000-605

IBM

*WebSphere Enterprise Service Bus V7.0, Integration
Development*

<http://www.ipass4sure.com/exams.asp?examcode=000-605>

The 000-605 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 000-605 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 000-605 exam is very challenging, but with our 000-605 questions and answers practice exam, you can feel confident in obtaining your success on the 000-605 exam on your FIRST TRY!

IBM 000-605 Exam Features

- Detailed questions and answers for 000-605 exam
- Try a demo before buying any IBM exam
- 000-605 questions and answers, updated regularly
- Verified 000-605 answers by Experts and bear almost 100% accuracy
- 000-605 tested and verified before publishing
- 000-605 exam questions with exhibits
- 000-605 same questions as real exam with multiple choice options

Acquiring IBM certifications are becoming a huge task in the field of I.T. More over these exams like 000-605 exam are now continuously updating and accepting this challenge is itself a task. This 000-605 test is an important part of IBM certifications. We have the resources to prepare you for this. The 000-605 exam is essential and core part of IBM certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 000-605 Test and save time and money while developing your skills to pass your IBM 000-605 Exam? Let us help you climb that ladder of success and pass your 000-605 now!

Exam Name:	WebSphere Enterprise Service Bus V7.0, ntegration Development		
Exam Type:	IBM	Exam Code:	000-605
Certification	IBM WebSphere	Total Questions:	113

Question: 1

An integration developer has been tasked to develop a mediation module that integrates a legacy 2EE application deployed on a remote server. The legacy application is exposed through an EJB facade and the integration developer decides to use an EJB import. What is the most suitable approach to configure it? The integration developer should:

- A. Add the corresponding EJB client project to the module dependencies and select the EJB local interface for the import.
- B. Import the corresponding ejb client project into the workspace and select the ejb remote interface for the import.
- C. Create a wsdl interface with the same operations as the ejb interface, select it as the import interface and add the ejb jndi name in the binding section.
- D. Use the external service wizard to point to the ejb through its iiop url and the wizard automatically creates the interface and the business objects for the import.

Answer: B

Question: 2

A mediation module must be designed to participate in a transaction initiated by a client component. Which of the following settings should be used by the integration developer to meet the transaction requirements for the mediation module?

- A. Set the Transaction qualifier to False and the Join transaction qualifier to True.
- B. Set the Transaction qualifier to Global and the Join transaction qualifier to True.
- C. Set the Transaction qualifier to Local and the Join transaction qualifier to False.
- D. Set the Transaction qualifier to True and the Join transaction qualifier to True.

Answer: B

Question: 3

An integration developer is developing a mediation flow component to integrate PeopleSoft Enterprise. The integration developer has identified WebSphere Adapter for PeopleSoft Enterprise for this integration. Which technology specification is implemented by this adapter?

- A. Java EE Connector Architecture (JCA)
- B. Java EE Component Architecture (JCA)
- C. Java EE Connectivity Architecture (JCA)
- D. Java EE Communication Architecture (JCA)

Answer: A

Question: 4

An integration developer wants to access a database table on a DB2 database installed on an AIX system using a JDBC Adapter. Using the configuration wizard of the JDBC Outbound Adapter import, the integration developer is prompted for JAR files. Which kind of JAR files are required?

- A. AIX specific JAR files
- B. JDBC standard JAR files
- C. DB2 specific JAR files
- D. DB2 and AIX specific JAR files

Answer: C

Exam Name:	WebSphere Enterprise Service Bus V7.0, ntegration Development		
Exam Type:	IBM	Exam Code:	000-605
Certification	IBM WebSphere	Total Questions:	113

Question: 5

An integration developer is developing a mediation flow component using WebSphere Adapters. It is observed that the events are being delivered by multiple threads on several channels simultaneously. What type of event delivery mechanism is used?

- A. Ordered
- B. Unordered
- C. Persistent
- D. Non-persistent

Answer: B

Question: 6

An integration developer is developing a mediation module using the WebSphere Integration Developer. The mediation module interacts with different databases, via the database lookup mediation primitive and an Enterprise Information system (EIS) binding. It is expected that during the lifetime of this solution, the databases connection details will change. The customer wants to avoid downtime of the applications as much as possible. What is the BEST way for the integration developer to implement a solution so that when database connection details change, downtime is minimized?

- A. Update the details of the database connections, then deploy the updated EAR file.
- B. Define the various database connection details as WebSphere Variables. When a change in the connection details occurs, update the WebSphere Variables on the server and restart the server.
- C. Define the various database connections used as JNDI names. When a change in the connection details occurs, update the JNDI details on the server and restart the application.
- D. Define a properties file for the application to load on startup. When a change in the connection details occurs, update the details in the properties file and restart the application.

Answer: C

Question: 7

A client wants to invoke a mediation module that contains a mediation flow. Which of the following export bindings with Request-Response interface will ensure that the mediation flow is invoked asynchronously with callback by the client?

