000-543

IBM

DB2 9.7 Application Development

<http://www.ipass4sure.com/exams.asp?examcode=000-543>

The 000-543 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 000-543 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 000-543 exam is very challenging, but with our 000-543 questions and answers practice exam, you can feel confident in obtaining your success on the 000-543 exam on your FIRST TRY!

IBM 000-543 Exam Features

- Detailed questions and answers for 000-543 exam
- Try a demo before buying any IBM exam
- 000-543 questions and answers, updated regularly
- Verified 000-543 answers by Experts and bear almost 100% accuracy
- 000-543 tested and verified before publishing
- 000-543 exam questions with exhibits
- 000-543 same questions as real exam with multiple choice options

Acquiring IBM certifications are becoming a huge task in the field of I.T. More over these exams like 000-543 exam are now continuously updating and accepting this challenge is itself a task. This 000-543 test is an important part of IBM certifications. We have the resources to prepare you for this. The 000-543 exam is essential and core part of IBM certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 000-543 Test and save time and money while developing your skills to pass your IBM 000-543 Exam? Let us help you climb that ladder of success and pass your 000-543 now!

Exam Name:	DB2 9.7 Application Development		
Exam Type:	IBM	Exam Code:	000-543
Certification	IBM DB2	Total Questions:	99

Question: 1

Which condition will prevent a developer from using the DB2 Call Level Interface in an application?

- A. The developer must control the cursor names to comply with company naming standards.
- B. An SQL precompiled is not available to the developer.
- C. The application must create an external scalar function with the CREATE FUNCTION statement.
- D. The DECLARE CURSOR statement needs to be used.

Answer: D

Question: 2

The statement below was used to create a cursor named CSR1:

```
DECLARE csr1 DYNAMIC SCROLL CURSOR FOR
SELECT * FROM employee;
```

After fetching all of the rows in the result set associated with cursor CSR1, which two statements can be used to fetch the data starting at the end of the result set? (Choose two.)

- A. FETCH LAST
- B. FETCH PRIOR
- C. FETCH RELATIVE
- D. FETCH OFFSET

Answer: B, C

Question: 3

Click the Exhibit button.

```
CREATE TABLE store(sid INTEGER, info XML);
INSERT INTO store VALUES (1,
'<storeinfo sid="1">
<name>Grocery A</name>
<items>
<fruit><name>Mango</name><price>1.20</price></fruit>
<fruit><name>Apple</name><price>0.50</price></fruit>
<dessert><name>Ice Cream</name><price>6.00</price></dessert>
</items>
</storeinfo>');

```

Given the statements shown in the exhibit, a user executes the query shown below: XQUERY for \$store in db2-fn:xmlcolumn('STORE.INFO')/storeinfolet \$items := \$store/items/fruit, \$count := fn:count(\$items) return <itemcount>\$count</itemcount>

What is the output?

- A. 2
- B. <itemcount>2</itemcount>
- C. <itemcount>1</itemcount>
- D. <itemcount>\$count</itemcount>

Answer: D

Question: 4

You have created a stored procedure (MULTIRESULTS()) on the server which will return multiple result sets. While developing a PHP application using the IBM_DB2 extension, you want to call the stored procedure. The code shown below will execute the stored procedure: \$stmt = db2_exec(\$conn, 'CALL multiResults()'); How can you fetch all of the result sets from \$stmt?

Exam Name:	DB2 9.7 Application Development		
Exam Type:	IBM	Exam Code:	000-543
Certification	IBM DB2	Total Questions:	99

- A. Call db2_fetch_object(\$stmt) for the first result set; call db2_next_result(\$stmt) for more result sets.
- B. Call db2_next_result(\$stmt) for each result set.
- C. Call db2_fetch_object(\$stmt) for each result set.
- D. Call db2_next_result(\$stmt) for each result set; call db2_fetch_object(\$stmt) for each row in the result set.

Answer: A

Question: 5

An existing table has the definition shown below:
CREATE TABLE hr.employees (empid INTEGER NOT NULL PRIMARY KEY,deptno INTEGER,authid VARCHAR(255), salary DECIMAL (10,2), commission DECIMAL (5,3) DEFAULT 0,benefits XML) Only members of the HR_ADMIN group have privilege to SELECT, INSERT, UPDATE, or DELETE from the HR.EMPLOYEES table. A Web-based application is under development that connects to the database with a user's AUTHID and enables a user to see their record. No other records are visible. Which type of database object can be created by a member of the HR_ADMIN that provides the necessary information without changing the privileges on the HR.EMPLOYEES table?

- A. Trigger
- B. View
- C. Alias
- D. Index

Answer: B

Question: 6

The table shown below contains a large number of financial transactions: CREATE TABLE webstore.transactions (transaction_id INTEGER NOT NULL PRIMARY KEY, order_date TIMESTAMP NOT NULL, shipped_date TIMESTAMP, customer_id INTEGER NOT NULL, shipping_info XML NOT NULL, billing_info XML NOT NULL, invoice XML NOT NULL) Only members of the AUDIT_TEAM group have SELECT privilege on the WEBSTORE.TRANSACTIONS table. For appropriate supply-chain management, members of the INVENTORY_CONTROL group need to see the INVOICE document for each transaction that has a NULL SHIPPED_DATE, but are restricted from seeing any shipping or billing information. Which database object can a member of the AUDIT_TEAM group create to enable the INVENTORY_CONTROL group to access the information needed from WEBSTORE.TRANSACTIONS?

- A. Alias
- B. Sequence
- C. Trigger
- D. View

Answer: D

Question: 7

A database contains two tables with the same definition and authorities: PRODUCTION.SALESDATA and TEST.SALESDATA. The PRODUCTION.SALESDATA table contains business-critical information that is constantly changing; the TEST.SALESDATA table contains a snapshot of the PRODUCTION.SALESDATA table. Business rules require that applications under development access the TEST.SALESDATA table until ready for deployment. Once an application is deployed, it accesses the PRODUCTION.SALESDATA table. Which

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
