IBM

Tivoli Access Manager for e-business V6.1.1 Implementation

<http://www.ipass4sure.com/exams.asp?examcode=000-039>

The 000-039 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 000-039 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 000-039 exam is very challenging, but with our 000-039 questions and answers practice exam, you can feel confident in obtaining your success on the 000-039 exam on your FIRST TRY!

IBM 000-039 Exam Features

- Detailed questions and answers for 000-039 exam
- Try a demo before buying any IBM exam
- 000-039 questions and answers, updated regularly
- Verified 000-039 answers by Experts and bear almost 100% accuracy
- 000-039 tested and verified before publishing
- 000-039 exam questions with exhibits
- 000-039 same questions as real exam with multiple choice options

Acquiring IBM certifications are becoming a huge task in the field of I.T. More over these exams like 000-039 exam are now continuously updating and accepting this challenge is itself a task. This 000-039 test is an important part of IBM certifications. We have the resources to prepare you for this. The 000-039 exam is essential and core part of IBM certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 000-039 Test and save time and money while developing your skills to pass your IBM 000-039 Exam? Let us help you climb that ladder of success and pass your 000-039 now!

QUESTION: 1

What is included in the high level configuration document when WebSEAL clustering must provide high availability to back-end Web servers as part of the configuration?

- A. Policy Server Replication
- B. WebSEAL Junction Replication
- C. Back-end Web Server Replication
- D. LDAP High Availability and Replication

Answer: B

QUESTION: 2

What are two supported options when determining which user registry to use in an IBM Tivoli Access Manager for e-business V6.1.1 environment? (Choose two.)

- A. IBM Tivoli Directory Server
- B. Open Source LDAP Server
- C. Novell Java Directory Server
- D. Oracle User Directory Server
- E. Microsoft Active Directory Application Mode (ADAM)

Answer: A, E

QUESTION: 3

What meets the solution requirements of a large number of user sessions that need to be tracked using a fault tolerant and scalable IBM Tivoli Access Manager for e-business V6.1.1 Session Management Server (SMS) architecture where session information can be recovered after a failure?

- A. An SMS server deployed on a cluster WebSphere V7.0 server that uses a 64-bit JVM and uses in-memory storage location for session information.
- B. An SMS server deployed on a cluster WebSphere V7.0 server that uses a 32-bit JVM and uses a cluster IBM DB2 database storage location for session information.
- C. An SMS server deployed on a cluster WebSphere V7.0 server that uses a 64-bit JVM and uses a cluster IBM DB2 database storage location for session information.
- D. An SMS server deployed on a cluster WebSphere V7.0 server that uses a 32-bit JVM and uses WebSphere eXtreme Scale V7.0 storage location for session information.

Answer: D

QUESTION: 4

How can five IBM Tivoli Access Manager for e-business V6.1.1 (Tivoli Access Manager) administrators be given a different password policy than the rest of the employees in a single Tivoli Access Manager environment?

- A. When creating an administrator, apply a custom password policy which is different from the global password policy.
- B. When creating an administrator, add them to a special Tivoli Access Manager group with a different password policy.
- C. Configure the password policy for the Tivoli Access Manager administrator in LDAP for the other employees in Tivoli Access Manager.
- D. Configure the password policy in the WebSEAL configuration file which enables the special Tivoli Access Manager administrator setting.

Answer: A

QUESTION: 5

A customer is planning an IBM Tivoli Access Manager for e-business V6.1.1 environment which includes a WebSEAL instance. What are three considerations for this implementation? (Choose three.)

- A. authentication type
- B. authorization server location
- C. stateful junctions requirements
- D. junctions created as SMTP or TCP
- E. administration type (pdadmin or WPM)
- F. junction type (standard, virtualhost, transparent)

Answer: A, C, F

QUESTION: 6

Corporate policy states that the service desk resets passwords after five failed logon attempts. Which report provides the user identity qualifying for a password reset?

- A. Locked Account History
- B. User Password Change History
- C. Failed Authorization Event History
- D. Failed Authentication Event History

Answer: D

QUESTION: 7

While creating a high level configuration document, the IBM Tivoli Access Manager for e-business V6.1.1 (Tivoli Access Manager) architect has to express the location of the Tivoli Access Manager components network zones. The WebSEAL will be accessible from the Internet for external customers. Which three installation options will the architect include in the configuration document? (Choose three.)

- A. WebSEAL installed in the DMZ
- B. Policy Server installed in the DMZ
- C. WebSEAL installed in the Intranet
- D. User Registry installed in the DMZ
- E. Policy Server installed in the Intranet
- F. User Registry installed in the Intranet

Answer: A, E, F

QUESTION: 8

A user's password was stolen. The incident report team needs to know exactly which applications were used during the incident before the user changed the password. Which report is needed?

- A. Audit Event History by User
- B. Resource Access by Accessor
- C. User Password Change History
- D. Authorization Event History by Action

Answer: A

QUESTION: 9

Click the Exhibit button.

An existing IBM Tivoli Access Manager for e-business V6.1.1 infrastructure already protects a Web application for employees by using an intranet WebSEAL. The next step is to make the Web application accessible for Internet customers. What would be the most secure and logical flow?

- A. Flow A
- B. Flow B
- C. Flow C
- D. Flow D

Answer: C

QUESTION: 10

What are two functions of the Policy Server? (Choose two.)

- A. It maintains the operating file system.
- B. It gets the latest information about the patch level.
- C. It gives the date and time for the current transaction.
- D. It maintains the location information about other IBM Tivoli Access Manager servers.
- E. It maintains the master authorization database and processes updates for the authorization database.

Answer: D, E

QUESTION: 11

Which statement(s) are true about the Policy Proxy Server?

- A. only statement 1

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
