S90-19A

SOA

Advanced SOA Security

<http://www.ipass4sure.com/exams.asp?examcode=S90-19A>

The S90-19A practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The S90-19A Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The S90-19A exam is very challenging, but with our S90-19A questions and answers practice exam, you can feel confident in obtaining your success on the S90-19A exam on your FIRST TRY!

SOA S90-19A Exam Features

- Detailed questions and answers for S90-19A exam
- Try a demo before buying any SOA exam
- S90-19A questions and answers, updated regularly
- Verified S90-19A answers by Experts and bear almost 100% accuracy
- S90-19A tested and verified before publishing
- S90-19A examcollection vce questions with exhibits
- S90-19A same questions as real exam with multiple choice options

Acquiring SOA certifications are becoming a huge task in the field of I.T. More over these exams like S90-19A exam are now continuously updating and accepting this challenge is itself a task. This S90-19A test is an important part of SOA certifications. We have the resources to prepare you for this. The S90-19A exam is essential and core part of SOA certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real S90-19A Test and save time and money while developing your skills to pass your SOA S90-19A Exam? Let us help you climb that ladder of success and pass your S90-19A now!

QUESTION: 1

Which of the following types of attack always affect the availability of a service?

- A. Exception generation attack
- B. SQL injection attack
- C. XPath injection attack
- D. None of the above

Answer: D

QUESTION: 2

The use of XML schemas for data validation helps avoid several types of data-centric threats.

- A. True
- B. False

Answer: A

QUESTION: 3

The use of session keys and symmetric cryptography results in:

- A. Increased performance degradation
- B. Increased reliability degradation
- C. Reduced message sizes
- D. None of the above

Answer: D

QUESTION: 4

An alternative to using a _____ is to use a _____.

- A. Public key, private key
- B. Digital signature, symmetric key
- C. Public key, key agreement security session
- D. Digital signature, asymmetric key

Answer: C

QUESTION: 5

Service A's logic has been implemented using managed code. An attacker sends an XML bomb to Service A. As a result, Service A's memory consumption started increasing at an alarming rate and then decreased back to normal. The service was not affected by this attack and quickly recovered. Which of the following attacks were potentially avoided?

- A. XML parser attack
- B. Buffer overrun attack
- C. Insufficient authorization attack
- D. Denial of service

Answer: A, D

QUESTION: 6

When designing XML schemas to avoid data-centric threats, which of the following are valid considerations?

- A. The maxOccurs attribute needs to be specified using a restrictive value.
- B. The <xsd:any> element needs to be avoided.
- C. The <xsd:restriction> element can be used to create more restrictive user-defined simple types.
- D. All of the above.

Answer: B, D

QUESTION: 7

_____ is an industry standard that describes mechanisms for issuing, validating, renewing and cancelling security tokens.

- A. WS-Security
- B. WS-Trust
- C. WS-SecureConversation
- D. WS-Security Policy

Answer: B

QUESTION: 8

Security policies defined using WS-SecurityPolicy can be used to convey which of the following requirements to a service consumer?

- A. Whether transport-layer or message-layer security needs to be used
- B. The encryption type that needs to be used for transport-layer security
- C. The algorithms that need to be used for cryptographic operations
- D. The type of security token that must be used

Answer: A, C, D

QUESTION: 9

Service A needs to be designed so that it supports message integrity and so that only part of the messages exchanged by the service are encrypted. You are asked to create the security policy for this service. What type of policy assertions should you use?

- A. Token assertions
- B. Protection assertions
- C. Security binding assertions
- D. Service A's security requirements cannot be expressed in a policy

Answer: B

QUESTION: 10

How can the use of pre-compiled XPath expressions help avoid attacks?

- A. Pre-compiled XPath expressions execute faster and therefore help avoid denial of service attacks.
- B. Pre-compiled XPath expressions reduce the chance of missing escape characters, which helps avoid XPath injection attacks
- C. Pre-compiled XPath expressions contain no white space, which helps avoid buffer overrun attacks
- D. They can't because XPath expressions cannot be pre-compiled

Answer: B

QUESTION: 11

The Service Perimeter Guard pattern has been applied to help avoid denial of service attacks for a service inventory. As a result, services within the service inventory are only accessible via a perimeter service. However, denial of service attacks continue to succeed and services within the service inventory become unavailable to external service consumers. What is the likely cause of this?

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
