000-252

IBM

*Web Sphere Application Server Network Deployment V6.0,
Core Administration*

<http://www.ipass4sure.com/exams.asp?examcode=000-252>

The 000-252 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 000-252 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 000-252 exam is very challenging, but with our 000-252 questions and answers practice exam, you can feel confident in obtaining your success on the 000-252 exam on your FIRST TRY!

IBM 000-252 Exam Features

- Detailed questions and answers for 000-252 exam
- Try a demo before buying any IBM exam
- 000-252 questions and answers, updated regularly
- Verified 000-252 answers by Experts and bear almost 100% accuracy
- 000-252 tested and verified before publishing
- 000-252 exam questions with exhibits
- 000-252 same questions as real exam with multiple choice options

Acquiring IBM certifications are becoming a huge task in the field of I.T. More over these exams like 000-252 exam are now continuously updating and accepting this challenge is itself a task. This 000-252 test is an important part of IBM certifications. We have the resources to prepare you for this. The 000-252 exam is essential and core part of IBM certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 000-252 Test and save time and money while developing your skills to pass your IBM 000-252 Exam? Let us help you climb that ladder of success and pass your 000-252 now!

QUESTION 1:

A system administrator is installing an enterprise application in a secured WebSphere Application Server environment. The application has been configured to use security roles. Which of the following is considered a BEST practice when mapping the security roles to the current user registry?

- A. Map the security roles of EJB methods to groups and the security roles of Web resources to users.
- B. Map the security roles of Web resources to groups and security roles of EJB methods to users.
- C. Map all security roles to users
- D. Map all security roles to groups

Answer: D

QUESTION 2:

A system administrator has created data source definition using the Application Deployment Descriptor editor in the Application Server Toolkit (AST). These datasource can be accessed by any:

- A. Applications running on the server
- B. Applications in the current AST workspace.
- C. Modules contained in the EAR file where the definition is made
- D. J2EE Application clients accessing the server

Answer: C

QUESTION 3:

Which of the following must a system administrator define when creating a JDBC provider at the cluster scope?

- A. All datasources for this JDBC provider at the cluster level.
- B. An XA data source implementation type, for the JDBC driver.
- C. The symbolic Variable used in the class path to the JDBC driver for each node in the cluster
- D. The J2C authentication data entry for the datasource at the cluster scope.

Answer: C

QUESTION 4:

A system administrator is installing an enterprise application containing several

entity EJBs. All EJBs are contained in the same EJB JAR file. All CMP EJBs in the JAR file, except one, access the same datasources. What is the MOST efficient way to bind the datasources for the EJBs?

- A. Create a separate EJB JAR file for the EJB that is different and set EJB module datasources on both EJB JARs.
- B. Ask developers to pre-configure the EJB module with the production datasource JNDI names.
- C. Individually, bind each of the EJBs to the datasource they use.
- D. Bind the EJB module to the datasource used by most EJBs, then specify a separate binding for the EJB that is different

Answer: D

QUESTION 5:

The WebSphere Rapid Deployment(WRD) tool is running in the automatic allocation mode. All of the following enterprise applications will be deployed if the file types are placed below in WRD's monitored directory EXCEPT.

- A. An Enterprise Archive (EAR) file.
- B. A Web module (WAR) file.
- C. An EJB module JAR file.
- D. A Resource Adapter Archive (RAR) file.

Answer: D

QUESTION 6:

A customer is in the process of configuring a J2C (JCA) connection factory using the administrative console. The customer wishes to eventually secure the connection. The customer also knows that several security settings are now deprecated in WebSphere Application Server V6 for connection factories. Which of the following should the system administrator recommend that the customer use?

- A. Container-managed Authentication Alias
- B. Mapping-Configuration Alias
- C. Authentication preference
- D. Container-managed authentication alias

Answer: A

QUESTION 7:

If a system administrator is creating a wsadmin script, and within the script it is necessary to create several JMS Connection Factories and JDBC. Dtasources, which

of the following wsadmin scripting objects should be used?

- A. AdminConfig
- B. AdminControl
- C. AdminApp
- D. AdminTask

Answer: A

QUESTION 8:

A customer is using the WebSphere V6 Default messaging provider as the messaging service. The customer has the following configuration. Cell C1 has Bus A and B, whereas Cell C2 has Bus C. All of the following are supported optional EXCEPT.

- A. Configuring a link between Bus A and Bus B.
- B. Configuring WebSphere MQ as a Foreign bus.
- C. Configuring a link between Bus b AND Bus C.
- D. Running a JMS Client on Bus A that gets messages from a destination on Bus C.

Answer: D

QUESTION 9:

A system administrator is about to federate a node into a Network Deployment cell. The node's server has several applications installed and a Service integration Bus is defined on the node. Before federating the node, the system administrator must understand that the default behavior of the addNode operation is:

- A. To not carry over applications to the cell.
- B. To not carry over Service Integration Buses to the cell.
- C. To not carry over applications and Service Integration Buses to the cell.
- D. To carry over applications and Service Integration buses to the cell.

Answer: C

QUESTION 10:

A system administrator is using the administrative console and accidentally closes the browser without saving any changes made during that session. What must the system administrator do to make sure any configuration changes that were made during the last session are not lost?

- A. Log in as a different user and save the master repository.
- B. Open and hand-edit the configuration xml files in the appropriate places

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
