IBM

IBM PureFlex Technical Expert V1 Exam

The 000-784 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 000-784 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 000-784 exam is very challenging, but with our 000-784 questions and answers practice exam, you can feel confident in obtaining your success on the 000-784 exam on your FIRST TRY!

IBM 000-784 Exam Features

   - Detailed questions and answers for 000-784 exam
   - Try a demo before buying any IBM exam
   - 000-784 questions and answers, updated regularly
   - Verified 000-784 answers by Experts and bear almost 100% accuracy
   - 000-784 tested and verified before publishing
   - 000-784 exam questions with exhibits
   - 000-784 same questions as real exam with multiple choice options

Acquiring IBM certifications are becoming a huge task in the field of I.T. More over these exams like 000-784 exam are now continuously updating and accepting this challenge is itself a task. This 000-784 test is an important part of IBM certifications. We have the resources to prepare you for this. The 000-784 exam is essential and core part of IBM certifications and once you clear the exam you will be able to solve the real life problems yourself.Want to take advantage of the Real 000-784 Test and save time and money while developing your skills to pass your IBM 000-784 Exam? Let us help you climb that ladder of success and pass your 000-784 now!

QUESTION: 1
A client has purchased a Flex System with a Flex System Manager (FSM) and a p260 node. Which of the following is the most cost-effective procedure to install the VIO server?

A. Engage Lab Services to complete the installation
B. Use the external USB DVD RAM that IBM delivers with a Flex System
C. Copy the VIO ISO images onto the FSM and use the installios command
D. Launch the Remote Control from the FSM and remote mount the VIO ISO images from your workstation

Answer: C

QUESTION: 2
A client requires the following management functions of their PureFlex environment:

```
Secure boot: TPM and CRTM
Signed firmware updates to ensure authenticity
Chassis and compute node detection and provisioning
Security policy management
Discover network devices in your environment
Monitor the health and status of network devices
Manage devices by groups:
Ethernet switches, Fibre Channel over Ethernet, or Subnet Discovery of physical and virtual storage devices
Support for virtual images on local storage across multiple chassis
Inventory of physical storage configuration
Storage pool configuration
Disk sparing and redundancy management
Virtual volume management
Support for virtual volume discovery, inventory, creation, modification, and deletion
```

Which management function is used to execute these tasks?

A. IBM PowerSC
B. IBM SmartCloud Entry
C. IBM Flex System Manager
D. IBM Chassis Management Module

Answer: C

QUESTION: 3
A client has a PureFlex system and needs to upgrade their Flex System V7000 Storage Node. Which interface would be used to accomplish this?

A. FSM

B. BIOS upgrade
C. Chassis Manager
D. Flex Node Interface GUI

Answer: A

QUESTION: 4
The client seeks to reduce cost and complexity in a highly virtualized x86 environment. They want the network policies to migrate automatically along with mobile virtual machines to ensure that security, performance and access remains intact as virtual machines move from server to server. VMware is their virtualization standard. Which option will provide a complete solution?

A. Switches capable to support 802.1 QBG
B. Cisco Nexus 1000V on IBM VMready Switches
C. IBM Switch-resident IBM VMready capability
D. IBM Software Defined Networking (SDN) for Virtual

Answer: D

QUESTION: 5
A Managed Service Provider (MSP) is looking for a platform on which to base their rapidly growing offerings. Their offerings include pre-packaged solutions for virtual computing, virtual desktop, virtual storage, general application support, and IaaS. They distinguish themselves with the ease of use of their user portal and services catalog, as well as offering a variety of service level agreements. Customers include gaming, financial, retail, health industries, government, telecommunications, and application developers.

The organization has a very strong technical skill base with an in-house development culture.

Key decision criteria includes rapid automated provisioning, multi-tenancy, isolation, security, billing and metering based on allocation and usage, and pay-as-you-grow scalability. High availability and disaster recovery are essential. They have a strong interest in KVM and Open Source to minimize cost, and exploit their core skills.

The current networking infrastructure is based upon Juniper switches and security devices.

They are currently considering IBM PureSystems and VCE Vblock, as well as non-integrated alternatives.

A client wants to provide a Flex solution that compares to a standard Power 750 running PowerVM and AIX. The client asks for a Flex System compute node with similar capacity and scalability for processor and memory. Which node should be discussed with the prospect?

A. Flex node p270
B. Flex node p24L
C. Flex node p260
D. Flex node p460

Answer: D

QUESTION: 6
A client has a need for a Linux based solution that requires a large amount of memory. The application runs on either x86 or Power nodes. Which of the following nodes would provide the maximum memory configuration?

A. p460
B. x440
C. p24L
D. x240

Answer: B

QUESTION: 7
A client has a number of Power servers that are virtualized and boot from FC SAN with dual VIO servers. The client is considering consolidation of server and network hardware (LAN and SAN) while maximizing the return on investment by leveraging existing shared FC storage. Which option meets the client requirements?

A. Utilize FCoE to boot the VIO servers
B. Utilize iSCSI to boot the VIO servers
C. Continue to use FC SAN for the VIO servers
D. Use a pair of internal drives to provide for the VIO servers

Answer: A

QUESTION: 8
The IBM Flex System Interoperability Guide is a handy reference document but its information is only as accurate as of its most recent publication date. Where would the technical expert find the latest complete information on supported FCoE configurations?

Get Certified

Pass4sure Certification Exam Features;

- Pass4sure offers over **4500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **150** Global Certification Vendors Covered.
- Services of Professional & Certified Experts available via support.
- Free 90 days updates to match real exam scenarios.
- Instant Download Access! No Setup required.
- Price as low as $19, which is 80% more cost effective than others.
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (Android, iPhone, iPod, iPad)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- *Guaranteed Success*.
- **Fast**, helpful support 24x7.
