

QUESTION: 9

In the past, Lloyd has copied an existing application if he needed to create a new application. This time, however, Lloyd wants to create a new application on his own hard drive, and he does not want the application to include any design elements from existing applications. How can he do this?

- A. From the menu bar, select File > Application > New. Specify "_blank.nsf" for the new application's filename.
- B. From the menu bar, select File > Application > New. Leave the Server option set to "Local", and ensure that the Template option is set to "-Blank-".
- C. From the menu bar, select File > Application > New. Leave the Server option set to "Local", and specify "_blank.nsf" for the new application's filename.
- D. From the menu bar, Select File > Application > New. Set the Server option to "Local", and specify "_blank.nsf" for the new application's filename. Ensure that the Template option is set to "-Default-".

Answer: B

QUESTION: 10

Management has asked Bob to post an introductory Welcome page when Notes users first open the Video application. In which one of the following places should Bob put the Welcome message?

- A. In a document named \$Welcome
- B. In the application About Document
- C. In the application Using Document
- D. In the first Page in the application design

Answer: B

QUESTION: 11

Bernhard is having trouble with an application, and he wants to allow users to save their work while they are editing. What does he need to do?

- A. Select the "Allow Auto Save" in the document properties
- B. Select the "Autosave document" in the document properties
- C. Nothing; Notes autosaves any document in Edit mode in Notes 8.5 by default
- D. Create a timerevent, and save the document periodically through UiDocument.Save

Answer: A

QUESTION: 12

Herman has created a new design for his Video application. He would like to post the design to the server and make it available so other applications can automatically inherit the design changes when the DESIGN server tasks runs. Which one of the following should Herman to do make the new design available on the development server?

- A. Copy the application to the development server, name it "newvideo.ntf", and select "Update on DESIGN task" in the application Design properties.
- B. Copy the application to the development server, name it "newvideo.ntf", and select "Allow inheritance" in the application Design properties.
- C. Copy the application to the development server, name it "newvideo.ntf", select "Inherit design from master template", and give it a template name in the application Design properties.
