000-315

IBM

IBM WebSphere Message Broker v6.1, Solution Development

<http://www.ipass4sure.com/exams.asp?examcode=000-315>

The 000-315 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 000-315 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 000-315 exam is very challenging, but with our 000-315 questions and answers practice exam, you can feel confident in obtaining your success on the 000-315 exam on your FIRST TRY!

IBM 000-315 Exam Features

- Detailed questions and answers for 000-315 exam
- Try a demo before buying any IBM exam
- 000-315 questions and answers, updated regularly
- Verified 000-315 answers by Experts and bear almost 100% accuracy
- 000-315 tested and verified before publishing
- 000-315 exam questions with exhibits
- 000-315 same questions as real exam with multiple choice options

Acquiring IBM certifications are becoming a huge task in the field of I.T. More over these exams like 000-315 exam are now continuously updating and accepting this challenge is itself a task. This 000-315 test is an important part of IBM certifications. We have the resources to prepare you for this. The 000-315 exam is essential and core part of IBM certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 000-315 Test and save time and money while developing your skills to pass your IBM 000-315 Exam? Let us help you climb that ladder of success and pass your 000-315 now!

Questions: 1

There is a requirement to integrate Message Broker V6.1 with a messaging system that conforms to Java Message Service Specification V1.1. Which messaging transport should be used for integration purposes?

- A. MQ Mobile
- B. Broker JMS
- C. Web Services
- D. MQ Enterprise

Answer: B

Questions: 2

A Message Broker V6.1 developer is implementing a message flow with an JMSInput node, JavaCompute node and a JMSReply node. The logic in the JavaCompute node inserts a record to a database table using a JDBC Type 4 connection. Which three tasks have to be performed to ensure that the JMS, the database and the JMS transactions are synchronized?

- A. Create the JDBC connection using an XADataSource.
- B. Set the Transaction mode of the JMSInput and JMSReply nodes to Local.
- C. Set the Transaction mode of the JMSInput and JMSReply nodes to Global.
- D. Set the Backout destination of the JMSInput node to hold In-doubt transactions.
- E. Use the broker Java API getJDBCType4Connection to initiate the JDBC connection.
- F. Configure a XAResourceManager for both the JDBC and JMS connections in the broker's queue manager.

Answer: C, E, F

Questions: 3

Which component is the contract that describes to the Message Broker V6.1 developer how to build a Web service request?

- A. WSDL
- B. Namespace
- C. HTTP Header
- D. SOAP Envelope

Answer: A

Questions: 4

When designing an online auction store, one of the key architectural decisions made was to handle and secure Web traffic using Message Broker V6.1. Two important aspects of security need to be addressed in the solution: authentication and message integrity. Which transport node is the most appropriate for implementing this scenario?

- A. MQ
- B. TCP
- C. SOAP
- D. HTTP

Answer: C

Questions: 5

A Message Broker V6.1 developer builds a message flow to act as a server for an MQ based Request/Reply pattern that ends with an MQReply node. If a message is received that does not specify a ReplyToQueue in the MQMD, what will the MQReply node do?

- A. Throw an exception.
- B. Put the message on the source queue.
- C. Put the message on the backout queue.
- D. Put the message on the dead letter queue.

Answer: A

Questions: 6

A Message Broker V6.1 developer receives a request to authenticate and authorize Web service requests to a message flow with username and password provided as WS-Security username tokens against a Microsoft Active Directory. Which action must be performed by the developer to fulfill this request?

- A. Set the Use HTTPS property of the SOAPInput node.
- B. Add a username token in the WS-Security table of the SOAPInput node.
- C. Add a username and a password as user-defined SOAP headers of the SOAPInput node.
- D. Nothing, the Message Broker administrator that deploys the message associates the right security profile.

Answer: D

Questions: 7

A Message Broker V6.1 developer needs to put an HTTP input message onto an MQ queue for downstream processing. After clearing the HTTP headers, what is the simplest way to build an MQMD?

- A. Write ESQL code to construct an MQMD.
- B. Let the MQOutput node build a default MQMD.
- C. Use the SOAPEXtract node to build an MQMD.
- D. Use the ResetContentDescriptor node to build an MQMD.

Answer: B

Questions: 8

A Message Broker V6.1 developer has been asked to develop a message flow that picks up a file every minute from ftp server ftp.acme.com with ftpuser as the username and Pa\$\$w0rd as the password. The developer has added a FileInput node to the message flow. Which three other tasks need to be performed?

- A. Set Polling interval of FileInput node to: 60.
- B. Set ftp.acme.com as FTP server on FileInput node.
- C. Set ftpuser as Security identity on FileInput node.
- D. Set ftpuser/Pa\$\$w0rd as Security identity on FileInput node.
- E. Issue the "mqsisetdbparms MY_BROKER -n ftp::ftpuser -u ftpuser -p Pa\$\$w0rd" runtime command.
- F. Issue the "mqsicreateconfigurablesevice MY_BROKER -c TCPIPServer -o 1452" runtime command.

Answer: B, C, E

Questions: 9

A Message Broker V6.1 developer wants to create a message flow that will act as a Web service. What does the developer need to utilize to assure the message elements are uniquely identifiable by the message flow parser?

- A. WSDL
- B. Namespace
- C. HTTP Header
- D. SOAP Envelope

Answer: B

Questions: 10

A Message Broker V6.1 developer has been asked to develop a message flow to route SOAP/HTTP-based Web service requests to the appropriate provider without access to the WSDL of the providers. Which set of built-in nodes is the most appropriate for implementing this message flow?

- A. An HTTPInput node, a Route node, an HTTPRequest node and an HTTPReply node.
- B. A SOAPInput node, an EndpointLookup node, a SOAPRequest node and a SOAPReply node.
- C. A SOAPInput node, a DatabaseRetrieve node, a SOAPRequest node and a SOAPReply node.
- D. An HTTPInput node, a DatabaseRetrieve node, an HTTPRequest node and an HTTPReply node.

Answer: D

Questions: 11

A flow is being developed to interact with an EIS system using one of the native adapter nodes. As part of the development process, which artifacts should be dragged onto the flow editor canvas to create the flow template?

- A. WSDL
- B. Business Object
- C. Message Definition
- D. Adapter Connection

Answer: D

Questions: 12

A message flow has been developed to receive a record with an MQInput node and store it by appending it to a local file using the FileOutput node. When the message flow is tested by sending five test messages, only the record from the last message gets stored in the local file. What is the most probable cause of this behavior?

- A. The file already exists in the mqsitransit directory.
- B. The FileOutput node does not support appending data to an existing file.
- C. The developer did not connect the Finish File terminal of the FileOutput node.
- D. The Record definition property of the FileOutput node is set to "Record is Whole File".

Answer: D

Questions: 13

A developer who is very familiar with writing XPath expressions in the mapping editor has been asked to convert several of the company's current message flows. The message flows use mappings to do message transformation to message flows which use Java to do transformations.

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
