000-715

IBM

M Alphablox

The 000-715 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 000-715 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 000-715 exam is very challenging, but with our 000-715 questions and answers practice exam, you can feel confident in obtaining your success on the 000-715 exam on your FIRST TRY!

IBM 000-715 Exam Features

- - Detailed questions and answers for 000-715 exam
- - Try a demo before buying any IBM exam
- - 000-715 questions and answers, updated regularly
- - Verified 000-715 answers by Experts and bear almost 100% accuracy
- - 000-715 tested and verified before publishing
- - 000-715 exam questions with exhibits
- - 000-715 same questions as real exam with multiple choice options

Acquiring IBM certifications are becoming a huge task in the field of I.T. More over these exams like 000-715 exam are now continuously updating and accepting this challenge is itself a task. This 000-715 test is an important part of IBM certifications. We have the resources to prepare you for this. The 000-715 exam is essential and core part of IBM certifications and once you clear the exam you will be able to solve the real life problems yourself.Want to take advantage of the Real 000-715 Test and save time and money while developing your skills to pass your IBM 000-715 Exam? Let us help you climb that ladder of success and pass your 000-715 now!

Question: 1
A customer finds that DB2 Alphablox is running out of memory due to DB2 Alphablox cubes using large amounts of memory. The customer does not want to restructure the application. Which two of the following actions should the customer take to correct this? (Select Two Answers)

A - Limit the size of the in-memory cache for each cube.
B - Install a second instance of Alphablox on the same machine.
C - Decrease the memory capacity of the computer in which DB2 Alphablox runs.
D - Limit the number of Alphablox applications running at one time via the Alphablox
     Administration panel.
E - Select the Dynamic (Members loaded into memory as needed) option and change the
     Dynamic Member Cache Settings.

Answer: A, E

Question: 2
A customer desires to customize and personalize the appearance or Alphablox components on their web pages based on a user's profile. Many aspects or the user's profile are already stored in various locations. To pull these together, the customer is considering using Alphablox's support for custom properties. Which of the following is the correct statement based on this situation?

A - DB2 Alphablox does not currently support the consolidation of user properties from various
     locations due to the current RepositoryBlox interface limitations.
B - The customer will need to purchase another product, such as WebSphere Information
     Integrator, to pull together various profile settings stored in the various locations for each user.
C - If the customer is using LDAP-based User Manager or other external user manager (such as
     NTLM) that has its own editor, the customer can select between External Repository and
     Local Repository under Property Name on the Alphablox Admin Pages Custom Properties
     section.
D - If the customer configures DB2 Alphablox to use a relational database as the Alphablox
     Repository storage mechanism, this type of activity can successfully be accomplished within
     the Custom Properties area on the Alphablox Admin Pages without additional data movement
     from the various locations

Answer: C

Question: 3
A customer has a large number of relational databases. Alphablox supports relational database connection pooling using the Application Server Data Source adapter. In order to take advantage of this feature within Alphablox, the customer must choose from a list of Application Servers to install Alphablox into for this feature to be available. Which of the following options list Application Servers that can use this Data Source adapter?

A - WebLogic and WebSphere Application Server
B - WebLogic, WebSphere Application Server, and JBoss
C - WebLogic, Apache Tomcat, and WebSphere Application Server
D - WebSphere Portal Server, WebSphere Application Server, Apache Tomcat, and
     WebLogic

Answer: A

Question: 4
Which of the following statements will help a customer who is new to web applications evaluate the integration options provided by Alphablox for user management?

A - Alphablox provides three out-of-the-box solutions for security and personalization: Alphablox Repository-based User Manager, LDAP-based User Manager, and an NTLM User Manager.
B - Alphablox provides two out-of-the-box solutions for security and personalization: Alphablox Repository-based User Manager and LDAP-based User Manager.
C - Users, groups, and roles are accessible programmatically through the server-side RepositoryBlox API.
D - Users and roles are accessible programmatically through the server-side RepositoryBlox API.

Answer: B

Question: 5
A customer currently has data in a relational database. The end users require the ability to drill up and drill down to a desired level or detail within the data. So, Alphablox administrator will review the data to see if it is fit for use with the built-in Alphablox Cube Engine. In order to use the relational data with the Alphablox Cube Engine, the data needs to be in which of the following? (Select Three Answers)

A - A single table
B - A star schema
C - A snowflake schema
D - A stored procedure
E - A set or multiple fact tables representing a single cube
F - A set of non-related tables in a relational database

Answer: A, B, C

Question: 6
Alphablox is certified to run on certain versions or the Linux operating system. However, there are certain limitations that must be recognized when using this operating system with Alphablox. Which of the following statements are correct limitations imposed on Alphablox under the Linux operating system? (Select Three Answers)

A - 64-bit Linux systems are not currently supported by Alphablox.
B - Alphablox running on Linux on z-Series hardware has a known memory size limitation.
C - The X11 libraries must be installed on the Linux system for Alphablox to start up correctly.
D - BEA WebLogic application servers are not currently supported by Alphablox on Linux servers.
E - Linux on Intel x86 processors are required as a certified environment for Alphablox.
F - Microsoft DLEDB is currently not ported to Linux which prevents access to Microsoft Analysis Services as a data source for Alphablox when running on Linux.

Answer: C, D, F

Question: 7
It is important to use version labels in the Alphablox application's source control system in order to do which of the following?

A - Establish a name for the project.
B - Check out a file for modification.
C - Check in new or modified source files.
D - Recreate a deployed version of the application.

Answer: D

Question: 8

A customer is using the Alphablox database repository on their production server and wants to schedule regular, automatic backups for the repository. Which of the following tools should be recommended to the customer to accomplish this goal?

A - The DB2 Alphablox content manager.
B - The DB2 Alphablox Administration web pages.
C - The native database's backup/recovery tools.
D - 0The DB2 Alphablox repository conversion utility.

Answer: C

Question: 9
Which of the following Alphablox EAR files must be installed on the application server in order to use Alphablox?

A - AlphabloxAdmin
B - Alphabloxserver
C - ApplicationStudio
D - AlphabloxPlatform

Answer: D

Question: 10
A customer is upgrading a production standalone, file-based repository installation of DB2 Alphablox to a horizontal cluster configuration. What basic steps need to be performed to preserve existing applications and configuration settings?

A - Copy the repository and applications to the lead cluster server node.
B - Convert the repository to a database and redeploy all web applications to the cluster.
C - Add the standalone server as a cluster node and the repository and applications will be shared.
D - Point all DB2 Alphablox servers at the existing file-based repository and redeploy all web applications to the cluster.

Answer: B

Question: 11
Performance testing tools such as Rational Robot and LoadRunner can be used to test Alphablox performance using which of the following?

A- JavaScript
B- Java
C- HTTP
D- HTML

Answer: C

Question: 12
Which of the following is the best way to ensure successful migration of applications from a test environment to a production environment?

A - Make sure the production server has the latest versions of all software.
B - Make sure the test server has the latest versions of all software.
C - Keep the test and production servers at the same software levels.
D - Keep the test and production servers at different software levels.

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of Professional & Certified Experts available via support.
- Free 90 days updates to match real exam scenarios.
- Instant Download Access! No Setup required.
- Price as low as $19, which is 80% more cost effective than others.
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (Android, iPhone, iPod, iPad)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- *Guaranteed Success*.
- **Fast**, helpful support 24x7.
