BEA

BEA 9 Certified Administrator: System Administration Exam

<http://www.ipass4sure.com/exams.asp?examcode=0B0-108>

The 0B0-108 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 0B0-108 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 0B0-108 exam is very challenging, but with our 0B0-108 questions and answers practice exam, you can feel confident in obtaining your success on the 0B0-108 exam on your FIRST TRY!

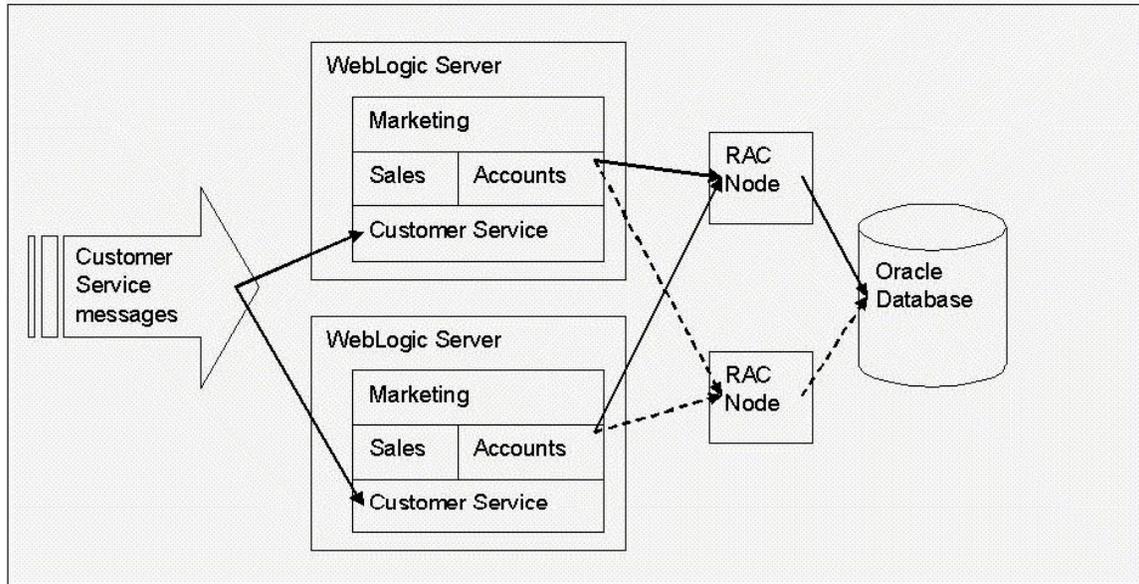

BEA 0B0-108 Exam Features

- Detailed questions and answers for 0B0-108 exam
- Try a demo before buying any BEA exam
- 0B0-108 questions and answers, updated regularly
- Verified 0B0-108 answers by Experts and bear almost 100% accuracy
- 0B0-108 tested and verified before publishing
- 0B0-108 exam questions with exhibits
- 0B0-108 same questions as real exam with multiple choice options

Acquiring BEA certifications are becoming a huge task in the field of I.T. More over these exams like 0B0-108 exam are now continuously updating and accepting this challenge is itself a task. This 0B0-108 test is an important part of BEA certifications. We have the resources to prepare you for this. The 0B0-108 exam is essential and core part of BEA certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 0B0-108 Test and save time and money while developing your skills to pass your BEA 0B0-108 Exam? Let us help you climb that ladder of success and pass your 0B0-108 now!

Question: 1**Scenario:**

You have made the decision to migrate all your operations onto WebLogic Server. An application has been chosen from each department for the initial phase of migration one from each of Sales, Marketing, Accounts, and Customer Service. The applications will be deployed as individual EAR files to a cluster of WebLogic Server 9.x instances, each with a pool of connections to an Oracle 10g database that provides corporate and departmental data services. The database team hopes to upgrade the database to use Oracle RAC (Real Application Clusters) shortly, which will require you to configure multiple sets of connections. Connectivity to the existing Service Engineer Dispatch system is via a JMS message bridge. When a service engineer calls in with a report, a message is sent via JMS to the Customer Service application deployed in WebLogic Server. The customer record in the Customer Service database must be updated with details from the message. It is important that the message is not lost because the call management system is not able to resend messages. To address this, the Customer Service application is accessing a persistent JMS Queue using an XA compatible connection factory.

In the future, each department will have its own schema within the Oracle database and the developers are writing their code with this in mind. However, for now, it has been decided to store all data in a single, company-wide schema. Which of the following approaches will make a future move to multiple schema simple, while making the most efficient use of resources today?

