000-564

IBM

*Fundamentals Applying of Tivoli Storage Management
V3*

<http://www.ipass4sure.com/exams.asp?examcode=000-564>

The 000-564 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 000-564 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 000-564 exam is very challenging, but with our 000-564 questions and answers practice exam, you can feel confident in obtaining your success on the 000-564 exam on your FIRST TRY!

IBM 000-564 Exam Features

- Detailed questions and answers for 000-564 exam
- Try a demo before buying any IBM exam
- 000-564 questions and answers, updated regularly
- Verified 000-564 answers by Experts and bear almost 100% accuracy
- 000-564 tested and verified before publishing
- 000-564 exam questions with exhibits
- 000-564 same questions as real exam with multiple choice options

Acquiring IBM certifications are becoming a huge task in the field of I.T. More over these exams like 000-564 exam are now continuously updating and accepting this challenge is itself a task. This 000-564 test is an important part of IBM certifications. We have the resources to prepare you for this. The 000-564 exam is essential and core part of IBM certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 000-564 Test and save time and money while developing your skills to pass your IBM 000-564 Exam? Let us help you climb that ladder of success and pass your 000-564 now!

QUESTION: 1

Which difference is reflected in a gap analysis?

- A. between software versions
- B. between expected and actual results
- C. between storage capacity and actual usage
- D. between actual and projected labor requirements

Answer: B

QUESTION: 2

The proposed storage solution design must address the requirement for monitoring, discovery of new resources, and provide detailed information so that cost recovery (chargeback) of data resources can be accomplished. Which IBM product fulfills this requirement?

- A. IBM Tivoli Storage Productivity Center
- B. IBM Chargeback for Storage Networks
- C. IBM Tivoli Storage Manager for Chargeback
- D. IBM Tivoli Storage Manager for Enterprise Resource Planning

Answer: A

QUESTION: 3

What should be done to complete the Solution Project after collecting customer requirements and educational/experience level of personnel, creating a solution design and proposal, and presenting the solution proposal?

- A. have a formal IT Management sign-off on the purchase order
- B. schedule a formal service review with the chief operations officer and staff
- C. execute a formal review with the IT manager to confirm acceptance and solution compliance
- D. schedule a formal customer sign-off on the proposed Scope Document or Statement of Work

Answer: D

QUESTION: 4

Which query displays information about client node server storage utilization?

- A. AUDITLIBRARY
- B. AUDIT VOLUME
- C. QUERY STORAGE POOL
- D. QUERY AUDIT OCCUPANCY

Answer: D

QUESTION: 5

During the interview with the customer it is determined that there are no full time employees assigned to manage the storage infrastructure and that there will be a need for three IBM Tivoli Storage Manager (TSM) servers and over 2000 TSM clients. Which recommendation should be included in the education document?

- A. that the customer call IBM Support if they have trouble
- B. that the customer have their senior storage administrator administer the training
- C. that the customer transfer two existing employees to this department and begin training
- D. that the customer have their storage administrators work with IBM to schedule classes for the products to be implemented

Answer: D

QUESTION: 6

Which application shows data storage trending for the customer's storage requirements?

- A. IBM Tivoli Netcool
- B. IBM Tivoli Asset Manager
- C. IBM Tivoli Common Reporting
- D. IBM Tivoli Enterprise Monitoring

Answer: C

QUESTION: 7

A customer using IBM Tivoli Storage Manager (TSM) has the infrastructure and hardware necessary to recover the TSM server to a remote location. The procedure to recover the TSM server is documented in a Microsoft Word (MS Word) file in one of the UNIX administrator's laptop. Which recommendation should be documented and provided to the customer?

- A. Ask the UNIX administrator to send an e-mail to the IT organization with the MS Word file.
- B. Backup the MS Word file with TSM and restore it in the disaster recovery remote location daily.
- C. Post the MS Word file in a shared drive on one of the file and print servers on the remote location
- D. Configure Disaster Recovery Manager and document the procedure so it is part of the TSM database.

Answer: D

QUESTION: 8

A customer has two 5 TB MS SQL databases with critical data to the business. Which products should be recommended to the customer in order to run database backups online with optimal performance?

- A. IBM Tivoli Storage Manager (TSMJ for Databases and TSM API
- B. TSM for Databases and TSM for Storage Area Networks
- C. TSM for Databases and TSM for Enterprise Resource Planning
- D. TSM for Databases and IBM Tivoli Continuous Data Protection for Databases

Answer: B

QUESTION: 9

Which two pieces of information should be included in the description of the current storage Service Level Agreement (SLA)? (Choose two.)

- A. backup window
- B. age of hardware
- C. cost of maintenance
- D. data retention requirements
- E. roles and responsibilities documentation

Answer: A, ?

QUESTION: 10

A company is adding virtual machines to their environment. What is the most effective way to allow file level backups?

- A. VMware Consolidated Backup
- B. Volume Shadow Service Virtual Snapshot
- C. IBM Tivoli Storage Manager for Microsoft Hyper-V
- D. IBM Tivoli Storage Manager for Virtual Environments

Answer: D

QUESTION: 11

A customer environment is going through a lifecycle process where legacy applications and old backup infrastructure will be consolidated and migrated to an IBM Tivoli Storage Manager (TSM) backup environment. The consolidated applications consist of one Windows server containing small files and four LAN-free MS Exchange servers. The TSM environment is operating at 90% of its capacity and consists of one TSM server backing up to an IBM 3583 library with four LT04 drives. The current backup environment uses a GigE dedicated backup network. Which list of hardware components should be documented and provided to the customer in order to add the new servers to the backup infrastructure?

- A. four HBAs and additional LT04 drives
- B. five GigE NICs and additional LT04 drives
- C. one HBAs, four GigE NICs, and additional LT03 drives
- D. four HBAs, five GigE NICs, and additional LT04 drives

Answer: D

QUESTION: 12

The customer environment analysis has identified benefits by improving backup granularity. IBM Tivoli Storage Manager (TSM) FastBack can be integrated with IBM Tivoli Storage Manager to improve recovery. Which feature does TSM FastBack integration add to accomplish this?

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