- A. HTTP
- B. Web services (SOAP/JMS)
- C. Web services (SOAP/HTTP)
- D. WebSphere MQ or WebSphere MQ-JMS

Answer: D

Question: 8

Refer to the Exhibits.

Exam Name:	WebSphere Enterprise Service Bus V7.0, Integration Development		
Exam Type:	IBM	Exam Code:	000-605
Certification	IBM WebSphere	Total Questions:	113

Exhibit A

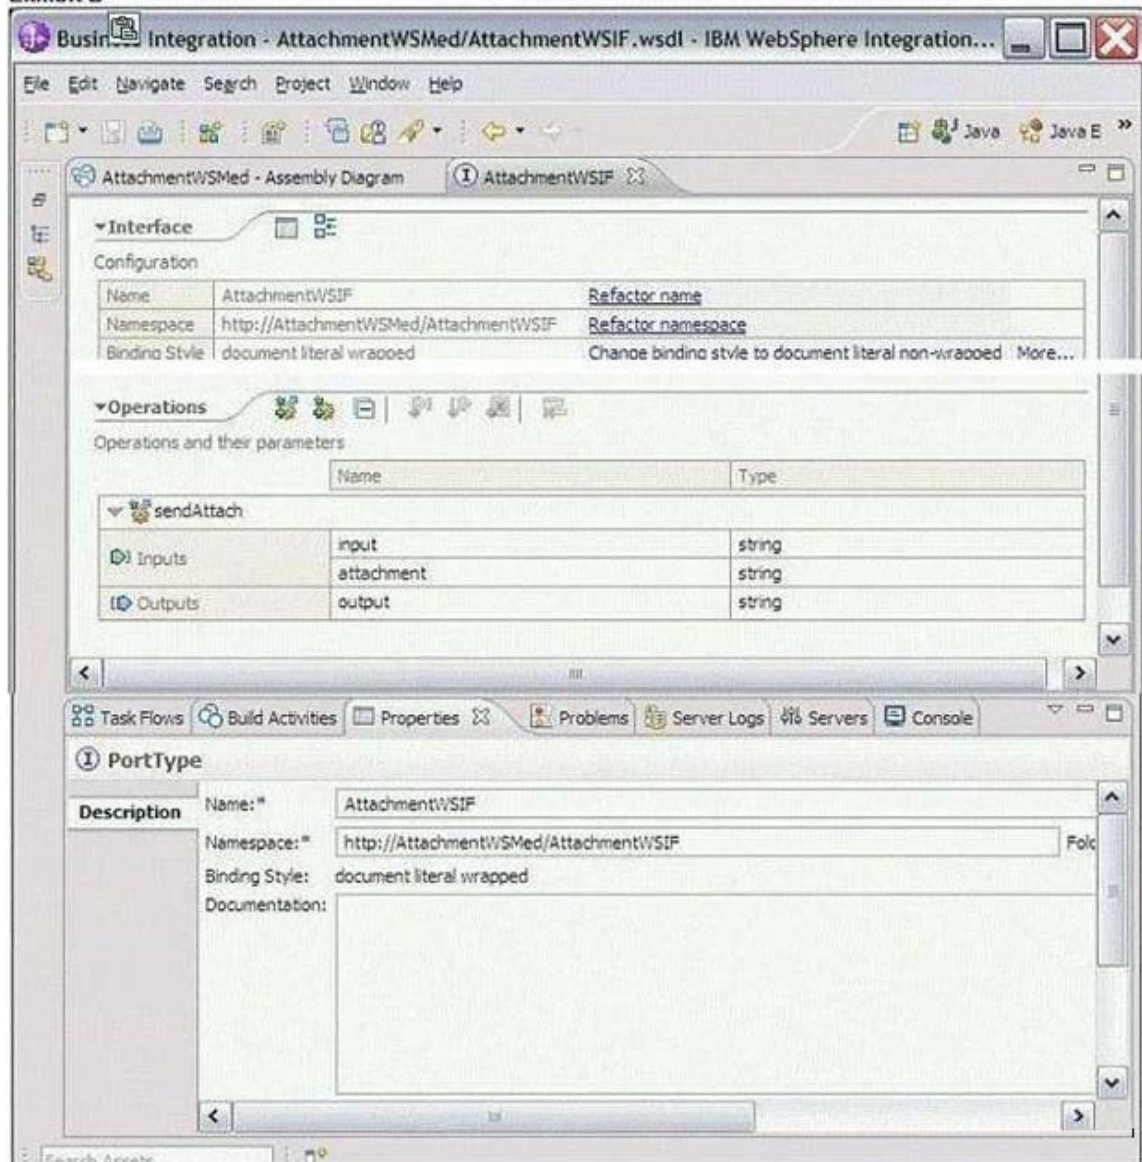

Exhibit B

An integration developer needs to implement an application to manage the reception of resumes for a job application. The application must allow the applicant to attach a photo in jpeg format. The integration developer decides to create a mediation module exposed through a Web Service Export binding using SOAP with Referenced Attachments to save the photo to a database and send the rest of the data to a business process for further processing. Exhibit A shows the

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
