000-293

IBM

WebSphere InterChange Server V4 and Toolset Deployment

<http://www.ipass4sure.com/exams.asp?examcode=000-293>

The 000-293 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 000-293 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 000-293 exam is very challenging, but with our 000-293 questions and answers practice exam, you can feel confident in obtaining your success on the 000-293 exam on your FIRST TRY!

IBM 000-293 Exam Features

- Detailed questions and answers for 000-293 exam
- Try a demo before buying any IBM exam
- 000-293 questions and answers, updated regularly
- Verified 000-293 answers by Experts and bear almost 100% accuracy
- 000-293 tested and verified before publishing
- 000-293 exam questions with exhibits
- 000-293 same questions as real exam with multiple choice options

Acquiring IBM certifications are becoming a huge task in the field of I.T. More over these exams like 000-293 exam are now continuously updating and accepting this challenge is itself a task. This 000-293 test is an important part of IBM certifications. We have the resources to prepare you for this. The 000-293 exam is essential and core part of IBM certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 000-293 Test and save time and money while developing your skills to pass your IBM 000-293 Exam? Let us help you climb that ladder of success and pass your 000-293 now!

Question: 1

The WebSphere InterChange Server fails to start and gives the following error:

"Error 11135:Activation of collaboration <collaboration_name> group could cause a potential deadlock with one or more existing collaboration groups, and is therefore disallowed"

Which of the following actions will allow the WebSphere Business Integration administrator to restart the WebSphere InterChange Server, so the administrator can resolve the problem?

- A. Clear the WIP tables and restart the server.
- B. Shut Down the collaboration which will clear the deadlocks.
- C. Add a line DEADLOCK_DETECTOR_CHECK=false to the COLLABORATION section in the WebSphere InterChange Server configuration file and restart the server.
- D. Add a line DEADLOCK_RESOLVER=true to the SERVER section in the WebSphere InterChange Server configuration file and restart the server.

Answer: C

Question: 2

During the design phase of a project, it was determined that there can be a very high volume of events in the WebSphere InterChange Server's WIP tables at a given time. Which of the following can be done to help distribute the database load?

- A. The WebSphere InterChange Server database services cannot be distributed across multiple DBMS because there is a restriction that the WebSphere InterChange Server uses that ensures that the database servers remain on the same physical database server.
- B. Partition the WebSphere InterChange Servers Repository service onto a separate DBMS Server.
- C. Partition the WebSphere InterChange Servers Event Management and Transaction services onto a separate DBMS Server.
- D. Create a separate, full database schema install, with the same exact name for each database service.

Answer: C

Question: 3

Which of the following method calls from a collaboration will directly cause an email to be sent?

- A. logError()
- B. logEmail()
- C. raiseEmail()
- D. raiseException()

Answer: A

Question: 4

A WebSphere InterChange Server administrator is having a memory problem compiling a map deployed on a WebSphere InterChange Server running on a UNIX machine. Which of the following Java parameters should be increased to successfully compile the map?

- A. The stack size
- B. The minimum heap size
- C. The maximum heap size
- D. The native stack size

Answer: C

Question: 5

A WebSphere InterChange Server needs to be restarted. After the WebSphere InterChange Server is restarted and ready, the system is connected through the system manager. However, the status of all of the adapter controllers is paused. Which of the following is the MOST probable cause?

- A. Because the Object Request Broker was not restarted, the adapters were unable to register themselves.
- B. Because WebSphere MQ was not restarted, the adapters were unable to obtain a connection to the queues and so the controllers are stopped.
- C. It is always necessary to restart the adapter controllers upon a restart of the WebSphere InterChange Server.
- D. The WebSphere InterChange Server is unable to start up all of the server components, so the adapters will not start.

Answer: B

Question: 6

There are various ways to shut down the WebSphere InterChange Server in a UNIX environment from a command line. Which of the following is the LEAST recommended by the WebSphere Business Integration documentation?

- A. kill -9 <processId>
- B. kill <processId>
- C. Ctrl+C
- D. ics_manager -stopgraceful

Answer: A

Question: 7

When running repos_copy from the command line, the following error is encountered, even though the WebSphere InterChange Server is on the same machine and is active:

org.omg.CORBA.NO_IMPLEMENT: Could not locate the following object: repository id : IDL:IdlStubs/IEngine:1.0 object name : CROSSWORLDS minor code: 0 completed: No The server CROSSWORLDS is probably not running Which of the following actions will MOST quickly resolve this problem?

- A. Restart the Object Request Broker and then start up the WebSphere InterChange Server.
- B. Restart WebSphere MQ and the Object Request Broker.
- C. Reboot the machine and start the WebSphere InterChange Server.
- D. Change the Object Request Broker port from 14000 to 14010, start the Object Request Broker and restart the WebSphere InterChange Server.

Answer: A

Question: 8

A system administrator wants to improve the performance of a multi-threaded adapter. By adjusting the AgentConnections adapter configuration parameter, the administrator is specifying which of the following?

- A. The number of sessions opened to an application.
- B. The number of IIOp threads/channels opened for request transport between the agent and controller.

- C. The number of queues allocated for the communication between the agent and controller.
- D. The number of slave processes to instantiate in the CAP (Connector Agent Parallelism) processing environment.

Answer: B

Question: 9

A customer uses a common payroll object model to represent their payroll business process data. Every corporate application follows the same common payroll object model. The corporate payroll applications are all MQ enabled, using WebSphere MQ as their API to integrate with outside applications. They wish to distribute the payroll data from their corporate payroll applications to their 50 divisional offices. Each divisional office has their unique payroll application and primary keys. Which of the following approaches and designs should be recommended for the WebSphere InterChange Server business objects?

- A. Create 2 business objects. A common payroll business object, one business object that is a superset of all the fields from each of the unique divisional office payroll applications.
- B. Create 3 business objects. A common payroll business object, a generic business object, and one business object that is a superset of all the fields from each of the unique divisional payroll applications.
- C. Create 51 business objects. A common payroll business object, and 50 business objects, one for each unique divisional payroll application. A separate generic object is not required because the common payroll business object can be bound to the source port in the collaboration template.
- D. Create 52 business objects. A common payroll business object, 50 application specific business objects, one for each unique divisional payroll application, and a generic object. A generic object is required to comply with the generic object model that the WebSphere InterChange Server uses. Collaborations use generic business objects.

Answer: D

Question: 10

An Object Discovery Agent is most useful when:

- A. Creating generic business objects.
- B. Creating application specific business objects.
- C. Requirements specifying that an adapter agent be capable of being restarted remotely, or upon system failure.
- D. Creating business logic for a collaboration template.

Answer: B

Question: 11

Which one of the following is the proper way to create an instance of the DataHandler when using the Server Access Interface?

- A. Set the MIME Type variable in the access client. Create an attribute in the MO_Server_DataHandler meta-object with the same name as the supported MIME type. Provide the name of the MIME type's associated child meta-object as the attribute's type. This child meta-object uses the ClassName attribute to create an instance of the DataHandler.
- B. Implement the createHandler method in the access client, passing in the className argument. The createHandler method creates an instance of the DataHandler directly from the access client, according to the value of the className argument that was passed in.
- C. Set the MIME type and BOPrefix in the access client. Create an attribute in the MO_Server_DataHandler meta-object with the same name as the supported BOPrefix and

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
