# 000-219

## IBM

*IBM Sterling Order Management V9.1 Deployment*

<http://www.ipass4sure.com/exams.asp?examcode=000-219>

The 000-219 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 000-219 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 000-219 exam is very challenging, but with our 000-219 questions and answers practice exam, you can feel confident in obtaining your success on the 000-219 exam on your FIRST TRY!

### IBM 000-219 Exam Features

- Detailed questions and answers for 000-219 exam
- Try a demo before buying any IBM exam
- 000-219 questions and answers, updated regularly
- Verified 000-219 answers by Experts and bear almost 100% accuracy
- 000-219 tested and verified before publishing
- 000-219 exam questions with exhibits
- 000-219 same questions as real exam with multiple choice options

Acquiring IBM certifications are becoming a huge task in the field of I.T. More over these exams like 000-219 exam are now continuously updating and accepting this challenge is itself a task. This 000-219 test is an important part of IBM certifications. We have the resources to prepare you for this. The 000-219 exam is essential and core part of IBM certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 000-219 Test and save time and money while developing your skills to pass your IBM 000-219 Exam? Let us help you climb that ladder of success and pass your 000-219 now!

**QUESTION: 1**

Due to an enterprise-wide license agreement, a company uses a database from a particular vendor. The database to be used for development is supported per the System\_Requirements\_Guide.pdf. The testing, staging, and production deployments are however going to use a different database (from a different vendor), which is also a supported database. Which statement is true about this situation?

- A. The IBM Sterling Selling and Fulfillment Suite allows for the databases to be different between development, testing, staging and production deployments.
- B. Since the IBM Sterling Selling and Fulfillment Suite uses standard JDBC to connect to the database, questions around compatibility of databases must be directed to the database vendors.
- C. Even though it might work, the IBM Sterling Selling and Fulfillment Suite deployment will be supported by IBM only if the database used for production remains the same as the one used for development.
- D. The IBM Sterling Selling and Fulfillment Suite deployment contains code that is database specific; therefore, it is not advisable to use different database providers between development and production environments.

**Answer: A**

**QUESTION: 2**

While installing the IBM Sterling Selling and Fulfillment Suite in the GUI mode, the installation fails with an error indicating a user permission issue on the database schema. On researching the issue, it is discovered that the user has not been granted "CREATE TABLE" permission on the schema. The database administrator who can provide access is not accessible until the end of the week. Which statement is true regarding the application installation procedure?

- A. The installation has to be rerun from the beginning after the permission has been granted to the user.
- B. The IBM Sterling Selling and Fulfillment Suite should be re-installed with the option to use the database bundled along with it.
- C. The installation can be run in a mode such that it does not connect to the database and the database scripts can be run later when the permission issue is resolved.
- D. Since the issue is only a permissions issue, the installation can be run with a parameter in the silent file so it would ignore such errors and complete the installation successfully.

**Answer: C**

**QUESTION: 3**

Which two segment types are provided in IBM Sterling Selling and Fulfillment Suite?

- A. Made to fulfill
- B. Made to order
- C. Made to stock
- D. Made to demand
- E. Made to customer

**Answer:** B, E

**QUESTION: 4**

A customer places an order of amount \$100. As per their business rules, if the payment method is credit card the retailer has to authorize the credit card by contacting the payment gateway for the complete order amount before the order can be scheduled. Which execution step needs to be completed for the payments on the order to be authorized and the details stored against the order?

- A. The managePaymentTerms API needs to be invoked with the appropriate order and payment information in the input.
- B. The executePaymentTransactions API needs to be invoked with the appropriate order and payment information in the input.
- C. The Payment Collection, Payment Execution and Payment Collection transactions should be executed in that sequence for the order.
- D. The payment status on the order has to be manually changed to UTHORIZED?from the Sterling Selling and Fulfillment Foundation console.

**Answer:** C

**QUESTION: 5**

A specific customer implementation requires IBM Sterling Selling and Fulfillment Suite to create procurement transfer orders at the time of scheduling the original order. For achieving this, sourcing rules must be configured to use ship nodes instead of distribution rules. Which additional parameters must be passed for the order creation?

- A. The shipping node and receiving node are passed at the order line level.

- B. The enterprise, buyer, and order type are passed at the order header level.
- C. The shipping node, receiving node, and catalog organization are passed at the order line level.
- D. The shipping node, receiving node, buyer, and enterprise are passed at the order header and line level.

**Answer:** A

**QUESTION: 6**

Synchronous services can be invoked in the IBM Sterling Selling and Fulfillment Suite through which two components?

- A. Actions
- B. Conditions
- C. User Exits
- D. Agent Server
- E. Integration Server

**Answer:** A, C

**QUESTION: 7**

A company wants to run the schedule agent in multiple environments each having different provider URL values for their JMS queues. However, they do not wish to modify the agent configuration on each environment to the corresponding provider URL value. How can this be achieved?

- A. Set the provider\_url value in the sandbox.cfg file on each environment correctly.
- B. Set the value of the yfs.agent.override.providerurl property in the jms.properties file.
- C. Set the value of the yfs.agent.override.providerurl property in the servers.properties file.
- D. Override the value of the yfs.yfs.agent.override.providerurl property in the customer\_overrides.properties file.

**Answer:** D

**QUESTION: 8**

Using the Exception Console of the IBM Sterling Selling and Fulfillment Suite, the exceptions raised by asynchronous services can be viewed. The developer needs the ability to view the error XML, modify it, and process it. Which property of the Receiver Link Exception Handling properties should the developer turn on?

- A. Is Reprocessible
- B. Handle Exceptions
- C. Process Exceptions
- D. Reprocess Exceptions

**Answer:** A

**QUESTION:** 9

A retailer needs different types of items to be associated with their corresponding provided services. For example, all the televisions need to be associated with an installation service, whereas microwaves need to be associated with a product demo service. What should be created to help achieve this?

- A. Create an asset for the item contains the associated service.
- B. Create an item classification with the purpose set as service Association
- C. Create item attributes for each item type with purpose set as service Association
- D. Create item categories for each item type with purpose set as service Association

**Answer:** B

**QUESTION:** 10

Payment Administration users should be able to view only payment related alerts while Node Administrator users should be able to view all alerts. Which approach achieves this?

- A. In the alert configuration in Applications Manager, under Application > Application Platform > Alert > Exception Type appropriately define the users who will need to view the alert.
- B. In the alert configuration for Exception Type Role in Applications Manager, under Application > Application Platform > Alert > Exception Type Role appropriately define the users who will need to view the alert.
