000-806

IBM

*IBM WebSphere Application Server Network Deployment
V6.1, Advanced Administration*

<http://www.ipass4sure.com/exams.asp?examcode=000-806>

The 000-806 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 000-806 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 000-806 exam is very challenging, but with our 000-806 questions and answers practice exam, you can feel confident in obtaining your success on the 000-806 exam on your FIRST TRY!

IBM 000-806 Exam Features

- Detailed questions and answers for 000-806 exam
- Try a demo before buying any IBM exam
- 000-806 questions and answers, updated regularly
- Verified 000-806 answers by Experts and bear almost 100% accuracy
- 000-806 tested and verified before publishing
- 000-806 exam questions with exhibits
- 000-806 same questions as real exam with multiple choice options

Acquiring IBM certifications are becoming a huge task in the field of I.T. More over these exams like 000-806 exam are now continuously updating and accepting this challenge is itself a task. This 000-806 test is an important part of IBM certifications. We have the resources to prepare you for this. The 000-806 exam is essential and core part of IBM certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 000-806 Test and save time and money while developing your skills to pass your IBM 000-806 Exam? Let us help you climb that ladder of success and pass your 000-806 now!

Question: 1

Which statement is true about designing highly available infrastructures based on WebSphere Application Server ND V6.1 clusters?

- A. A stand-alone server topology provides the greatest amount of process isolation and therefore is the most effective building block in combination with other stand-alone servers for building a highly resilient cluster based infrastructure.
- B. A horizontal scaling topology provides the greatest opportunity to implement efficient use of single machine processing power so that should there be a failover in that environment, there will be sufficient capacity available for the remaining nodes to pick up the workload from the failed node.
- C. A vertical scaling topology provides the greatest opportunity to implement efficient use of machine processing power so that should there be failover in that environment, there is sufficient capacity available for the remaining cluster members to pick up the workload from the failed cluster member.
- D. A horizontal scaling topology provides the greatest amount of process isolation and therefore is the most effective building block in combination with other stand-alone servers for building a highly resilient cluster based infrastructure.

Answer: C

Question: 2

An administrator is configuring a cluster bus destination on a cluster with five members on five different physical machines. The administrator will configure two messaging engines which may be run on any of the five cluster members. What is the simplest configuration for the messaging engines' data stores that still ensures proper fail over?

- A. A file-based data store in the config directory that is kept in sync on all cluster members by the deployment manager
- B. A single remote database accessible by all cluster members with one schema to be shared by the messaging engines
- C. A single remote database accessible by all cluster members with two schemas
- D. Two remote databases accessible by all cluster members

Answer: C

Question: 3

A WebSphere Application Server ND V6.1 administrator has been asked to set up cache replication for an application. The application team wants to make sure it does not lose any cache data that is generated. What would make losing cache data least likely to happen?

- A. Full group replication
- B. Enable disk offload
- C. Push only
- D. Flush to disk

Answer: B

Question: 4

A WebSphere Application Server ND V6.1 administrator recently added a new cluster member. When the administrator checked the status of the servers in the cluster, they noticed the cluster showing a state of partially started. What does that mean?

- A. All cluster members are running, but the node agents have not been started.

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
