Check Point Security Administration NGX (156-215.65)

<http://www.ipass4sure.com/exams.asp?examcode=156-215>

The 156-215 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 156-215 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 156-215 exam is very challenging, but with our 156-215 questions and answers practice exam, you can feel confident in obtaining your success on the 156-215 exam on your FIRST TRY!

CheckPoint 156-215 Exam Features

- Detailed questions and answers for 156-215 exam
- Try a demo before buying any CheckPoint exam
- 156-215 questions and answers, updated regularly
- Verified 156-215 answers by Experts and bear almost 100% accuracy
- 156-215 tested and verified before publishing
- 156-215 exam questions with exhibits
- 156-215 same questions as real exam with multiple choice options

Acquiring CheckPoint certifications are becoming a huge task in the field of I.T. More over these exams like 156-215 exam are now continuously updating and accepting this challenge is itself a task. This 156-215 test is an important part of CheckPoint certifications. We have the resources to prepare you for this. The 156-215 exam is essential and core part of CheckPoint certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 156-215 Test and save time and money while developing your skills to pass your CheckPoint 156-215 Exam? Let us help you climb that ladder of success and pass your 156-215 now!

QUESTION 1:

Which VPN-1 NGX feature or command allows Security Administrators to revert to earlier versions of the same Security Policy?

- A. Policy Package management
- B. cpinfo
- C. cpconfig
- D. Database Revision Control
- E. upgrade_export/import

Answer: D

QUESTION 2:

In SmartView Tracker, you see an entry for an outbound connection showing address translation. But when setting SmartView Tracker to show all entries for that connection, only outbound entries show. What is the possible cause for this?

- A. The entry is for a Manual Dynamic NAT connection, from a specific host infected by a worm.
- B. The entry is for a Manual Static NAT connection, where inbound traffic is managed by a separate rule.
- C. The entry is for a Static NAT connection, from a specific host that has been infected by a worm.
- D. The entry is for a Dynamic NAT connection from a specific host.

Answer: B

QUESTION 3:

Which of the following commands is used to restore VPN-1 NGX configuration information?

- A. gunzip
- B. cpconfig
- C. fw ctl pstat
- D. cpinfo
- E. upgrade_import

Answer: E

QUESTION 4:

Which OPSEC server is used to prevent users from accessing certain Web sites?

- A. CVP
- B. DEFENDER
- C. URI
- D. FTP
- E. UFP

Answer: E

QUESTION 5:

Your organization Certkiller .com's security infrastructure separates Security Gateways geographically. You must request a central license for one remote Security Gateway. How would you request and apply the license?

- A. Request a central license, using the remote Security Gateway's IP address. Apply the license locally with the fwputlic command.
- B. Request a central license, using the SmartCenter Server's IP address. Apply the license locally on the remote Gateway with the fwputlic command.
- C. Request a central license, using your SmartCenter Server's IP address. Attach the license to the remote Gateway via SmartUpdate.
- D. Request a central license, using the remote Gateway's IP address. Attach the license to the remote Gateway via SmartUpdate.
- E. Request local licenses for all Gateways separately. Apply the license locally on the remote Gateways with the fwputlic command.

Answer: C

QUESTION 6:

How do you create more granular control over commands, such as CWD and FIND, in FTP data connections?

- A. Use Global Properties > Security Server settings.
- B. Use the gateway object's Security Server settings.
- C. Use the Service field of the Rule Base.
- D. Use an FTP resource object.
- E. Use FTP Security Server settings in SmartDefense.

Answer: E

QUESTION 7:

Which of the following is the final step in a VPN-1 NGX backup?

- A. Test restoration in a non-production environment, using the upgrade_import command.
- B. Move the *.tgz file to another location.
- C. Copy the conf directory to another location.
- D. Run the upgrade_export command.
- E. Run the cpstop command.

