

000-121

IBM

Virtualization Technical Support for IBMi-V1

The 000-121 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 000-121 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 000-121 exam is very challenging, but with our 000-121 questions and answers practice exam, you can feel confident in obtaining your success on the 000-121 exam on your FIRST TRY!

IBM 000-121 Exam Features

- Detailed questions and answers for 000-121 exam
- Try a demo before buying any IBM exam
- 000-121 questions and answers, updated regularly
- Verified 000-121 answers by Experts and bear almost 100% accuracy
- 000-121 tested and verified before publishing
- 000-121 exam questions with exhibits
- 000-121 same questions as real exam with multiple choice options

Acquiring IBM certifications are becoming a huge task in the field of I.T. More over these exams like 000-121 exam are now continuously updating and accepting this challenge is itself a task. This 000-121 test is an important part of IBM certifications. We have the resources to prepare you for this. The 000-121 exam is essential and core part of IBM certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 000-121 Test and save time and money while developing your skills to pass your IBM 000-121 Exam? Let us help you climb that ladder of success and pass your 000-121 now!

QUESTION: 1

A customer needs two client IBM i partitions on a 4-core Power 720, with storage hosted by VIO Server. What is the least expensive method to manage this environment?

- A. HMC
- B. Virtual Partition Manager
- C. Integrated Virtualization Manager
- D. Systems Director Navigator for PowerVM

Answer: C

QUESTION: 2

A customer has multiple POWERS 570 servers. The servers are controlled by multiple HMCs. The customer is installing an additional Power 770 server in this environment but will retain their existing HMCs. No updates to FSP or HMC levels have been made since installation of the POWERS servers. After reviewing the cover letters for ESP and HMC firmware levels, what updates are required to support the addition of the new server into the network?

- A. Update only the HMCs to the latest version.
- B. Update only the FSPs to the latest release available.
- C. Update the FSP5 and HMC5 of the existing systems to the minimum level required.
- D. Update the POWERS ESPs to the most recent version available for the installed firmware release. Update the HMCs to the most recent release available.

Answer: C

QUESTION: 3

An administrator wants to share a fibre attached TS3100 tape library between multiple IBM i 7.1 partitions. The system contains a PC #5774 - 4Gb fibre adapter and uses an IBM fibre switch. All IBM i partitions are hosted by VIO Server (VIOS). How could the administrator configure the sharing of the tape library?

- A. Configure NPIV within VIOS, then configure each partition to use NPIV to share the tape library.
- B. Create a script that can be called after each backup job in a partition finishes, which will move the fibre adapter to the next partition
- C. In the HMC, select the host Power System, then select Operations - Schedule Operations - New. Create a new Scheduled Dynamic Reconfiguration operation to move the fibre adapter between partitions.
- D. In the HMC, select the VIOS partition, then select Operations - Schedule Operations - Options - New. Create a new Scheduled Dynamic Reconfiguration operation to move the fibre adapter between partitions.

Answer: B

QUESTION: 4

A client IBM i 7.1 partition is being hosted by dual VIO Server partitions (VIO Server-1 & VIO Server-2). A Shared Ethernet Adapter (SEA) has been created in order to provide Ethernet failover capability for the IBM i partition. The IBM i partition will use the Ethernet resources of the VIO Server partitions. How many virtual Ethernet adapters need to be defined on the HMC in the IBM i client, and VIO Server partition profiles to support SEA and failover?

- A. IBM i Client: 1 adapter: VIO Server-1: 1 adapter
VIO Server-2: 1 adapter
- B. IBM i Client: 2 adapters
VIO Server-1: 1 adapter
VIO Server-2: 1 adapter
- C. IBM i Client: 1 adapter
VIO Server-1: 2 adapters
VIO Server-2: 2 adapters
- D. IBM i Client: 2 adapters
VIO Server-1: 2 adapters
VIO Server-2: 2 adapters

Answer: C

QUESTION: 5

In addition to Qshell and PASE, what other product needs to be installed on an IBM i partition in order to remotely run scripts on an HMC?

- A. IBM Portable Utilities for i
- B. IBM i Integrated Server Support
- C. IBM Cryptographic Service Provider
- D. IBM Network Authentication Enablement for i

Answer: A

QUESTION: 6

A customer wants two VIO Servers in the CEO of a proposed Power 720. To provide redundancy for the IBM V7000 SAN they will utilize to provision disk for his client partitions. What is the minimum required to make this possible?

- A. A 6-disk storage backplane
- B. An 8-disk storage backplane
- C. A 6-disk storage backplane and the split drive bay feature
- D. An 8-disk storage backplane and the split drive bay feature

Answer: C

QUESTION: 7

A customer has purchased a new BladeCenter H (BCH) and POWER blade to run IBM i. The POWER blade is configured with two Fibre Channel interlaces for attaching SAN and tape. They have an IBM TS3500 tape library with a fibre channel connection, and current firmware is running through a fibre switch to another IBM i system. One port on the existing switch and one port in the BCH fibre switch has been zoned to provide a connection from the tape library to the BCH. After IBM i 7.1 SLIC and base OS are installed on the blade from IBM distribution media, the tape library does not appear in the device configuration. What is the most likely cause of the problem?

- A. The existing switch does not support NPIV.
- B. NPIV enablement was omitted when configuring the BCH switch.
- C. The BCH switch configuration must match the link speed of the TS3500.
- D. A switch-to-switch cable is required. A switch to device cable was shipped with the BCH by default.

Answer: A

QUESTION: 8

Disk from a fibre-attached V7000 disk subsystem will be used for an IBM i partition. What type of adapter is required in the IBM i partition?

- A. SAS disk adapter
- B. Virtual SAS adapter
- C. Virtual SCSI adapter
- D. Fibre Channel adapter

Answer: C

QUESTION: 9

A POWER7 system has 6 IBM i partitions sharing a single shared processor pool. The system has 3 IBM i operating system licenses. Without exceeding the licenses available, what is the largest allowable value for the “Maximum processing units” setting in the shared processor pool?

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
