000-094

IBM

*Application Development with IBM WebSphere Integration
Developer V6.0.1*

<http://www.ipass4sure.com/exams.asp?examcode=000-094>

The 000-094 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 000-094 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 000-094 exam is very challenging, but with our 000-094 questions and answers practice exam, you can feel confident in obtaining your success on the 000-094 exam on your FIRST TRY!

IBM 000-094 Exam Features

- Detailed questions and answers for 000-094 exam
- Try a demo before buying any IBM exam
- 000-094 questions and answers, updated regularly
- Verified 000-094 answers by Experts and bear almost 100% accuracy
- 000-094 tested and verified before publishing
- 000-094 exam questions with exhibits
- 000-094 same questions as real exam with multiple choice options

Acquiring IBM certifications are becoming a huge task in the field of I.T. More over these exams like 000-094 exam are now continuously updating and accepting this challenge is itself a task. This 000-094 test is an important part of IBM certifications. We have the resources to prepare you for this. The 000-094 exam is essential and core part of IBM certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 000-094 Test and save time and money while developing your skills to pass your IBM 000-094 Exam? Let us help you climb that ladder of success and pass your 000-094 now!

Question: 1

How should a developer invoke the Currency Convert or HTTP web service asynchronously in this module, if possible at all?

- A - Update the Binding properties of the Import to specify the Invocation style is Asynchronous.
- B - Specify the Preferred interaction style is Asynchronous in the details of the Import.
- C - Ensure the Invoke activity specifies No response for the Response variable.
- D - This service cannot be called asynchronously.

Answer: D

Question: 2

As part of a large integration project, the solution calls for an application to use a resource adapter. While running the Enterprise Service Discovery Wizard, the integration developer is asked whether to Deploy connector with module. A major concern centers around future upgrading of adapters used by multiple modules. How should the integration developer configure Deploy connector with module?

- A - Deploy the adapter with the module.
- B - Deploy the adapter in a separate module.
- C - Deploy the adapter both in this module for use by this application and in a module by itself for use by other applications.
- D - It does not make a difference where the adapter is deployed since the adapter upgrade wizard will walk the developer through the process and upgrade all selected instances of the adapter.

Answer: B

Question: 3

Given the following configuration for and assuming the incoming data in of Object type:

Import: Import (JMS Binding)

JMS Import Binding | Connection | Resource Adapter | JMS Destinations | Method Bindings

Adapter Type: WebSphere Default Messaging Provider version 0.3

Connection

JNDI Lookup Name:

Managed Connection Factory:

JMS Destinations

Send Destination Type:

Receive Destination Type:

Data Type:

Binding Description:

Which of the following statements is correct?

- A - The binding will fail because the data type needs to be changed to `com.ibm.websphere.sca.jms.data.impl.JMSDataBindingImplXML`.
- B - There are no issues with the current configuration if the configuration is left as is.
- C - The binding will fail at runtime because the JNDI name is missing.
- D - More fields need to be displayed on the JMS Import Binding tab in order to determine if the configuration is correct.

Answer: B

Question: 4

A developer needs to invoke an external web service from business process. Which statement accurately describes an action that the developer must take?

- A - Create an export in the web project containing the web service
- B - Create an export in the module where the business process resides
- C - Create the wsdl file describing the external service into the module where the process resides
- D - Copy the wsdl file describing the business process into the project containing the web service

Answer: C

Question: 5

Given the following configuration in a short running business process:

Snippet

Transactional Behavior: Commit Before Commit After Participates Requires Own

Continue On Error

Enable persistence and queries of business-relevant data

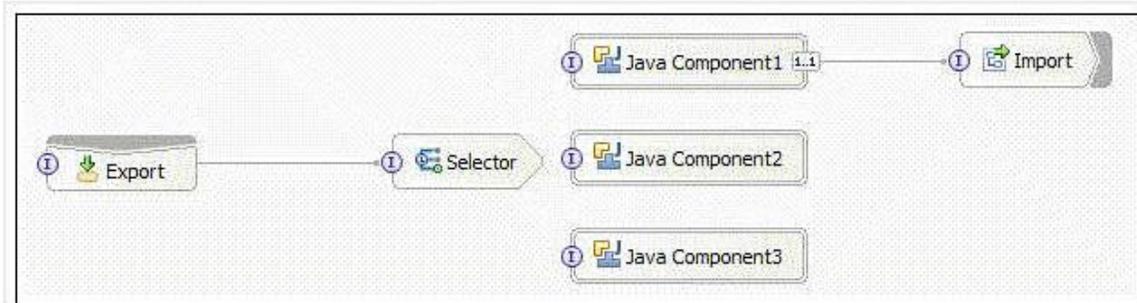

Which of the following statements is correct?

- A - The snippet will run in a new transaction.
- B - There will be a commit just before the snippet runs.
- C - No commit will take place before the snippet runs.
- D - A commit will take place before and after the snippet runs.

Answer: C

Question: 6

Which of the following statements accurately describes the implications of the following assembly wiring?

- A - The configuration is correct as it is.
- B - The wiring is incomplete. There should be no unconnected elements.
- C - The diagram is incorrect because an export cannot be connected directly to an export.
- D - The assembly is not correct as is, but it can be corrected by removing one of the Java components.

Answer: A

Question: 7

A developer is building an application for a travel agency. The travel agency will receive calls from customers to obtain quotes for travel. The customers will often need many days to deliberate before they are ready to book a trip. The application should save the customer information and quote that was gathered during the initial call so that this processing does not need to be repeated. What is the most appropriate approach for the developer to handle this type of scenario in a business process?

- A - Add an event handler to create another entry point into the process.
- B - Store the quote, wait, and add a human task to handle the reply.
- C - Add another receive into the process that will be invoked.
- D - Add another receive into the process that will be invoked and add a correlation set.

Answer: D

Question: 8

A process contains an invoke activity with the continue on error checkbox selected. This long-running process fails and no fault handler exists to catch the fault. The business process engine will do which of the following?

- A - Place the activity in a stopped state.
- B - Place the process in a stopped state.
- C - Create an administrative task for the administrator so that he/she can correct the error.

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
