000-875

IBM

IBM Tivoli Federated Identity Manager V6.0 Implementation

The 000-875 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 000-875 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 000-875 exam is very challenging, but with our 000-875 questions and answers practice exam, you can feel confident in obtaining your success on the 000-875 exam on your FIRST TRY!

IBM 000-875 Exam Features

   - Detailed questions and answers for 000-875 exam
   - Try a demo before buying any IBM exam
   - 000-875 questions and answers, updated regularly
   - Verified 000-875 answers by Experts and bear almost 100% accuracy
   - 000-875 tested and verified before publishing
   - 000-875 exam questions with exhibits
   - 000-875 same questions as real exam with multiple choice options

Acquiring IBM certifications are becoming a huge task in the field of I.T. More over these exams like 000-875 exam are now continuously updating and accepting this challenge is itself a task. This 000-875 test is an important part of IBM certifications. We have the resources to prepare you for this. The 000-875 exam is essential and core part of IBM certifications and once you clear the exam you will be able to solve the real life problems yourself.Want to take advantage of the Real 000-875 Test and save time and money while developing your skills to pass your IBM 000-875 Exam? Let us help you climb that ladder of success and pass your 000-875 now!

QUESTION 1

What simple command is used to determine if an IBM LDAP server is listening and servicing queries?

A. ping
B. ldapcfg
C. ldapmodify
D. ldapsearch

Answer: D

QUESTION 2

Consider a scenario where RBBenefits is acting as a Service Provider (SP) and RBTelco is acting as an Identity Provider (IDP), where Certkiller has RBTelco has her Identity Provider (IDP). Assume that Certkiller has not federated her account at RBBenefits with RBTelco.
Certkiller requests a resource at a RBBenefits through a bookmarked URL? How will the RBBenefits know which of its many identity provider partners will act as Certkiller's Identity Provider (IDP) for Single Sign-On purposes?

A. RBBenefits will generate a list of all its known IDPs and present this in a page to Certkiller so that Certkiller can select her preferred IDP.
B. RBBenefits will request a Single Sign-On authentication for Certkiller from all known IDPs through front channel communications (via redirection through Certkiller's browser) and select the first IDP that does not fail.
C. RBBenefits will post a response to Certkiller with a message that her IDP has not yet notified RBBenefits with Certkiller's federation information. Certkiller will be instructed to try to access the RBBenefits resources in 24 hours.
D. RBBenefits will request a Single Sign-On authentication for Certkiller from all known IDPs using back channel communications. The first IDP that is able to generate a successful authentication response is used as Certkiller's IDP.

Answer: A

QUESTION 3

Which utility will stop the IBM Tivoli Directory Server?

A. ldapxcfg
B. ldapstop
C. ibmdirctl
D. ibmslapd -stop

Answer: C

QUESTION 4
You have installed Integrated Service Console onto a host with DNS name Certkiller 1.
Using the system defaults, what is the correct URL you must use to verify the
installation?

A. http:// Certkiller 1:8421/isc/console
B. http:// Certkiller 1:8421/fim/console
C. http:// Certkiller 1:8421/ibm/console
D. http:// Certkiller 1:8421/console/ibm/

Answer: C

QUESTION 5
What do the IBM Extensions to the SAML Single Sign-On (SSO) protocol enable?

A. the SSO profile to be specified in the SSO Trigger
B. an SSO exchange to be initiated from the Service Provider
C. signed messages to be passed over the SOAP backchannel
D. additional identity mapping information to be passed in the SAML message

Answer: A

QUESTION 6
Which WebSphere Application Server command is used to install Service integration
Web services enablement (SIBWS)?

A. wsadmin
B. ejbdeploy
C. uddiDeploy
D. wasprofile

Answer: A

QUESTION 7
Consider the following scenario involving customers of companies RBTelco and
RBBenefits.
RBTelco is a large multinational company that outsources health care benefit
management to RBBenefits.
RBTelco employees access RBBenefits resources through an authenticate-able account at
each company.
RBTelco employees are being moved to a federated environment. Employees will access
RBBenefits's resources using Single Sign-On. When Single Sign-On is enabled, all
RBTelco employees will be migrated to the federated Single Sign-On implementation.
RBTelco employees will have access to RBBenefits's resources based on his or her
RBTelco authentication. After the migration, ALL access to RBBenefits's resources will
be by Single Sign-On from RBTelco direct authentication to RBBenefits by a RBTelco

employee will not be possible.

RBBenefits requires that RBTelco identify each employee with an alias that is based on a mathematical function using the employee number, social insurance number, and several other variables (shared between RBTelco and RBBenefits only).

They will use a Liberty ID-FF 1.2 Browser/POST approach for Single Sign-On between companies. The number of machines required to support this environment when each machine is an Intel-based processor with 1GB RAM, 10 GB hard drive, and RHEL 30 is:

A. 2 = (TAMeB WebSEAL on one machine) + (remainder TAMeB and all ITFIM components on one machine)

B. 3 = (TAMeB WebSEAL on one machine) + (remainder TAMeB on one machine) + (all ITFIM components on one machine)

C. 3 = (TAMeB WebSEAL on one machine) + (remainder TAMeB and ITFIM runtime/management on one machine) + (remainder ITFIM on one machine)

D. 2 = (TAMeB WebSEAL and IBM Tivoli Federated Identity Manager (ITFIM) runtime/management on one machine) + (remainder TAMeB and ITFIM on one machine)

Answer: C

QUESTION 8
You are configuring a IBM Tivoli Federated Identity Manager (ITFIM) Web Services Security Management environment at the service provider. You need to add two partners, P1 and P2, both who whom will be accessing the application A3.

A3 is deployed as a web service using RAD. Web Services requests to A3 will be required to be received over SSL and will have body-level encryption on the SOAP message. Access to A3 will require a JAAS login content based on a SAML 11 assertion defining the requestor.

Partner P1 is able to issue a SAML 10 assertion with an attribute statement containing one attribute, the user's role (as previously agreed upon between P1 and the service provider).

Partner P2 is able to issue a SAML 11 assertion with an attribute statement containing a list of roles that the requestor currently has.

The service provider will map the partner asserted role(s) into a locally valid identity assigned to the requestor and will use this identity for the JAAS login process.

Which two statements is a true statement of the configuration requirements on this overall environment? (Choose two.)

A. Partner P2 will be deployed to ITFIM (using wsdl2tfim) and will require the parameters of the incoming token types (SAML 11 assertion type).

B. Partner P1 will be deployed to ITFIM (using the console) and will require the parameters of the incoming token type (SAML10 assertion type).

C. Partner P2 will be deployed to ITFIM (using the console) and will require the parameters of the incoming token types (SAML 11 assertion type).

D. Partner P1 will be deployed to ITFIM (using wsdl2tfim) and will require the parameters of the incoming token type (SAML10 and SAML 11 assertion types).

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of Professional & Certified Experts available via support.
- Free 90 days updates to match real exam scenarios.
- Instant Download Access! No Setup required.
- Price as low as $19, which is 80% more cost effective than others.
- Verified answers researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (Android, iPhone, iPod, iPad)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- *Guaranteed Success*.
- **Fast**, helpful support 24x7.
