QUESTION: 1
Which of the following statements regarding SSO and SAP Logon Tickets are true? Note:
There are 3 correct answers to this question.

A. Users have the same user ID and password in all of the systems they access using SAP
Logon Tickets.
B. The end users' Web browsers accept cookies (SAP GUI not in use).
C. The clocks for the accepting systems are synchronized with the ticket-issuing system.
D. The SSO ticket is issued after successful login to the SAP NetWeaver AS Java.
E. The cookie is stored in the temporary folder of the local GUI.

Answer: B, C, D

QUESTION: 2
Which of the following authentication mechanisms are available for SAP NetWeaver AS
Java? Note: There are 3 correct answers to this question.

A. Security session IDs for Single Sign-On between applications
B. SAP Logon Tickets for Single Sign-On
C. SAML Assertions for Single Sign-On
D. Web Dynpro for Single Sign-On
E. Kerberos Authentication for Single Sign-On

Answer: A, B, C

QUESTION: 3
Which of the following authentication mechanisms is not accepted by SAP NetWeaver
Portal 7.0?

A. SAML Assertions
B. User ID / password
C. X.509 client certificates
D. SNC based authentication
E. Web Access Management (WAM) products

Answer: D

QUESTION: 4
A customer uses an LDAP (Lightweight Directory Access Protocol) enabled directory
server. To simplify the administration of SAP users, Central User Administration (CUA)

was introduced. Now there are plans to synchronize the LDAP enabled directory server with the CUA . Which of the following statements are true? Note: There are 2 correct answers to this question.

A. The SAP user field: BNAME is already a standard for most of the LDAP enabled directory server. Therefore the field mappings can be easily customized.
B. The synchronization of fields can be controlled via a mapping transaction in SAP ABAP.
C. A prerequisite for the communication between the CUA and the LDAP enabled directory server is to open the LDAP(s) port in the firewall environment, if a firewall is used.
D. The communication between LDAP and the CUA is based on PI 7.1. Therefore, SAP specific PI adapter ports must be open in the firewall environment.
E. A SAPROUTER must be used to establish the proper connection between the SAP CUA and the LDAP provider.

Answer: B, C

QUESTION: 5
Which of the following statements regarding load balancers are true? Note: There are 2 correct answers to this question.

A. With a reverse proxy, you can route incoming requests to different services based on the URL path.
B. The SAP Web Dispatcher is a full-fledged reverse proxy.
C. The SAP Web Dispatcher uses SAP Logon Groups in Enterprise Portal scenarios.
D. You can administer the SAP Web Dispatcher using transaction: WEBDISP.
E. You can combine the SAP Web Dispatcher and web switches in the demilitarized zone (DMZ).

Answer: A, E

QUESTION: 6
Which of the following statements regarding the SAP Security Optimization Service are true? Note: There are 2 correct answers to this question.

A. It is a local service offered by the SAP Solution Manager.
B. The service can be performed at any time.
C. All checks are automated for the service.
D. The service focuses on internal and external system security.

Answer: B, D

QUESTION: 7

Which areas in the SAP environment does the SAP Security Optimization Self Service check?

A. SAPouttab (SAPRouter)
B. WGate and AGate configuration (SAP ITS)
C. SSL check for the SAP J2EE Engine
D. Customized settings in the NW AS ABAP environment

Answer: C

QUESTION: 8

Which of the following considerations are important if a customer plans to use the Internet Connection Manager (ICM) in SAP NetWeaver AS 7.0, together with Microsoft Internet Explorer? Note: There are 2 correct answers to this question.

A. The use of the TCP/IP ports must be agreed with the security/network department.
B. The location of the SAP NetWeaver AS 7.0 within the network topology must be agreed with the network department.
C. The SAP Gateway Port 3300 must be taken into consideration for the ICM.

Answer: A, B

QUESTION: 9

When you use the Central User Administration (CUA), when will your changes to user data become effective in the child systems? Please also consider the options that the Application Link Enabling technology (ALE) offers. Note: There are 2 correct answers to this question.

A. Changes are replicated immediately.
B. The changes can be replicated by the background job "CUA_Distribute" in the central system.
C. The IDocs that transport the changes to the user master data in the child systems can be collected and transferred at a later time, triggered by a background job.
D. The changes can be replicated by selecting the button "Distribute all data" in transaction SCUA.
E. The data for CUA will be replicated to the child systems every 60 minutes if no other setting/configuration overrides this default value.

Answer: A, C

QUESTION: 10
The SAP Web dispatcher gets information about the application servers and groups required for load distribution from the message server and application servers. HTTP is used for this communication. You want to change this communication to HTTPS. Which of the following statements are true? Note: There are 3 correct answers to this question.

A. The SAP Web Dispatcher must be set up for Secure Socket Layer (SSL).
B. The message server must be set up for Secure Socket Layer (SSL).
C. The internal group: !DIAGS must be empty.
D. The SAP Web Dispatcher must be able to accept the server certificates from the message server.

Answer: A, B, D

QUESTION: 11
When is it acceptable not to take action on an identified risk?

A. Never. Good security has to address and reduce all risks.
B. When political issues prevent this type of risk from being addressed.
C. When the necessary countermeasure is too complex.
D. When the cost of the countermeasure outweighs the value of the asset and the potential loss.

Answer: D

QUESTION: 12
After the installation of SAP Web Dispatcher you want to create additional users to administer SAP Web Dispatcher. Where are these users stored?

A. In the table USR02 in AS ABAP.
B. In the local database of SAP Web Dispatcher.
C. In the filesystem.
D. In the table WEBDISP_USER in AS Java.

Answer: C

QUESTION: 13
Which of the following is a characteristic of the Segregation of Duties (SOD) principle?
Note: There are 2 correct answers to this question.
