000-665

IBM

Test665.Architectural Design of SOA Solutions

<http://www.ipass4sure.com/exams.asp?examcode=000-665>

The 000-665 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 000-665 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 000-665 exam is very challenging, but with our 000-665 questions and answers practice exam, you can feel confident in obtaining your success on the 000-665 exam on your FIRST TRY!

IBM 000-665 Exam Features

- Detailed questions and answers for 000-665 exam
- Try a demo before buying any IBM exam
- 000-665 questions and answers, updated regularly
- Verified 000-665 answers by Experts and bear almost 100% accuracy
- 000-665 tested and verified before publishing
- 000-665 exam questions with exhibits
- 000-665 same questions as real exam with multiple choice options

Acquiring IBM certifications are becoming a huge task in the field of I.T. More over these exams like 000-665 exam are now continuously updating and accepting this challenge is itself a task. This 000-665 test is an important part of IBM certifications. We have the resources to prepare you for this. The 000-665 exam is essential and core part of IBM certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 000-665 Test and save time and money while developing your skills to pass your IBM 000-665 Exam? Let us help you climb that ladder of success and pass your 000-665 now!

Question: 1

Data federation is often cited as a data integration alternative to a data consolidation approach (i.e., data warehouse). Which of the following is the best reason to adopt a data federation versus data consolidation approach?

- A. The set of data to be queried by the end-user is known in advance.
- B. Data security, licensing restrictions, or industry regulations restrict data movement.
- C. Complex transformation is required to achieve semantically consistent data.
- D. Security requirements are more easily implemented using a federated approach.

Answer: B

Question: 2

In which of the following situations is transport level security most appropriate?

- A. If the SOA solution requires assured transport delivery
- B. If the SOA solution requires security for all messages across a network
- C. If the SOA solution is not exposed to outside business partners
- D. If the SOA solution requires decoupling security from the message content

Answer: B

Question: 3

A set of existing application functionality is to be exposed as services, so that this functionality becomes available across the enterprise. The existing functions can exchange text messages with clients over WebSphere MQ. What is the best approach to integrate these functions into an SOA?

- A. Let clients send text messages directly to the function via WebSphere MQ.
- B. Change the existing application to be able to handle XML formatted data.
- C. Create an additional Web service interface for the function and perform the transformation from XML to text message there.
- D. Use the transformation capabilities of XSLT style sheets at the client end.

Answer: C

Question: 4

A customer wants to build an SOA solution that allows client requests from .NET or MQ to be dynamically routed based on message contents to service providers implemented on CICS and external Web service providers. Which two of the following solution options are recommended?

- A. WebSphere Process Server for message routing and CICS Transaction Gateway
- B. WebSphere Message Broker for MQ and Web Services connectivity and CICS MQ Adapter
- C. WebSphere Partner Gateway for message routing and MQ connectivity to CICS
- D. WebSphere Interchange Server for message routing and WebSphere Adapters for CICS integration
- E. WebSphere ESB for message routing and CICS Transaction Gateway

Answer: B, E

Question: 5

Which two of the following standards/specifications best describe IBM's SOA programming model?

- A. Service Component Architecture

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