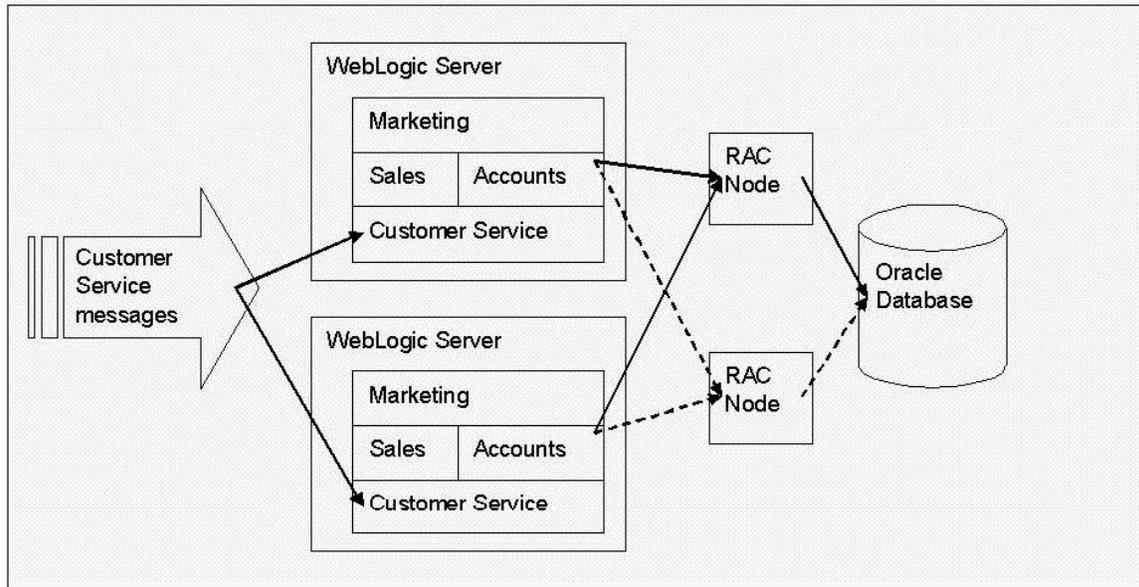

- A. Deploy an application-scoped Data Source module with each application.
- B. Deploy a Data Source system module and assign it multiple JNDI names.
- C. Deploy each department's application to its own WebLogic server.
- D. Deploy a Data Source system module for each department's application.

Answer: B

Question: 2**Scenario:**

You have made the decision to migrate all your operations onto WebLogic Server. An application has been chosen from each department for the initial phase of migration one from each of Sales, Marketing, Accounts, and Customer Service. The applications will be deployed as individual EAR files to a cluster of WebLogic Server 9.x instances, each with a pool of connections to an Oracle

10g database that provides corporate and departmental data services. The database team hopes to upgrade the database to use Oracle RAC (Real Application Clusters) shortly, which will require you to configure multiple sets of connections. Connectivity to the existing Service Engineer Dispatch system is via a JMS message bridge. When a service engineer calls in with a report, a message is sent via JMS to the Customer Service application deployed in WebLogic Server. The customer record in the Customer Service database must be updated with details from the message. It is important that the message is not lost because the call management system is not able to resend messages. To address this, the Customer Service application is accessing a persistent JMS Queue using an XA compatible connection factory.

Before deploying it into the test environment, you review the configuration of the Sales department's Enterprise Application, which is meant to contain a JDBC Application Module ?you are concerned that it may not have been built correctly. Most of an application's deployment descriptors only reference the JDBC module using a JNDI name. Which file listed below is the only one that refers directly to the JDBC Application Module file?

- A. config.xml
- B. application.xml
- C. weblogic-ejb-jar.xml
- D. weblogic-application.xml

Answer: D

Question: 3

Scenario:

You have made the decision to migrate all your operations onto WebLogic Server. An application has been chosen from each department for the initial phase of migration one from each of Sales, Marketing, Accounts, and Customer Service. The applications will be deployed as individual EAR files to a cluster of WebLogic Server 9.x instances, each with a pool of connections to an Oracle 10g database that provides corporate and departmental data services. The database team hopes to upgrade the database to use Oracle RAC (Real Application Clusters) shortly, which will require you to configure multiple sets of connections. Connectivity to the existing Service Engineer Dispatch system is via a JMS message bridge. When a service engineer calls in with a report, a message is sent via JMS to the Customer Service application deployed in WebLogic Server. The

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
