## BEA

### *BEA SOA Foundations Exam*

<http://www.ipass4sure.com/exams.asp?examcode=0B0-106>

The 0B0-106 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 0B0-106 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 0B0-106 exam is very challenging, but with our 0B0-106 questions and answers practice exam, you can feel confident in obtaining your success on the 0B0-106 exam on your FIRST TRY!

#### BEA 0B0-106 Exam Features

- Detailed questions and answers for 0B0-106 exam
- Try a demo before buying any BEA exam
- 0B0-106 questions and answers, updated regularly
- Verified 0B0-106 answers by Experts and bear almost 100% accuracy
- 0B0-106 tested and verified before publishing
- 0B0-106 exam questions with exhibits
- 0B0-106 same questions as real exam with multiple choice options

Acquiring BEA certifications are becoming a huge task in the field of I.T. More over these exams like 0B0-106 exam are now continuously updating and accepting this challenge is itself a task. This 0B0-106 test is an important part of BEA certifications. We have the resources to prepare you for this. The 0B0-106 exam is essential and core part of BEA certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 0B0-106 Test and save time and money while developing your skills to pass your BEA 0B0-106 Exam? Let us help you climb that ladder of success and pass your 0B0-106 now!

**Question: 1**

Which of the following provides the best definition of SOA?

- A. SOA is a software engineering paradigm that prescribes the creation of loosely coupled interfaces between the consumers of functionality and the applications that represent that functionality.
- B. SOA is a collection of technologies like enterprise service bus and Web Service management that facilitate the delivery of enterprise functionality as a set of services.
- C. SOA is an IT strategy that organizes the discrete functions contained in enterprise applications into interoperable, standards-based services that can be combined and reused quickly to meet business needs.
- D. SOA is a collection of standards, best practices, architectural models, and software development methodologies, principally based on Web Services, which may be incorporated into enterprise software engineering to provide information technology to an enterprise in a standards-based way.

**Answer: C**

**Question: 2**

When is SOA NOT an appropriate strategy? (Choose all that apply.)

- A. When the applications in a given enterprise are necessarily stand-alone, and thus would not benefit from a shared services approach.
- B. When the political boundaries among lines of business and their related IT functions are insurmountable, making sharing of functionality as services impossible.
- C. When the information systems in a given enterprise are homogeneous from a technological perspective and thus the sharing of functionality among them is essentially built into their construction.
- D. When enterprise business processes are widely distributed across the information systems for separate lines of business and are embedded in the integration among those systems.
- E. When application lifecycles are very short, and thus the effort to share functionality among them cannot be offset by gains from reuse.
- F. When a given enterprise has dozens or hundreds of information systems for which the exposing of functionality from those systems as services would be an extremely complex operation.

**Answer: A, C, E**

**Question: 3**

The aims of an SOA Program include: (Choose all that apply.)

- A. The establishment of governance to standardize the way that functionality is delivered and deployed for use by the entire enterprise.
- B. The delivery of enterprise architecture that facilitates the sharing of functionality as services in a way that is measurable and manageable and meets operational goals.
- C. The establishment of governance to standardize the way that enterprise information systems are coded.
- D. Providing accountability to the business for the translation of business requirements into information technology.
- E. The synthesis of business strategy and goals and the delivery cycles of projects into a roadmap for the creation and deployment of shared services.
- F. The development of any service that is to be delivered to the enterprise.

**Answer: A, B, D, E**

## Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
