000-288

IBM

Developing Web Services with WebSphere Studio Application Developer V5.1

<http://www.ipass4sure.com/exams.asp?examcode=000-288>

The 000-288 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 000-288 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 000-288 exam is very challenging, but with our 000-288 questions and answers practice exam, you can feel confident in obtaining your success on the 000-288 exam on your FIRST TRY!

IBM 000-288 Exam Features

- Detailed questions and answers for 000-288 exam
- Try a demo before buying any IBM exam
- 000-288 questions and answers, updated regularly
- Verified 000-288 answers by Experts and bear almost 100% accuracy
- 000-288 tested and verified before publishing
- 000-288 exam questions with exhibits
- 000-288 same questions as real exam with multiple choice options

Acquiring IBM certifications are becoming a huge task in the field of I.T. More over these exams like 000-288 exam are now continuously updating and accepting this challenge is itself a task. This 000-288 test is an important part of IBM certifications. We have the resources to prepare you for this. The 000-288 exam is essential and core part of IBM certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 000-288 Test and save time and money while developing your skills to pass your IBM 000-288 Exam? Let us help you climb that ladder of success and pass your 000-288 now!

Question: 1

According to Web Services for J2EE (JSR-109), a compliant Web Service can be implemented as:

- A. Entity EJB
- B. Stateless session EJB
- C. Service Endpoint
- D. Stateful session EJB

Answer: B, C

Question: 2

According to JAX-RPC, each PortType element in a WSDL document is mapped to which Java object?

- A. Service Endpoint Interface
- B. Service Interface
- C. Service Implementation Bean
- D. ServiceBindingStub

Answer: A

Question: 3

Which of the following statements regarding JAX-RPC Handlers is NOT true?

- A. Client-side Handlers run after the Stub/proxy has marshaled the message, but before container services and the transport binding occurs.
- B. Server-side Handlers run after container services have run including method level authorization, but before demarshalling and dispatching the SOAP message to the endpoint.
- C. Handlers can modify the SOAP message and operation name.
- D. Currently there is no standard means for Handlers to access the security identity associated with the request.

Answer: C

Question: 4

Which of the following statements concerning the mapping of XML constructs to Java as defined by JAX-RPC are correct?

- A. JAX-RPC defines mappings for XML complex types (xsd:complexType)
- B. JAX-RPC defines mappings for XML arrays and XML enumerations
- C. JAX-RPC defines mappings for xsd:anyType
- D. JAX-RPC does not define mappings for SOAP encoded types
- E. xsd:int will map to java.lang.Integer if the xsd:int element is marked as nillable in the base Schema

Answer: A, B, E

Question: 5

A developer implements an EJB Web Service conforming to Web Services for J2EE (JSR-109). Which of the following artifacts need to be packaged with the J2EE EAR for the Web Service?

- A. Service Endpoint Interface
- B. Soap Binding Stub
- C. Java to WSDL mapping XML File

- D. Service Locator class
- E. WSDL file

Answer: A, C, E

Question: 6

Which of the following are TRUE of JAX-RPC clients?

- A. JAX-RPC clients can use a synchronous request-response invocation mode
- B. JAX-RPC clients can use a one-way RPC invocation mode in which they invoke a remote operation and return immediately without blocking.
- C. JAX-RPC clients must invoke a Web Service using a static stub generated at compile time
- D. JAX-RPC client code is independent of the messaging and transport protocol.
- E. The client stubs (that are generated by tooling) must be portable across vendors.

Answer: A, B, D

Question: 7

To access the Web Service User-Defined Function wizard, a developer would begin by clicking "File -> New -> Other" to invoke the New dialog. Which category on the detail (left) pane would she click on to display Web Service User-Defined Function in the detail pane?

- A. Web Services
- B. Data
- C. J2EE
- D. Web
- E. UDF

Answer: B

Question: 8

Which of the following are TRUE with regard to Web Service clients?

- A. A single Stub can be used to access all ports defined in a WSDL file.
- B. Dynamic Proxies require code generation of Stubs.
- C. Java applications can invoke Web Services using Stubs or Dynamic Proxies.
- D. Dynamic Invocation Interfaces de-couple transport bindings and protocols from the Web Service client implementations.
- E. ServiceLocators de-couple Web Service clients from Web Service endpoints.

Answer: C, E

Question: 9

A J2EE web application needs to access a Web Service for its data processing. It has been decided to use client proxies to access the Web Service. While the operation, parts and service endpoint are known at the time of application development the port and the bindings are known only during runtime. Which of the following type of client proxies would BEST suit this application?

- A. Dynamic Invocation Interface
- B. Dynamic Proxies
- C. Stubs
- D. Service Endpoint Interface
- E. Handlers

Answer: B

Question: 10

Please refer to the exhibit.

Each member company of the Flange Consortium registers in a public UDDI registry. A consortium rule requires each company to present its catalog as a Web Service that implements a common UDDI technical model named "FlangeCat." The technical model refers to an online WSDL file. The WSDL file describes a Web Service that includes a getPrice(FlangeType) operation. The Flange consortium is developing a thin client that presents a pick list of prices for any chosen kind of flange. Assume that the client uses a proxy generated from the FlangeCat technical model WSDL reference.

The client uses the UDDI registry and the Web Service proxy to discover and add flange services to a service list. Assume that the list is implemented as a vector of service keys. Choose the BEST approach to accessing vendor name, description, and contacts when a user clicks an entry in the list. Use the

- A. service key of the clicked entry to obtain the business key from the registry, retrieve the business entry using the business key; display the business name, description and contacts.
- B. service key of the clicked entry to obtain the service details; extract the business key from the service details, retrieve the business entry using the business key; display the business name, description and contacts
- C. business key of the clicked entry to retrieve the business entry using the service key; display the business name, description and contacts.
- D. business key of the clicked entry to retrieve the service entry using the service key; display the business name, description and contacts

Answer: B

Question: 11

A Web Service dynamic client could find information in a UDDI registry by using the UDDI4J API with what kind of object?

- A. com.ibm.uddi.client.Proxy
- B. com.ibm.uddi.client.ConnectionFactory
- C. com.ibm.uddi.client.Connection
- D. com.ibm.uddi.client.UDDIProxy

Answer: D

Question: 12

Which of the following approaches for development of Web Services using WebSphere Studio Application Developer V5.1 are top-down?

- A. Web Service from JavaBean

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
