000-137

IBM

Advanced Rational Application Developer v7

The 000-137 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 000-137 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 000-137 exam is very challenging, but with our 000-137 questions and answers practice exam, you can feel confident in obtaining your success on the 000-137 exam on your FIRST TRY!

IBM 000-137 Exam Features

- Detailed questions and answers for 000-137 exam
- Try a demo before buying any IBM exam
- 000-137 questions and answers, updated regularly
- Verified 000-137 answers by Experts and bear almost 100% accuracy
- 000-137 tested and verified before publishing
- 000-137 exam questions with exhibits
- 000-137 same questions as real exam with multiple choice options

Acquiring IBM certifications are becoming a huge task in the field of I.T. More over these exams like 000-137 exam are now continuously updating and accepting this challenge is itself a task. This 000-137 test is an important part of IBM certifications. We have the resources to prepare you for this. The 000-137 exam is essential and core part of IBM certifications and once you clear the exam you will be able to solve the real life problems yourself.Want to take advantage of the Real 000-137 Test and save time and money while developing your skills to pass your IBM 000-137 Exam? Let us help you climb that ladder of success and pass your 000-137 now!

QUESTION: 1
What is best practice when designing a data-intensive EJB application?

A. set the values of Entity EJBs by passing them a Data Transfer object containing the necessary data
B. provide major Entity EJBs with a remote interface and relate other Entity EJBs to them via Container Managed Relations (CMR)
C. provide all Entity EJBs with a local interface only and perform all remote access through Session EJBs
D. encapsulate frequently accessed read-only data in an Entity EJB for efficient caching

Answer: C

QUESTION: 2
The embedded Apache Derby database makes development easier. However, it has one severe limitation that prevents its use in production environments. What is this limitation?

A. Connection pooling is disallowed and results in degraded performance.
B. It provides a reduced data type set without the ability to define BLOB (Binary Large Object) or CLOB (Character Large Object) columns types.
C. It provides only English language support.
D. It allows only one application to access the database to create a connection.
E. The use of the JDBC drivers is proprietary and requires a for purchase license.

Answer: D

QUESTION: 3
During the development process, a programmer selects an EJB project containing entity beans and selects Prepare For Deployment. Which action does this operation perform?

A. updates the deployment descriptor with a reference to the EJB JAR
B. generates the helper classes to map entity beans to the database
C. generates the EJB JAR file and includes it in the associated enterprise application project
D. guides the user through a wizard interface to determine the mapping between the fields in the entity bean and their associated database fields

Answer: B

QUESTION: 4

A developer is building an application where the home page will have links displayed for administrators, which will not be available for regular users of the application. Otherwise, the home page is identical for administrators and regular users. A J2EE role-based security pattern is being implemented with one role for users and one role for staff. What is the BEST way to display different versions of the home page?

A. You map the two roles to different JSPs for the home page, where one includes the extra links (for administrators) and the other does not (forusers).
B. It is not possible to display different versions of the same page for users who have different roles.
C. You apply declarative security to the body of the JSP where the links that are only available to the administrators are declared to be accessibleonly to that role.
D. You implement the links using a J2EE custom library, which contains a call to isUserInRole() on the HttpServletRequest to see if the link shouldbe displayed or not.

Answer: D

QUESTION: 5

In JSP, custom tag libraries can be used to _____.

A. enable better searching in a Web application
B. package tag extensions for JSP
C. package JSPs for exporting to other projects
D. package tag extensions for JSF

Answer: B

QUESTION: 6

Using the EJB Timer Service, how does an EJB container execute business logic once a timer has expired?

A. It calls the bean ejbTimeout() method and passes the expired timer.It calls the bean? ejbTimeout() method and passes the expired timer.
B. It calls the method registered by the bean when the TimerService created the Timer.
C. It calls the timer getHandle() method.It calls the timer? getHandle() method.
D. It calls the timer transaction commit() method.It calls the timer transaction? commit() method.

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of Professional & Certified Experts available via support.
- Free 90 days updates to match real exam scenarios.
- Instant Download Access! No Setup required.
- Price as low as $19, which is 80% more cost effective than others.
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (Android, iPhone, iPod, iPad)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- *Guaranteed Success*.
- **Fast**, helpful support 24x7.
