S90-01A

SOA

Fundamental SOA & Service-Oriented Computing

The S90-01A practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The S90-01A Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The S90-01A exam is very challenging, but with our S90-01A questions and answers practice exam, you can feel confident in obtaining your success on the S90-01A exam on your FIRST TRY!

SOA S90-01A Exam Features

- Detailed questions and answers for S90-01A exam
- Try a demo before buying any SOA exam
- S90-01A questions and answers, updated regularly
- Verified S90-01A answers by Experts and bear almost 100% accuracy
- S90-01A tested and verified before publishing
- S90-01A examcollection vce questions with exhibits
- S90-01A same questions as real exam with multiple choice options

Acquiring SOA certifications are becoming a huge task in the field of I.T. More over these exams like S90-01A exam are now continuously updating and accepting this challenge is itself a task. This S90-01A test is an important part of SOA certifications. We have the resources to prepare you for this. The S90-01A exam is essential and core part of SOA certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real S90-01A Test and save time and money while developing your skills to pass your SOA S90-01A Exam? Let us help you climb that ladder of success and pass your S90-01A now!

QUESTION: 1

Which of the following statements does not make sense?

- A. Intrinsic interoperability is important because it helps increase the quantity of integration projects that may be required to accommodate new business requirements, thereby fostering agility.
- B. Intrinsic interoperability is important because it enables services to exchange data without having to resort to transformation technologies.
- C. Intrinsic interoperability is important because it is fundamental to enabling services to be repeatedly composed.
- D. Intrinsic interoperability is important because one of the goals of service-oriented computing is to increase intrinsic interoperability.

Answer: A

QUESTION: 2

Which of the following statements is true?

- A. To apply service-orientation requires the use of Web services.
- B. Web services are required in order to build service-oriented solutions.
- C. When discussing SOA and service-oriented computing, the term "Web service" must always be synonymous with (have the same meaning as) the term "service".
- D. None of these statements are true.

Answer: D

QUESTION: 3

Which of the following statements is true?

- A. "Contract first" design is important to SOA because it makes you think about service contract design options at the same time that you are building the underlying service logic.
- B. "Contract first" design is important to SOA because it forces you to establish standardized service contracts prior to the development of the underlying service logic.
- C. "Contract first" design is important to SOA because without a contract, services cannot be invoked. However, there is no preference as to when, during the service delivery lifecycle, the contract should be designed or established.
- D. "Contract first" design is an unproven design technique that is not commonly employed when delivering service-oriented solutions and is therefore not considered important to SOA.

Answer: B

QUESTION: 4

Which of the following statements is false?

- A. A service is a unit of logic to which service-orientation has been applied to a meaningful extent.
- B. Services are designed to increase the need for integration.
- C. Services are the fundamental building blocks of service-oriented solutions.
- D. A service composition is comprised of services.

Answer: B

QUESTION: 5

Which of the following statements accurately describes the strategic benefit of Increased Federation?

- A. A target state whereby all services are always consistently delivered as Web services.
- B. A target state in which the entire enterprise has been successfully service-oriented.
- C. A target state whereby the enterprise has adopted SOA by replacing all legacy environments with custom-developed services.
- D. A target state whereby standardized service contracts have been established to express a consistent and unified service endpoint layer.

Answer: D

QUESTION: 6

In order to achieve _____ we have traditionally required _____ projects. With service-orientation, we aim to establish an intrinsic level of _____ within each service so as to reduce the need for _____ effort.

- A. vendor diversity, integration, vendor diversity, design
- B. agility, development, scalability, development
- C. interoperability, integration, interoperability, integration
- D. autonomy, integration, statelessness, integration

Answer: C

QUESTION: 7

Below are four statements about business and technology alignment, as it pertains to service-oriented computing. Which of these statements is false?

- A. Business and technology alignment represents the extent to which an IT enterprise and its automated systems can mirror and evolve in alignment with the business.
- B. Service-oriented computing promotes the abstraction and accurate encapsulation and expression of business logic in services. This supports business and technology alignment.
- C. The pursuit of business and technology alignment can be supported by the collaboration of business analysts and technology experts during analysis and modeling phases.
- D. In order for an IT enterprise to increase business and technology alignment, its business analysts must become more technical and assume the responsibilities of technology experts so that they can independently design quality business services that take both business and technology considerations into account.

Answer: D

QUESTION: 8

Which of the following is not a benefit of maintaining a vendor-neutral and business-driven context for a service-oriented architecture?

- A. Establish a technology architecture with a fixed scope and purpose that remains unchanged, regardless of how the business may need to change over time.
- B. Avoid establishing a technology architecture that will need to be replaced in the near future when it no longer adequately fulfills business requirements.
- C. Leverage new technological innovation in order to maximize the fulfillment of business requirements.
- D. Establish a technology architecture that can stay in alignment with how the business may need to change over time.

Answer: A

QUESTION: 9

Which of the following statements is false?

- A. The design standardization of service contracts helps increase interoperability between services.
- B. Design standardization can introduce organizational and cultural challenges because it requires that the design standards be regularly enforced.

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
