000-011

IBM

*IBM Tivoli Application Dependency and Discovery Manager
V7.1 Implementation*

<http://www.ipass4sure.com/exams.asp?examcode=000-011>

The 000-011 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 000-011 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 000-011 exam is very challenging, but with our 000-011 questions and answers practice exam, you can feel confident in obtaining your success on the 000-011 exam on your FIRST TRY!

IBM 000-011 Exam Features

- Detailed questions and answers for 000-011 exam
- Try a demo before buying any IBM exam
- 000-011 questions and answers, updated regularly
- Verified 000-011 answers by Experts and bear almost 100% accuracy
- 000-011 tested and verified before publishing
- 000-011 exam questions with exhibits
- 000-011 same questions as real exam with multiple choice options

Acquiring IBM certifications are becoming a huge task in the field of I.T. More over these exams like 000-011 exam are now continuously updating and accepting this challenge is itself a task. This 000-011 test is an important part of IBM certifications. We have the resources to prepare you for this. The 000-011 exam is essential and core part of IBM certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 000-011 Test and save time and money while developing your skills to pass your IBM 000-011 Exam? Let us help you climb that ladder of success and pass your 000-011 now!

Question: 1

How is a community string used by IBM Tivoli Application Dependency and Discovery Manager V7.1?

- A. To authenticate Apache servers
- B. As an access credential for SNMP devices
- C. To access only non-Cisco network devices
- D. As a base value to encrypt passwords in collation.properties

Answer: B

Question: 2

Data level security has been enabled on an IBM Tivoli Application Dependency and Discovery Manager V7.1 (TADDM) server. Access Collection 'AC1' contains all Linux Computer Systems. 'User1' has access to AC1 and AC2, an Access Collection of Oracle databases. A discovery finds new Linux computer systems. Which statement is true?

- A. User1 receives notification of the new Linux computer systems.
- B. AC1 is flagged and the administrator must reset the Access Collection.
- C. User1 will only see the details of the original set of Linux computer systems.
- D. User1 will see the details of both the original set of Linux computer systems and the newly discovered systems.

Answer: C

Question: 3

You suspect that an IBM Tivoli Application Dependency and Discovery Manager V7.1 process is having memory problems. Which action should be taken first to determine if the application has failed because of an out of memory condition?

- A. Check the log/services/core.log file
- B. Check for core.<pid> files in the bin directory
- C. Check the core.XXX.XXX.XXX.dmp files found in the log directory
- D. Check the service log file of the service suspected of running out of memory

Answer: B

Question: 4

Which api command is used to delete all configuration items from the IBM Tivoli Application Dependency and Discovery Manager V7.1 topology?

- A. api.sh -u <userid> -p <password> delete all
- B. api.sh -u <userid> -p <password> topology clear
- C. api.sh -u <userid> -p <password> topology delete all
- D. api.sh -u <userid> -p <password> collation topology all

Answer: B

Question: 5

Which log settings are available in IBM Tivoli Application Dependency and Discovery Manager V7.1?

- A. ERROR, WARN, INFO, DEBUG, EXTRA, OFF
- B. DEBUG, INFO, WARN, EXTRA, TRACE, NONE
- C. FATAL, ERROR, WARN, INFO, DEBUG, TRACE

Answer: C

Question: 6

Which command found in the support/bin directory can be used in testing whether an IBM Tivoli Application Dependency and Discovery Manager V7.1 has valid access credentials for a UNIX machine?

- A. testssh.py
- B. wmiscan.jy
- C. encryptprops.sh
- D. testconnection.sh

Answer: A

Question: 7

Which command is used to test SSH?

- A. UNIX: sstest.sh <ip> or Windows: sstest.bat <ip>
- B. UNIX: testssh.sh <ip> or Windows: testssh.cmd <ip>
- C. UNIX: execssh.sh <host> or Windows: execssh.bat <host>
- D. UNIX: testssh.py <command> or Windows: testssh.bat <command>

Answer: D

Question: 8

What is the effect of turning on the SplitSensorLog setting?

- A. Messages from sensors are in separate folders with a file for each discovery.
- B. Messages from sensors are in separate files within a folder for each discovery.
- C. Messages from sensors are grouped by log levels and placed in files within a folder for each discovery.
- D. Messages from sensors are in separate files in the folder Log/sensors that contains only the latest discovery.

Answer: B

Question: 9

Which parameter in the collation.properties file holds the value that is used by Jetty HTTPS server, GUI HTTPS server, and is required for adding domains to the IBM Tivoli Application Dependency and Discovery Manager V7.1 Enterprise Server?

- A. com.collation.websslport
- B. com.collation.commsslport
- C. com.collation.sslpassphrase
- D. com.collation.JettyGui.sslpwd

Answer: C

Question: 10

What are two available application descriptor file format types? (Choose two.)

- A. Base application descriptor
- B. Module application descriptor

- C. Component application descriptor
- D. Hardware server application descriptor
- E. Application server application descriptor

Answer: A, C

Question: 11

In which directory is encryptprops.sh located?

- A. <COLLATION_HOME>/bin
- B. <COLLATION_HOME>/etc/bin
- C. <COLLATION_HOME>/support/bin
- D. <COLLATION_HOME>/support/scripts

Answer: C

Question: 12

A customer wants to run credential free discoveries using Nmap. There is a firewall between the IBM Tivoli Application Dependency and Discovery Manager V7.1 (TADDM) server and the target machines. Which operating system combination is valid for the customer?

- A. TADDM server and anchor server are on AIX
- B. TADDM server on Solaris and anchor server on Linux
- C. TADDM server on Linux and anchor server on Windows 2000 Server
- D. TADDM server on Windows 2000 Server and anchor server on Linux

Answer: B

Question: 13

At a client site, the firewall between the IBM Tivoli Application Dependency and Discovery Manager V7.1 (TADDM) Domain Server and the targeted Windows and UNIX systems has only SSH port 22 and WMI port 135 open. At a minimum, which additional TADDM components are needed?

- A. A gateway server is only required on the side of the targeted systems.
- B. A gateway server is required on the same side as the TADDM Domain Server.
- C. No anchor servers or gateway servers are needed since SSH and WMI ports are open.
- D. An anchor server and a gateway server are required on the side of the targeted systems.

Answer: D

Question: 14

IBM Tivoli Application Dependency and Discovery Manager V7.1 (TADDM) requires two database user accounts. What is the purpose of one of the TADDM user accounts?

- A. TADDM database archiving
- B. Synchronizing TADDM data with other Tivoli products
- C. TADDM database synchronization to a TADDM server
- D. Database archiving and synchronization to the TADDM Enterprise Server

Answer: A

Question: 15

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
