TU0-001

TruSecure
TruSecure ICSA Certified Security Associate

http://www.ipass4sure.com/exams.asp?examcode=TU0-001

The TU0-001 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The TU0-001 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The TU0-001 exam is very challenging, but with our TU0-001 questions and answers practice exam, you can feel confident in obtaining your success on the TU0-001 exam on your FIRST TRY!

TruSecure TU0-001 Exam Features

- Detailed questions and answers for TU0-001 exam
- Try a demo before buying any TruSecure exam
- TU0-001 questions and answers, updated regularly
- Verified TU0-001 answers by Experts and bear almost 100% accuracy
- TU0-001 tested and verified before publishing
- TU0-001 examcollection vce questions with exhibits
- TU0-001 same questions as real exam with multiple choice options

Acquiring TruSecure certifications are becoming a huge task in the field of I.T. More over these exams like TU0-001 exam are now continuously updating and accepting this challenge is itself a task. This TU0-001 test is an important part of TruSecure certifications. We have the resources to prepare you for this. The TU0-001 exam is essential and core part of TruSecure certifications and once you clear the exam you will be able to solve the real life problems yourself.Want to take advantage of the Real TU0-001 Test and save time and money while developing your skills to pass your TruSecure TU0-001 Exam? Let us help you climb that ladder of success and pass your TU0-001 now!

QUESTION 1
Which two assurances does digitally signing a file or message provide? (choose two)

A. time stamping
B. data integrity
C. non-repudiation
D. confidentiality

Answer: B, C

Explanation:
When user A wants to digitally sign a message to provide non-repudiation and/or integrity, user A creates a message digest using a hashing algorithm and encrypts the hash using user A's private key.

QUESTION 2
What is the most significant problem solved by public-key cryptography?

A. key recovery
B. key exchange
C. key generation
D. key distribution

Answer: D

QUESTION 3
What is the weakest aspect of the DES cryptographic algorithm in protecting sensitive information?

A. The complexity of the algorithm makes it too slow for day-to day use.
B. Automated attacks at guessing all possible keys have been demonstrated.
C. The block size of the algorithm is too small to handle large amounts of data.
D. The source code of the algorithm is widely available and may prove to have flaws.

Answer: B

QUESTION 4
What are three functions performed by the IPSec protocol? (choose three)

A. providing encrypted tunnels between gateways
B. providing encrypted multicast traffic across enterprises
C. ensuring integrity of unencrypted data between routers
D. providing encrypted connections between workstations and servers

Answer: A,C,D

QUESTION 5

Which three are protocols or services used for authentication functions? (choose three)

A. NTP
B. PAP
C. CHAP
D. TAPI
E. RADIUS

Answer: A,B,C

QUESTION 6

Which two does the proxy service SOCKS Version 5 provide? (choose two)

A. keystroke logging
B. WINS name service
C. TCP-based services
D. Strong authentication schemes

Answer: A,B

QUESTION 7

Your Windows PCs rely on n Network Neighborhood to gain access to resources.
Your users are widely reporting resources missing.
What is likely the problem?

A. You are currently under a denial of service attack.
B. Your systems have been infected with a Trojan Horse.
C. Directed broadcasts have been disabled at your routers.
D. Updated internet firewall rules have prevented the NBT protocol.

Answer: C

QUESTION 8

From a network security standpoint, TFTP should be used_____

A. to authenticate to a Web server
B. whenever you need a simple file transfer mechanism
C. in place of FTP to provide better authentication and tracking
D. in a limited capacity with the least amount of privilege possible

Answer: D

QUESTION 9
It is most likely for unencrypted data to be sniffed across which connection?

A. dial-up
B. 802.11b
C. DSL/cable
D. Internet OC-3

Answer: B

QUESTION 10
What is true about removing command line tools on Web servers?

A. It limits footholds for an attacker
B. It is common in default installations
C. It is an example of security through obscurity
D. It reduces security because of fewer administrator tools

Answer: A

QUESTION 11
Which attack is made easier by poor TCP/IP implementations?

A. IP spoofing
B. Password guessing
C. Network PING sweeps
D. TCP sequence guessing

Answer: D

QUESTION 12
What is the most secure means of administering a router?

A. SSH
B. Telnet
C. Web GuI
D. Serial Connection

Answer: D

QUESTION 13
Echo and Chargen services are most often used for_____

A. measuring load on a local system
B. maliciously inducing stress on networks
C. creating L2 TP tunnels between networks

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of Professional & Certified Experts available via support.
- Free 90 days updates to match real exam scenarios.
- Instant Download Access! No Setup required.
- Price as low as $19, which is 80% more cost effective than others.
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (Android, iPhone, iPod, iPad)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- *Guaranteed Success*.
- **Fast**, helpful support 24x7.
