000-S02

IBM

DR550 Technical Mastery

<http://www.ipass4sure.com/exams.asp?examcode=000-S02>

The 000-S02 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 000-S02 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 000-S02 exam is very challenging, but with our 000-S02 questions and answers practice exam, you can feel confident in obtaining your success on the 000-S02 exam on your FIRST TRY!

IBM 000-S02 Exam Features

- Detailed questions and answers for 000-S02 exam
- Try a demo before buying any IBM exam
- 000-S02 questions and answers, updated regularly
- Verified 000-S02 answers by Experts and bear almost 100% accuracy
- 000-S02 tested and verified before publishing
- 000-S02 exam questions with exhibits
- 000-S02 same questions as real exam with multiple choice options

Acquiring IBM certifications are becoming a huge task in the field of I.T. More over these exams like 000-S02 exam are now continuously updating and accepting this challenge is itself a task. This 000-S02 test is an important part of IBM certifications. We have the resources to prepare you for this. The 000-S02 exam is essential and core part of IBM certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 000-S02 Test and save time and money while developing your skills to pass your IBM 000-S02 Exam? Let us help you climb that ladder of success and pass your 000-S02 now!

Question: 1

When stopping the cluster service on a dual node DR550 system, which of the following statements is true?

- A - Cluster services can be stopped from either node using the AIX command HACMP - stop.
- B - Cluster services can be stopped from either node using the AIX command smitty clstop.
- C - Cluster services must be stopped from both nodes individually using the AIX command HACMP - stop.
- D - Cluster services must be stopped from both nodes individually using the AIX command smitty clstart.

Answer: B

Question: 2

What is the process for setting up the client to enable data to be sent to the DR550?

- A - Create CIFS mapping on each client to map to DR550
- B - Create NFS connection to /archive directory on the DR550 then map this directory to clients
- C - Load System Storage Archive Manager API on each client and edit dsm.sys or dsm.opt and register clients
- D - Load System Storage Archive Manager driver on each client and edit dsm.sys or dsm.opt on server to register clients

Answer: C

Question: 3

System Storage Archive Manager script files are stored in which volume group?

- A - /lib
- B - /usr
- C - TSMApps
- D - TSMDBLogs

Answer: C

Question: 4

IBM System Storage Archive Manager has disabled which two functions of IBM Tivoli Storage Manager?

- A - Migration
- B - Off-site copy
- C - Import
- D - Backup database
- E - Lowering retention periods

Answer: B

Question: 5

How is "DS4000 Service Alert" implemented on the DR550?

- A - Remote Support option uses dial modem to send alerts to IBM.
- B - Storage Manager runs on HMC and uses dial modem to send alerts to IBM.
- C - Remote Support option sends alerts to email addresses supplied by customer.
- D - Storage Manager sends an SNMP alert notification to an SNMP server on the customer network.

Answer: D

Question: 6

How many rack power connections are required in a 28Th “disk only” DRS50 configuration?

- A - Two connections on both racks
- B - Four 220 Volt 30 amp connections
- C - Eight 220 Volt 30 amp connections
- D - Eight 110/220 Volt 20 amp connections

Answer: B

Question: 7

In order for a content management application to access System Storage Archive Manager, which two items must be set up in the System Storage Archive Manager server?

- A - A backup schedule
- B - A client node
- C - A database backup schedule
- D - A management class
- E - A tape storage pool

Answer: B, D

Question: 8

How can content management applications retrieve data from the System Storage Archive Manager?

- A - System Storage Archive Manager API calls
- B - System Storage Archive Manager import/export
- C - System Storage Archive Manager server to server connections
- D - Directly from the System Storage Archive Manager disk storage pools

Answer: A

Question: 9

What is required when planning for the network environment for a dual node DR550?

- A - Six LAN cables
- B - Five TCP/IP addresses
- C - Four Ethernet switches
- D - A network protocol converter

Answer: B

Question: 10

After modifying the state of a volume using the DRM command “move drmedia”, which command would the administrator use to verify the results of the action?

- A - lsvol
- B - query move
- C - query actlog
- D - query tostate

Answer: C

Question: 11

What should be done when defining tape drives and libraries to System Storage Archive Manager?

- A - First make sure AIX can see the devices
- B - Always dedicate a drive for database backup use
- C - First define the tape drives and then the library
- D - Always use the System Storage Archive Manager device drivers only

Answer: A

Question: 12

During the Solution Assurance Review (SAP), a customer expresses plans to attach an unsupported tape library. What is the most appropriate response for the sales team?

- A - Explain to the customer that this unsupported configuration will prevent IBM from completing the order.
- B - Explain that an RPQ is NOT required if the sale of the DR550 was made through a certified Business Partner.
- C - Allow IBM to ship the DR550 with the customer understanding that it is their responsibility to make it work.
- D - Complete the order and ship the DR550 to the customer while waiting for the configuration to be tested and certified.

Answer: A

Question: 13

Which AIX command changes or modifies networking addresses?

- A - smitty chfs
- B - smitty mktcpip
- C - ipconfig/c
- D - ipconfig/m

Answer: B

Question: 14

What must be configured on the content management application machine to communicate with the System Storage Archive Manager server?

- A - Archive client installed, dsmserv.opt configured
- B - TSM backup client installed, dsm.opt or dsm.sys configured
- C - System Storage Archive Manager API installed, dsmserv.opt configured
- D - System Storage Archive Manager API installed, dsm.opt or dsm.sys configured

Answer: D

Question: 15

Which of the following is used to create a backup of rootvg?

- A - smit mkdvd
- B - backup
- C - copydvd
- D - lssavevg

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
