ST0-91X

Symantec

Symantec NetBackup 7.0 for UNIX (STS)

<http://www.ipass4sure.com/exams.asp?examcode=ST0-91X>

The ST0-91X practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The ST0-91X Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The ST0-91X exam is very challenging, but with our ST0-91X questions and answers practice exam, you can feel confident in obtaining your success on the ST0-91X exam on your FIRST TRY!

Symantec ST0-91X Exam Features

- Detailed questions and answers for ST0-91X exam
- Try a demo before buying any Symantec exam
- ST0-91X questions and answers, updated regularly
- Verified ST0-91X answers by Experts and bear almost 100% accuracy
- ST0-91X tested and verified before publishing
- ST0-91X examcollection vce questions with exhibits
- ST0-91X same questions as real exam with multiple choice options

Acquiring Symantec certifications are becoming a huge task in the field of I.T. More over these exams like ST0-91X exam are now continuously updating and accepting this challenge is itself a task. This ST0-91X test is an important part of Symantec certifications. We have the resources to prepare you for this. The ST0-91X exam is essential and core part of Symantec certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real ST0-91X Test and save time and money while developing your skills to pass your Symantec ST0-91X Exam? Let us help you climb that ladder of success and pass your ST0-91X now!

QUESTION: 1

A company has just expanded the Symantec NetBackup 7.0 environment by adding an additional media server. What is the fastest way to update several hundred Symantec NetBackup clients with the new media server information?

- A. run the update_all_clients script
- B. run the add_media_server_on_clients script
- C. specify the new media server in the Backup, Archive, and Restore interface
- D. specify the new media server in the client properties

Answer: B

QUESTION: 2

A tape library had the robot firmware upgraded and now the robot is reading the barcodes with additional characters. What can be set so that Symantec NetBackup 7.0 uses the same characters as before the firmware upgrade occurred?

- A. Media ID generation
- B. Media ID display
- C. media type mapping
- D. barcode rules

Answer: A

QUESTION: 3

Which two media status designations are excluded in the count against maximum number of partially full media? (Select two.)

- A. Frozen
- B. Imported
- C. Active
- D. Available
- E. Inactive

Answer: A, B

QUESTION: 4

Five media servers are configured in a storage unit group and media server load balancing is configured. There are 20 backups currently running from ten clients across the LAN. A new backup is started. What is the first criteria Symantec NetBackup 7.0 uses to determine which media server to use for the backup?

- A. server rank, based on the Device Management Service
- B. the media server that has the most blank tapes assigned
- C. server rank, based on the media server performance
- D. the media server that has the most free disk space

Answer: C

QUESTION: 5

Some UNIX clients are being backed up using the policy type Standard using the directive ALL_LOCAL_DRIVES. The amount of data being backed up per client in each backup session is much larger than the data available on each client. Which change should the administrator make to avoid the local server data from being backed up repetitively?

- A. disable the attribute "Cross mount points"
- B. disable the attribute "Follow NFS"
- C. add the following entry to the file list "UNSET_ALL"
- D. disable the attribute "Collect true image restore information with move detection"

Answer: A

QUESTION: 6

A UNIX client has the following mount points defined:

/var

/usr

/opt

/home

A backup policy for this client has "Allow multiple data streams" enabled and contains a backup selections list with the ALL_LOCAL_DRIVES directive. It also contains an EXCLUDE list that excludes /home. What happens when this backup policy runs?

- A. The backup completes successfully.
- B. Backup jobs are created for all mount points except for /home.

- C. The backup job for /home is partially successful because /home is excluded.
- D. The backup job for /home fails because /home is excluded.

Answer: D

QUESTION: 7

In which two processes does Symantec NetBackup 7.0 rehydrate deduplicated data? (Select two.)

- A. Optimized duplication
- B. Duplicate copy to tape
- C. Restore to an OpenStorage device
- D. Replicated copy
- E. Restore to a client

Answer: B, E

QUESTION: 8

Which version of NetBackup client (at a minimum) is required to use Symantec NetBackup LiveUpdate?

- A. 6.0 GA
- B. 6.0 MP4
- C. 6.5 GA
- D. 7.0 GA

Answer: C

QUESTION: 9

An administrator is checking the status of a standalone drive in the Device Monitor. The Control column status is AVR and the Ready column status is No. What does this indicate?

- A. The drive is down.
- B. The drive is up and under operator control.
- C. The drive is up and it is empty.
- D. The drive is up, but the tape in the drive is busy.

Answer: C

QUESTION: 10

Which report shows how many volumes are at each retention level?

- A. Tape Summary
- B. Tape Logs
- C. Tape Contents
- D. Tape List

Answer: A

QUESTION: 11

A server's file system is corrupt and a restore is required. The system is being backed up using True Image Restore ("Collect true image restore information with move detection" is enabled on the policy).

The most recent backups of this file system are:

- Monday: A full backup
- Tuesday: A differential incremental backup
- Wednesday: A cumulative incremental backup
- Thursday: A differential incremental backup

What is the maximum number of backup images that will be used to restore all of the most recent data for this server?

- A. 1
- B. 2
- C. 3
- D. 4

Answer: C

QUESTION: 12

The Symantec NetBackup Startup and Shutdown commands on UNIX are "netbackup start" and "netbackup stop". What is the default installation directory in which these commands are found?

- A. /usr/opensv/NetBackup/bin