Answer: B

QUESTION 8:

Choose the BEST sequence for configuring user management on SmartDashboard, for use with an LDAP server:

- A. Configure a server object for the LDAP Account Unit, enable LDAP in Global Properties, and create an LDAP server using an OPSEC application.
- B. Configure a server object for the LDAP Account Unit, enable LDAP in Global Properties, and create an LDAP resource object.
- C. Enable LDAP in Global Properties, configure a host-node object for the LDAP Server, and configure a server object for the LDAP Account Unit.
- D. Configure a server object for the LDAP Account Unit, and create an LDAP resource object.
- E. Configure a workstation object for the LDAP server, configure a server object for the LDAP Account Unit, and enable LDAP in Global Properties.

Answer: C

1. Confirm the Use LDAP Account Management box is checked in the SmartDashboard Global Properties screen, on the LDAP tab.
2. Confirm User Management is checked on the account unit's General tab.
3. Confirm the LDAP server is accessible from the NGX SmartCenter Server.
4. Confirm there is a host-node object in SmartDashboard, with the IP address of the LDAP server.
5. Confirm there is a server object in SmartDashboard, for an LDAP server using the LDAP Account Unit.
6. In Login DN on the LDAP account unit's General tab, use the same login DN that was created when the LDAP server was installed. The DN is case-sensitive.

340, Check Point Security Administration NGX I Student Handbook

QUESTION 9:

You want to create an IKE VPN between two VPN-1 NGX Security Gateways, to protect two networks. The network behind one Gateway is 10.15.0.0/16, and network 192.168.9.0/24 is behind the peer's Gateway. Which type of address translation should you use, to ensure the two networks access each other through the VPN tunnel?

- A. Hide NAT
- B. None
- C. Dynamic NAT
- D. Static NAT
- E. Manual NAT

Answer: B

QUESTION 10:

Yoav is a Security Administrator preparing to implement a VPN solution for his multisite organization. To comply with industry regulations, Yoav's VPN solution must meet the following requirement:

- * Portability: Standard
- * Key management: Automatic, external PKI
- * Session keys: Changed at configured times during a connection's lifetime
- * Key length: No less than 128-bit
- * Data integrity: Secure against inversion and brute-force attacks

What is the most appropriate setting Yoav should choose?

- A. IKE VPNs: AES encryption for IKE Phase 1, and DES encryption for Phase 2; SHA1

hash

B. IKE VPNs: SHA1 encryption for IKE Phase 1, and MD5 encryption for Phase 2; AES hash

C. IKE VPNs: CAST encryption for IKE Phase 1, and SHA1 encryption for Phase 2; DES hash

D. IKE VPNs: DES encryption for IKE Phase 1, and 3DES encryption for Phase 2; MD5 hash

E. IKE VPNs: AES encryption for IKE Phase 1, and AES encryption for Phase 2; SHA1 hash

Answer: E

QUESTION 11:

How are cached usernames and passwords cleared from the memory of a VPN-1 NGX Security Gateway?

- A. By pushing new user information from the LDAP server.
- B. By retrieving LDAP user information, using the fwfetchldap command.
- C. By using the Clear User Cache button in SmartDashboard.
- D. Usernames and passwords only clear from memory after they time out.
- E. By installing Security Policy

Answer: E

QUESTION 12:

Which VPN-1 NGX configuration setting forces the Client Authentication authorization time-out refresh, each time a new user connection is authorized?

Choose ONE.

- A. The "Refreshable Timeout" setting, in the Limit tab of the Client Authentication Action properties screen
- B. The Global Properties > Authentication parameters, adjusted to allow for "Regular Client Refreshment"
- C. The SmartDefense > Application Intelligence > Client Authentication > Refresh User Timeout option enabled
- D. The Time object, with hours restricted and renewable, in the Time field of the Client Authentication rule.
- E. The "Time" properties, adjusted on the user objects for each user, in the source of the Client Authentication rule

Answer: A

Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
