Question: 1

You have created a Microsoft Excel spreadsheet which you would like to launch from within Headquarters Manager. How can you configure this?

- A. Copy the Excel file to a directory where you will store all add-ins. Edit the add-ins path in the RMSHQ.ini file.
- B. Copy the necessary Excel file to a directory where you will store all add-ins. In Headquarters Administrator, configure the path to the folder in the Headquarters Configuration window.
- C. All third-party files and add-ins must be located in the folder where the Headquarters application files were installed; no configuration is necessary.
- D. None of the above; Headquarters Manager does not have the ability to launch other application's files.

Answer: B

Question: 2

You currently have one store running Store Operations and are implementing Headquarters. You plan to have Global Customers within the Headquarters enterprise. What should you do to mark the existing customers as global in the existing Store Operations database?

- A. At the store, mark the "Enable global customers for multi-store" Configuration option
- B. At the store, mark the "New customers default as global customers" Configuration option
- C. Set up the Global Customer Account Options in Headquarters Manager
- D. Run a Transact-SQL (T-SQL) statement to update the customers' "Customer is a global/enterprise customer" option

Answer: D

Question: 3

You have multiple stores using Store Operations. You have recently purchased Headquarters to consolidate your enterprise data. Which method should you perform to create the Headquarters database which will contains the stores' items and suppliers?

- A. Create a blank Headquarters database using the RMSHQdb.bck file; then manually create records for each item and supplier using Headquarters Manager.
- B. Import the records from one of the store's Store Operations databases into the head office database. Then, in Headquarters Manager, manually create records for each of the other store's items and suppliers.
- C. Import the records from one of the store's Store Operations databases into the head office database. Then, in Headquarters Administrator, use the Import Store Operations command for each of the other store's databases.
- D. Create a 'master' store database by importing each of the store's records into one Store Operations database. Then, in Headquarters Administrator, import the master store database using the Import Store Operations command.

Answer: D

Question: 4

Headquarters licenses are sold by which entity?

- A. Register
- B. User
- C. Store
- D. Server

Answer: C

Question: 5

What information is required when configuring Headquarters Client?

- A. The name of the Store Operations database at the local store
- B. The name of the Headquarters database at the head office
- C. The network address of the machine that is running Headquarters Server
- D. The system administrator user and password for the SQL server where the HQ database is installed at the Headquarters location

Answer: A, C

Question: 6

What is the default Headquarters Manager username and password?

- A. User: sa / Password: password
- B. User: admin / Password: [blank]
- C. User: sa / Password: [blank]
- D. User: administrator / Password: password

Answer: D

Question: 7

When using global customers, which type of information is NOT available at all of the stores in the enterprise?

- A. The customer's entire purchase history
- B. The customer's account balance
- C. The customer's account type
- D. The customer's credit limit

Answer: A

Question: 8

Which file should be used to create an empty Retail Management System Headquarters database?

- A. rmshqdb.bck
- B. rmshqsampl.bck
- C. rmsstore1.bck
- D. rmshqexample.bck

Answer: A

Question: 9

Which operation should be performed in Headquarters Administrator if you feel the tables and indexes are unsynchronized resulting in slow database performance?

- A. Reindex
- B. Change Collation
- C. Upgrade
- D. Check

Answer: A

Question: 10

Which application should you install at each retail store in your enterprise environment that is responsible for initiating the scheduled and/or manual connections to the head office location?

- A. Headquarters Administrator
- B. Headquarters Client
- C. Headquarters Server
- D. Headquarters Manager

Answer: B

Question: 11

Which Headquarters application should you install and configure at the head office that listens for incoming connections and acts as a gateway for exchanging data between the stores and the head office?

- A. Headquarters Administrator
- B. Headquarters Client
- C. Headquarters Server
- D. Headquarters Manager

Answer: C

Question: 12

Which of the following wizards creates a new Store Operations database and copies centrally maintained data from Headquarters into it?

- A. New Store Wizard
- B. Export Database Wizard
- C. New Item Wizard
- D. Inventory Wizard

Answer: B

Question: 13

Consider the following scenario:

You have three stores and a head office.

At the head office, you have two machines; one machine is the database server and is named HQDATA. The other machine is the communications server, where Headquarters Server is installed and is named HQSERVER.

At one of the stores in the enterprise, you have three machines; one machine is the database server and is named SODATA. Another machine acts as a register as well as the Headquarters Client machine; its name is SOREG1. The last machine acts as a register only; its name is SOREG2.

You wish to allow each of your stores to perform store quantity checks (check the quantity available of an item at another store). What should you enter as the Address in the HQ Client tab in Store Operations Administrator if you are configuring the SOREG2 machine?

- A. HQSERVER
- B. HQDATA
- C. SODATA
