000-913

IBM

Informix 4GL Development

<http://www.ipass4sure.com/exams.asp?examcode=000-913>

The 000-913 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 000-913 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 000-913 exam is very challenging, but with our 000-913 questions and answers practice exam, you can feel confident in obtaining your success on the 000-913 exam on your FIRST TRY!

IBM 000-913 Exam Features

- Detailed questions and answers for 000-913 exam
- Try a demo before buying any IBM exam
- 000-913 questions and answers, updated regularly
- Verified 000-913 answers by Experts and bear almost 100% accuracy
- 000-913 tested and verified before publishing
- 000-913 exam questions with exhibits
- 000-913 same questions as real exam with multiple choice options

Acquiring IBM certifications are becoming a huge task in the field of I.T. More over these exams like 000-913 exam are now continuously updating and accepting this challenge is itself a task. This 000-913 test is an important part of IBM certifications. We have the resources to prepare you for this. The 000-913 exam is essential and core part of IBM certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 000-913 Test and save time and money while developing your skills to pass your IBM 000-913 Exam? Let us help you climb that ladder of success and pass your 000-913 now!

Question: 1

If DEFER INTERRUPT is set at the beginning of the application, why must your application set int_flag to FALSE before an INPUT statement is executed?

- A. The interrupt key will be disabled until int_flag is set to FALSE.
- B. The application will immediately exit if the user presses the interrupt key.
- C. An error will occur if int_flag is not reset to FALSE and the user presses the interrupt key.
- D. The application will not be able to determine if the user presses the interrupt key if int_flag is not reset to FALSE.

Answer: D

Question: 2

Click the Exhibit button to view the exhibit. Given the code in the exhibit, what will be the state of the database if the procedure st_update succeeds and st_insert fails?

```
BEGIN WORK
EXECUTE st_update
IF SQLCA.SQLCODE < 0 THEN
  ROLLBACK WORK
ELSE
  EXECUTE st_insert
  IF SQLCA.SQLCODE < 0 THEN
    ROLLBACK WORK
  ELSE
    COMMIT WORK
  END IF
END IF
```

- A. It depends on the ANSI MODE state of the database.
- B. The changes made by st_update and st_insert are not reflected.
- C. The changes made by st_insert will be in place, but not those of st_update.
- D. The changes made by st_update will be in place, but not those of st_insert.

Answer: B

Question: 3

The FOREACH statement is used in conjunction with the DISPLAY ARRAY statement to do what?

- A. to load elements from a program array into a DISPLAY statement
- B. to allow the user to choose multiple elements from the screen array
- C. to open a cursor, fetch all rows into a program array, and close the cursor
- D. to scroll through all of the rows displayed on the form from the program array

Answer: C

Question: 4

Which parts of the DISPLAY ARRAY statement are always required?

- A. ON KEY keywords
- B. screen array name
- C. program array name

- D. END DISPLAY keywords
- E. DISPLAY ARRAY keywords
- F. BEFORE DISPLAY keywords

Answer: B, C, E

Question: 5

What can the arr_count() library function be used to determine?

- A. the current position in the screen array
- B. the current position in the program array
- C. the number of elements in the screen array
- D. the number of elements in the program array

Answer: D

Question: 6

Which features are unique to the INPUT ARRAY statement?

- A. BEFORE/AFTER ROW clause
- B. BEFORE/AFTER INPUT clause
- C. BEFORE/AFTER FIELD clause
- D. BEFORE/AFTER DELETE clause
- E. BEFORE/AFTER INSERT clause

Answer: A, D, E

Question: 7

Which statement is syntactically correct?

- A. INPUT ARRAY ga_manufact FROM sa_manufact.*
- B. INPUT ARRAY ga_manufact[*] FROM sa_manufact
- C. INPUT ARRAY ga_manufact.* FROM sa_manufact.*
- D. INPUT ARRAY ga_manufact[,*] FROM sa_manufact.*

Answer: A

Question: 8

SQL statements being prepared for performance reasons should be prepared

- A. just before the SQL statement is to be executed or opened
- B. in an initialization function at the top of each 4GL module
- C. at the top of each function containing the EXECUTE or OPEN statement
- D. in an initialization function in the module containing the MAIN function

Answer: B

Question: 9

Why will preparing SELECT statements increase their execution speed?

- A. SELECT statements can NOT be prepared.
- B. The rows of the tables being selected will be cached in memory if the statement is prepared.
- C. Prepared statements are checked for syntax and optimized at prepare time, not at execution time.

D. Memory is allocated for the results set which will be returned from the SELECT statement at prepare time.

Answer: C

Question: 10

Place holders for program variables to be supplied later may be used in PREPARE statements in which locations?

- A. in the TABLE name
- B. in the WHERE clause
- C. in the ORDER BY statement
- D. in the SET clause of UPDATE statements
- E. in the VALUES clause of INSERT statements

Answer: B, D, E

Question: 11

Click the Exhibit button to view the exhibit Given the exhibit, which is the correct syntax for executing the INSERT statement?

```
DATABASE stores7

MAIN
  DEFINE stock_rec like stock.*
  DEFINE prep_var CHAR(200)

  LET prep_var1 = "INSERT INTO stock VALUES
  (? , ? , ? , ? , ? , ? )"
  PREPARE ex_stmt1 from prep_var1

  LET prep_var2 = "UPDATE stock ",
  "SET description = ? , ",
  "      unit_price = ? ",
  "WHERE stock_num = ? and manu_code = ?"
  PREPARE ex_stmt2 from prep_var2

  . . .

END MAIN
```

- A. EXECUTE ex_stmt1
- B. EXECUTE prep_var1
- C. EXECUTE ex_stmt1 USING stock.*
- D. EXECUTE prep_var1 USING stock.*
- E. EXECUTE ex_stmt1 USING stock_rec.*
- F. EXECUTE prep_var1 USING stock_rec.*

Answer: E

Question: 12

Where will a 4GL program search for a compiled form file during an OPEN

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
