## CheckPoint

*Check Point Certified Expert NGX R65*

<http://www.ipass4sure.com/exams.asp?examcode=156-315-65>

The 156-315-65 practice exam is written and formatted by Certified Senior IT Professionals working in today's prospering companies and data centers all over the world! The 156-315-65 Practice Test covers all the exam topics and objectives and will prepare you for success quickly and efficiently. The 156-315-65 exam is very challenging, but with our 156-315-65 questions and answers practice exam, you can feel confident in obtaining your success on the 156-315-65 exam on your FIRST TRY!

### CheckPoint 156-315-65 Exam Features

- Detailed questions and answers for 156-315-65 exam
- Try a demo before buying any CheckPoint exam
- 156-315-65 questions and answers, updated regularly
- Verified 156-315-65 answers by Experts and bear almost 100% accuracy
- 156-315-65 tested and verified before publishing
- 156-315-65 exam questions with exhibits
- 156-315-65 same questions as real exam with multiple choice options

Acquiring CheckPoint certifications are becoming a huge task in the field of I.T. More over these exams like 156-315-65 exam are now continuously updating and accepting this challenge is itself a task. This 156-315-65 test is an important part of CheckPoint certifications. We have the resources to prepare you for this. The 156-315-65 exam is essential and core part of CheckPoint certifications and once you clear the exam you will be able to solve the real life problems yourself. Want to take advantage of the Real 156-315-65 Test and save time and money while developing your skills to pass your CheckPoint 156-315-65 Exam? Let us help you climb that ladder of success and pass your 156-315-65

**QUESTION: 1**

The following is cphaprob state command output from a ClusterXL New mode High Availability member. When member 192.168.1.2 fails over and restarts, which member will become active?

```
Cluster Mode: New High Availability (Active Up)
```

Number	Unique IP Address	Assigned Load	State
1 (local)	192.168.1.1	0%	standby
2	192.168.1.2	100%	active

- A. 192.168.1.2
- B. 192.168.1.1
- C. Both members' state will be standby
- D. Both members' state will be active

**Answer: B**

**QUESTION: 2**

What is the command to upgrade a SecurePlatform NG with Application Intelligence (AI) R55 SmartCenter Server to VPN-1 NGX using a CD?

- A. cd patch add
- B. fwm upgrade\_tool
- C. cppkg add
- D. patchadd
- E. patch addcd

**Answer: E**

**QUESTION: 3**

You have a production implementation of Management High Availability, at version VPN-1 NG with Application Intelligence R55. You must upgrade your two SmartCenter Servers to VPN-1 NGX. What is the correct procedure?

- A. 1. Synchronize the two SmartCenter Servers.
- 2. Upgrade the secondary SmartCenter Server.
- 3. Upgrade the primary SmartCenter Server.
- 4. Configure both SmartCenter Server host objects version to VPN-1 NGX.
- 5. Synchronize the Servers again.

- B. 1. Synchronize the two SmartCenter Servers.
- 2. Perform an advanced upgrade on the primary SmartCenter Server.
- 3. Upgrade the secondary SmartCenter Server.
- 4. Configure both SmartCenter Server host objects to version VPN-1 NGX.
- 5. Synchronize the Servers again.
- C. 1. Perform an advanced upgrade on the primary SmartCenter Server.
- 2. Configure the primary SmartCenter Server host object to version VPN-1 NGX.
- 3. Synchronize the primary with the secondary SmartCenter Server.
- 4. Upgrade the secondary SmartCenter Server.
- 5. Configure the secondary SmartCenter Server host object to version VPN-1 NGX.
- 6. Synchronize the Servers again.
- D. 1. Synchronize the two SmartCenter Servers.
- 2. Perform an advanced upgrade on the primary SmartCenter Server.
- 3. Configure the primary SmartCenter Server host object to version VPN-1 NGX.
- 4. Synchronize the two Servers again.
- 5. Upgrade the secondary SmartCenter Server.
- 6. Configure the secondary SmartCenter Server host object to version VPN-1 NGX.
- 7. Synchronize the Servers again.

**Answer:** B

**QUESTION:** 4

Your primary SmartCenter Server is installed on a SecurePlatform Pro machine, which is also a VPN-1 Pro Gateway. You want to implement Management High Availability (HA). You have a spare machine to configure as the secondary SmartCenter Server. How do you configure the new machine to be the standby SmartCenter Server, without making any changes to the existing primary SmartCenter Server? (Changes can include uninstalling and reinstalling.)

