NR0-017

TeraData

Teradata Masters Update V2R5

<http://www.ipass4sure.com/exams.asp?examcode=NR0-017>

The NR0-017 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The NR0-017 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The NR0-017 exam is very challenging, but with our NR0-017 questions and answers practice exam, you can feel confident in obtaining your success on the NR0-017 exam on your FIRST TRY!

TeraData NR0-017 Exam Features

- Detailed questions and answers for NR0-017 exam
- Try a demo before buying any TeraData exam
- NR0-017 questions and answers, updated regularly
- Verified NR0-017 answers by Experts and bear almost 100% accuracy
- NR0-017 tested and verified before publishing
- NR0-017 examcollection vce questions with exhibits
- NR0-017 same questions as real exam with multiple choice options

Acquiring TeraData certifications are becoming a huge task in the field of I.T. More over these exams like NR0-017 exam are now continuously updating and accepting this challenge is itself a task. This NR0-017 test is an important part of TeraData certifications. We have the resources to prepare you for this. The NR0-017 exam is essential and core part of TeraData certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real NR0-017 Test and save time and money while developing your skills to pass your TeraData NR0-017 Exam? Let us help you climb that ladder of success and pass your NR0-017 now!

QUESTION 1

In a two clique Teradata system, data is hashed across all AMPs? (Choose two)

- A. clique
- B. cluster
- C. disk array
- D. system

Answer: D

QUESTION 2

A Unique Primary Index (UPI) is chosen for which three reasons? (Choose three)

- A. A UPI guarantees even data distribution
- B. A UPI is the Primary Key of the table
- C. A UPI access is a one AMP operation
- D. A UPI requires no duplicate row checking during loads

Answer: A,C,D

QUESTION 3

Which of the following are three tools and utilities that is part of the Teradata Analyst suite? (Choose three)

- A. Priority Scheduler Facility
- B. Teradata Dynamic Query Manager
- C. Teradata index Wizard
- D. Query Capture Database
- E. Teradata System Emulation Tool

Answer: C,D,E

QUESTION 4

Which two statements concerning Failback are true? (Choose two)

- A. Failback does not require additional disk space
- B. Failback can be specified at the table level
- C. Failback is associated with AMP cluster
- D. Failback is a data protection scheme that uses cliques

Answer: B,C

QUESTION 5

Which of the following are two architectural attributes of a Teradata system? (Choose two.)

[NR0-017](#)

- A. Disk space associated with an AMP is divided into three areas: system, permanent, and spool.
- B. Parallelism is achieved through operating system time slicing.
- C. The AMPs access data from their associated vdisks as required.
- D. The PEs communicate with the AMPs across the BYNET.

Answer: C,D

QUESTION 6

In the TERADATA RDBMS, what are three accessible types of indexes? (Choose three)

- A. join index
- B. Hash index
- C. Value Ordered index
- D. Primary key index

Answer: A,B,C

QUESTION 7

Which is the component that limits queries based on set thresholds?

- A. Teradata SQL Assistant
- B. BTEQ
- C. Teradata Manager
- D. TDQM

Answer: D

QUESTION 8

Which of the following are two advantages of a centrally located logical architecture? (Choose two)

- A. provides a single view of the business
- B. provides departmental data control
- C. reduces departmental politics
- D. minimizes synchronization

Answer: A,D

QUESTION 9

Which of the following are two features of transient journaling that guarantees data integrity? (Choose two)

- A. It is automatic
- B. After images of changed rows are captured

[NR0-017](#)

- C. Transient Journal rows are deleted by a restart
- D. Data is returned to its original state after transaction failure

Answer: A,D

QUESTION 10

Which of the following is a statement that is true regarding temporary space?

- A. Temporary space is spool space currently not used.
- B. Temporary space is permanent space currently not used.
- C. Temporary space is subtracted from SysAdmin.
- D. Temporary space is assigned at the table level.

Answer: B

QUESTION 11

Which two of the following statements are NOT true regarding RAID 5 protection?
(Choose two)

- A. Missing blocks of data can be reconstructed
- B. A disk failure does not affect performance
- C. RAID 5 has a higher space penalty than RAID 1.
- D. Data and parity are striped across an rnk of disks.

Answer: B,C

QUESTION 12

Of the following, which two are attributes of a Teradata warehouse? (Choose two.)

- A. Customer applications drive the processes.
- B. Relational databases are more flexible than other types.
- C. Businesses are able to quickly respond to changing conditions.
- D. It is built to reflect business application models.

Answer: B,C

QUESTION 13

Which of the following three statements are accurate concerning Partitioned Primary indexes (PPI)? (Choose three)

- A. To store rows using PPI you specify partitioning in the CREATE TABL statement
- B. They reduce the number of rows processed by using partition elimination
- C. PPI is beneficial in queries specifying range constraints.
- D. PPI is used to enhance performance against small tables

Answer: A,B,C

QUESTION 14

Which two of the following statements regarding a Primary Index are accurate? (Choose two.)

- A. A Primary Index is a physical mechanism.
- B. There is a limit to the number of columns in a Primary Index.
- C. A Primary Index requires uniqueness.
- D. A Primary Index value can not be null.

Answer: A,B

QUESTION 15

Which are two accurate statements pertaining to job responsibilities of the Teradata DBA? (Choose two)

- A. Physical partitioning of disk space is not required.
- B. Range distribution must be used to analyze data distribution
- C. All related data can be placed in a single physical partition
- D. reorganizations are not required

Answer: A,D

QUESTION 16

Which three of the following are features of a Teradata RDBMS? (Choose three)

- A. Is founded on mathematical Set Theory
- B. Models the business
- C. Models the process
- D. Is easy to understand
- E. Is application driven

Answer: A,B,D

QUESTION 17

What can a logical data mart be defined as?

- A. a physical part of the operational data stores
- B. a separate structure of the data warehouse
- C. a data load from a data warehouse
- D. an existing part of the data warehouse

Answer: D

QUESTION 18

Which task is performed by the Teradata Index Wizard?

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
