The 050-683 exam is very challenging, but with our 050-683 questions and answers practice exam, you can feel confident in obtaining your success on the 050-683 exam on your FIRST TRY!

Novell 050-683 Exam Features

- Detailed questions and answers for 050-683 exam
- Try a demo before buying any Novell exam
- 050-683 questions and answers, updated regularly
- Verified 050-683 answers by Experts and bear almost 100% accuracy
- 050-683 tested and verified before publishing
- 050-683 exam questions with exhibits
- 050-683 same questions as real exam with multiple choice options

Acquiring Novell certifications are becoming a huge task in the field of I.T. More over these exams like 050-683 exam are now continuously updating and accepting this challenge is itself a task. This 050-683 test is an important part of Novell certifications. We have the resources to prepare you for this. The 050-683 exam is essential and core part of Novell certifications and once you clear the exam you will be able to solve the real life problems yourself.Want to take advantage of the Real 050-683 Test and save time and money while developing your skills to pass your Novell 050-683 Exam? Let us help you climb that ladder of success and pass your 050-683 now!

QUESTION 1:

What is the NetWare console command to verify that automatic workstation import (AWI) is working correctly?

A. JAVA -SHOW
B. ZENWSIMPORT
C. JAVA -ZENWSIMPORT
D. SHOW -ZENWSIMPORT

Answer: A
From the server console enter JAVA -SHOW. If the server is running, you see
the statement com.novell.application.zenworks.autoswmanagement.wsimport

QUESTION 2:

Which statements are true regarding ZENworks for Desktops 4 (ZfD 4) policies? (Choose two)

A. Policies are stored on the workstation.
B. Policies are grouped according to functional area.
C. Policies allow you to assign file system rights to users.
D. ZfD 4 allows the same type of policy to perform various actions according to a specified schedule.

Answer: B, D
B: For ease of management, the policies (or rules) are grouped into policy
packages according to function areas: Container, Server, Service location,
and workstation.
D: An example an administrator can schedule an antivirus scan on all
workstation at a specific time each day.

QUESTION 3:

By default, which policy package has highest precedence?

A. A policy package associated with a group object.
B. A policy package associated with the root object.
C. A policy package associated with an organization (O) object.
D. A policy package associated with an organization unit (OU) object.

Answer: A

QUESTION 4:

Rank the default precedence of each policy package in order, from highest to lowest.

Select from these Policy Packages

Place here	
Place highest precedence here	A package associated with a group object
Place middle precedence here	A package associated with a container object
Place lowest precedence here	A package associated with a individual object

Answer:

Select from these Policy Packages

Place here
A package associated with a individual obiect
A package associated with a group object
A package associated with a container object

QUESTION 5:

Which ZENworks for Desktops 4 (ZfD4) policies are cumulative policies? (Choose two)

A. Windows Group policies
B. Dynamic Local User polices
C. Computer Extensible policies
D. Windows Desktop Preferences polices

Answer: A, C

QUESTION 6:

What is the benefit of implementing a search policy?

A. It allows you to search eDirectory for a specified user.
B. It limits how fat up the tree ZENworks looks for effective polices.
C. It allows outdated workstations to be easily located and removed.
D. It allows you to monitor events from outside the organization's network.

Answer: B
A search policy prevents tree walking by letting you specify a location in

the tree where workstation manager stop searching for an object's associated policies.

QUESTION 7:

You created a server policy package and associated it with a server object.
Where are the polices applied?

A. To all ZENworks for Desktops back-end servers-
B. To all objects in the tree that are valid types for the package.
C. To all objects on the server that are valid types for the package.
D. To all objects in the container that are valid types for the package.

Answer: C

QUESTION 8:

Which server package policy should you use to automatically place and name workstation objects in the eDirectory tree?

A. Rollup policy
B. Wake-on-LAN policy
C. Imaging server policy
D. Workstation import policy

Answer: D

QUESTION 9:

Which remote management utility can you use to run applications on the managed workstation from the administrator workstation?

A. Diagnostics
B. File Transfer
C. Remote View
D. Remote Execute
E. Remote Wake Up

Answer: D

QUESTION 10:

Click the option in ConsoleOne you use to get real-time information about device drivers on the controlled workstation.