- A. You cannot configure Management HA, when either the primary or secondary SmartCenter Server is running on a VPN-1 Pro Gateway.
- B. The new machine cannot be installed as the Internal Certificate Authority on its own.
- C. The secondary Server cannot be installed on a SecurePlatform Pro machine alone.
- D. Install the secondary Server on the spare machine. Add the new machine to the same network as the primary Server.

**Answer:** A

**QUESTION: 5**

You are preparing computers for a new ClusterXL deployment. For your cluster, you plan to use four machines with the following configurations:

Cluster Member 1: OS: SecurePlatform, NICs: QuadCard, memory: 256 MB, Security Gateway version: VPN-1 NGX

Cluster Member 2: OS: SecurePlatform, NICs: four Intel 3Com, memory: 512 MB, Security Gateway version: VPN-1 NGX

Cluster Member 3: OS: SecurePlatform, NICs: four other manufacturers, memory: 128 MB, Security Gateway version: VPN-1 NGX SmartCenter Pro Server: MS Windows Server 2003, NIC: Intel NIC (one), Security Gateway and primary SmartCenter Server installed version: VPN-1 NGX

Are these machines correctly configured for a ClusterXL deployment?

- A. No, the SmartCenter Pro Server is not using the same operating system as the cluster members.
- B. Yes, these machines are configured correctly for a ClusterXL deployment.
- C. No, Cluster Member 3 does not have the required memory.
- D. No, the SmartCenter Pro Server has only one NIC.

**Answer: B**

**QUESTION: 6**

You set up a mesh VPN Community, so your internal networks can access your partner's network, and vice versa. Your Security Policy encrypts only FTP and HTTP traffic through a VPN tunnel. All other traffic among your internal and partner networks is sent in clear text. How do you configure the VPN Community?

- A. Disable "accept all encrypted traffic", and put FTP and HTTP in the Excluded services in the Community object. Add a rule in the Security Policy for services FTP and http, with the Community object in the VPN field.
- B. Disable "accept all encrypted traffic" in the Community, and add FTP and HTTP services to the Security Policy, with that Community object in the VPN field.
- C. Enable "accept all encrypted traffic", but put FTP and HTTP in the Excluded services in the Community. Add a rule in the Security Policy, with services FTP and http, and the Community object in the VPN field.
- D. Put FTP and HTTP in the Excluded services in the Community object. Then add a rule in the Security Policy to allow Any as the service, with the Community object in the VPN field.

**Answer:** B

**QUESTION:** 7

How does a standby SmartCenter Server receive logs from all Security Gateways, when an active SmartCenter Server fails over?

- A. The remote Gateways must set up SIC with the secondary SmartCenter Server, for logging.
- B. Establish Secure Internal Communications (SIC) between the primary and secondary Servers. The secondary Server can then receive logs from the Gateways, when the active Server fails over.
- C. On the Log Servers screen (from the Logs and Masters tree on the gateway object's General Properties screen), add the secondary SmartCenter Server object as the additional log server. Reinstall the Security Policy.
- D. Create a Check Point host object to represent the standby SmartCenter Server. Then select "Secondary SmartCenter Server" and Log Server", from the list of Check Point Products on the General properties screen.
- E. The secondary Server's host name and IP address must be added to the Masters file, on the remote Gateways.

**Answer:** C

**QUESTION:** 8

You want only RAS signals to pass through H.323 Gatekeeper and other H.323 protocols, passing directly between end points. Which routing mode in the VoIP Domain Gatekeeper do you select?

- A. Direct
- B. Direct and Call Setup
- C. Call Setup
- D. Call Setup and Call Control

**Answer:** A

**QUESTION:** 9

Which component functions as the Internal Certificate Authority for VPN-1 NGX?

## Pass4sure Certification Exam Features;

- Pass4sure offers over **2500** Certification exams for professionals.
- More than **98,800** Satisfied Customers Worldwide.
- Average **99.8%** Success Rate.
- Over **120** Global Certification Vendors Covered.
- Services of **Professional & Certified Experts** available via support.
- Free **90 days** updates to match real exam scenarios.
- **Instant Download Access!** No Setup required.
- Price as low as **\$19**, which is 80% more **cost effective** than others.
- **Verified answers** researched by industry experts.
- Study Material **updated** on regular basis.
- Questions / Answers are downloadable in **PDF** format.
- Mobile Device Supported (**Android, iPhone, iPod, iPad**)
- **No authorization** code required to open exam.
- **Portable** anywhere.
- **Guaranteed Success.**
- **Fast**, helpful support **24x7**.
